

**Gargant
black
leather
Step-by-step**

Paints required:

Black leather

- Corvus black
- Abaddon black
- Intermediate blue (Vallejo mc)
- Silver grey (Vallejo mc)

Basecoat the leather areas with a 1:1 mix of abaddon black & corvus black.

We now glaze in the raised areas on the leather with pure corvus black – add 2-3 parts of water. I have added a video tutorial for how to glaze in the post description.

We now make a 2:1 mix of corvus black & intermediate blue & start painting scratches towards the middle of the previous glazed areas – add 1-2 parts of water.

We now add 1 part more of intermediate blue, & do the same as in the previous step, but focusing on the middle of the raised areas. We furthermore edge highlight the leather & the straps/stitches with the same mix.

We now paint scratches in the very middle of the raised areas, by adding 1 part of silver grey to the previous mix. We furthermore highlight the sharpest edges (included straps/stitches) with the same mix. Finally we shade all the areas still covered in the basecoat with pure abaddon black – add 2-3 parts of water. Done! 😊
