[Spoiler information about the girls](#)

Routes:

A word about routes first. Very few single actions will result in one route over another being chosen throughout Left Hand Magic. Instead, which routes are available to you will be controlled by two factors. The first factor is, obviously, the Relationship Score you have with each girl. The second factor, slightly less obviously, is the Dom/Sub points the MC collects through your choices. Playing a character that is purely dominant will lock you out of any route where the MC would be a submissive, and vice versa. Likewise, not having enough Relationship points will lock you out of either individual routes...or threesomes if you can't collect enough points for both girls. Note that there are 7 total routes planned for the game, six of which will be available throughout development. The seventh will be a Harem Route that will only be available as a New Game+. Four of the routes will be single-girl routes where you pursue just one girl. Two of the routes will be ones where you pursue threesome relationships with two different pairs.

Intro Points

Talking to Trix: While there are no actual points in the Intro, in order to get one of the extra points during the Prologue, you must **Ask Trix About Herself**. This later enables you to get a relationship point during the Prologue when you dig a bit deeper.

Prologue Points

Trix's Lab:

Talking to Trix: If you **Asked Trix About Herself** during the Intro, you'll have an extra chat option with her during the Prologue, where you can dig deeper into her name. Doing so will give you an extra Relationship Point with her.

Lab Accident (Dominant): During the lab accident where you discover Trix's chastity belt, you are presented with two options. Stating that 'You look like a lot of fun...' grants the MC a Dominant Point, as well as represents a step towards Trix's solo route. Note, however, that 'a step towards' does not mean it will lock you into that route.

Lab Accident (Submissive): During the lab accident where you discover Trix's chastity belt, you are present with two options. Stating that 'Oh, that looks like it could be a lot of fun...' will have the MC expressing interest in what it would be like to *wear such a belt*. This grants a **Submissive Point** to the MC and also works towards the Revina/Trix Threesome Route.

Revina's Lab:

Eros Research: When given the choice to poke around the lab while Revina is distracted, examining the computer will result in both some H-Images AND a Relationship Point with Revina. However, if you do so, you won't get...

Trix's Key Discovered: If, instead of examining the computer, you poke around in the boxes and drawers of the lab, you will discover a photo of Trix in her Chastity Belt...and a key. Warning! **You need to know about the key in order to unlock the Trix/Revina Threesome option for Week 1.** However you **don't** need to know about it yet for Trix's solo route. Another opportunity will present itself if you are pursuing her solo route.

Arianna's Garage:

Mess with the Drone: At one point in Arianna's area, you are given the chance to turn on a drone or not. Activating the drone will get the MC a Submissive Point...and a Relationship Point with Arianna when she saves you from it. Skipping activating the drone will result in no points either way.

Catching Talia Napping:

To Blow or Not to Blow: After catching the boss napping, you have a chance to give her a blowjob. Doing so will get the MC a **Submissive Point** and a headstart on her Solo Route (as well as an animated H-Scene). Refusing will get you a **Dominant Point** and **Enable the Talia/Arianna threesome route.** Refusing will cause you to miss an H-Animation, however. So to see all content you'll need a save point.

Week 1 Events

The first thing to know is that you will ALWAYS get one free point from choosing to work with a given girl, it will be given for that girl when you sleep that night. All other points listed here are extras you can pick up with the right choices.

Trix's Week 1 Events:

Event 1 (Guinea Pig): None

Event 2 (Massage): When giving the stressed-out Trix a massage, you have the chance to push for more. **IF** you have already gained **at least one** point of dominance, doing so will work. You'll get an extra mildly-ecchi render plus a **Dominant Point** and an extra **Relationship Point**. Making the attempt if your Dominance is zero will result in the Loss of a **Relationship Point** as she rejects your advance.

Event 3(Bar Date + Trix at Home): This isn't a point opportunity...but an event change based on the MC's dominance level. If the MC has gained at least TWO Dominance Points, Trix will be able to cum when she masturbates at home...if the MC doesn't have at least those two points, she will fail and end up extra frustrated...

Revina's Week 1 Events:

Event 1 (Elemental Power Test): None

Event 2 (Elemental Test Results): None

Event 3 (Eros Research Assistant): No points...but there is a minor variant in the encounter depending on your choice back in the Prologue. (If you Examined the Computers or the Drawers/Boxes). Nothing major, just a few lines of difference.

Arianna's Week 1 Events:

Event 1 (Mech Puzzle): If you get the stupidly simple puzzle right on the first try, you'll get an extra Relationship Point with Arianna. If you fuck it up and shock her, you'll lose a point instead.

