

How to run Peasants Quest locally via your browser

The following instructions should allow you run Peasants Quest via your browser on a Mac. I have not tested it myself, though. I can't guarantee it works, but it seems legit 😊.

1. install nodejs & npm
2. install http-server by npm <https://www.npmjs.com/package/http-server>
3. Download the latest Linux version of Peasants Quest. Go to the www folder and copy the www folder and start terminal there go and type http-server -Space- then paste the www folder location
4. it will show you the browser link. go to browser and put it there.