Event 2 (Turret Deployment): None

Event 3 (Overlook Date): None

Talia's Week 1 Events:

Event 1 (Yatai Lunch): No extra points

Event 2 (Skinny Dipping): No extra points...but an extra pseudo-h-option since you do go skinning dipping with her...

Event 3 (Talia's Relief): Warning! There is an option in this route that will *end her route permanently*. The option itself warns you. Essentially, this option exists at all because Talia is a 100% pure dominant. Both routes she takes a major part in cast her in a dom role. Continuing her route here will earn you a **Sub Point** and cement the MC as a submissive within her route. You can still enjoy switch options elsewhere, if you balance points right (or use cheats I haven't created yet...).

Week 1 Threesome Events!

A quick explanations of threesome events, first! There are two Threesome routes through the game, consisting of two sets of pairings. One is the MC plus Talia and Arianna. That route casts Talia as a Dom, the MC as a Switch, and Arianna as a Sub. The other option is MC plus Revina plus Trix. That route casts Revina as a Dom, with both the MC and Trix being Subs. Notably, the Trix/Revina/MC route is the one planned to contain Chastity Content for the MC (eventually).

In order to access a threesome event, you need to have essentially split your time equally between the two girls in each pair. This will, in most cases, shut you out of their solo H-events. But, in exchange, you'll get access to a Locked threesome event instead. This isn't an absolute rule, however. If you pick up extra points in various places, you may eventually be able to access threesome routes while still seeing some of the solo H-content. Unlocking threesome events may also have additional requirements, which will be included in their descriptions below.

Revina/Trix Threesome Event:

To unlock this event, you need to have **helped both Revina and Trix twice each** during your first week. You also need to have **Found out about Revina being Trix's Keyholder** during the prologue. If you meet all requirements, you'll get a new option on Day 5 of the week: 'Try to Nudge Revina and Trix Together.' This option will trigger a major variant of Revina's Eros Testing scene, where you get Trix involved alongside yourself.

Talia/Arianna Threesome Event:

To unlock this event, you need to have **helped both Arianna and Talia twice each** during your first week. You also need to have **Turned down the chance to give Talia a blowjob** in the prologue. (Note: A Build 1 save where you did that won't work, as I kinda forgot I'd need a variable for that, despite having planned it this way). If you meet all requirements, you'll get a new option on Day 5 of the week: 'You wonder about something Talia said...'. Choosing this option triggers a discussion with Talia where both of you plot to have some fun with Arianna and her Drones...

Week 2 – Weekday Events

Arianna:

Day 1: Project Aurora

Arianna introduces you to one of her projects intended for the mass market. No H-Content. No Extra Points.

Day 2: The Calling

Learn a tiny bit more about elves in the *Left Hand Magic* world...and go on a nude nature hike with Arianna. Minor H-Content but no animations. No Extra Points

Day 3: Probing

Revina has decided she might not need the set of drones Arianna was making her. Arianna decides to find another use for them...involving you. Results in **an additional Sub Point**.

Revina:

Day 1: Upgrades

Revina needs your help in applying more fixes to her body, based on the work with elemental magic you've been doing with her. No extra points.

Day 2: Shopping

Revina has become *way* too obsessed with the new data from her recent upgrades. Time for an intervention! You take her to the mall for some 'practical, real-world testing.' End result is some minor H-content, but no animation. No extra points.

Day 3: Eros Testing Redux

Apparently, your last intervention wasn't quite enough, as you find Revina in obsessive research mode again. This time, you take more drastic measures by using her Eros Testing supplies to get her focused on a different area of research. **Results in gaining a Dom Point.**

Talia:

Day 1: Summoning

Talia is actually caught up enough on her paperwork that, after a morning of helping her keep on top of it, she can actually get her own research done! She has you help with summoning something from a new Plane. No H-content. No Extra Points.

Day 2: Spa Day

You've been such a good influence on Talia that Trix has allowed her to take you out during the afternoon for a massage. Of course, this is Talia, so the 'Spa' that she takes you to is in the red light district and offers 'happy endings.' H-content but no animations.

Day 3: Focus and Rewards

You've figured out Talia's problem. She has such an *insanely* high sex drive, that she needs relief throughout the day to stay focused. You help her with that...and she offers to 'reward' you for your help at the end of the day. Accepting, you end up teleported to her home for some fun. Animated H-Scene. No extra points.

Trix

Day 1: Animal Testing

When you visit Trix, you discover that she's working with Revina on a shared test project today. You end up helping the two of them. **Note: This is your chance to grab Trix's chastity belt key!** No extra points.

Day 2: Nightclub

After a day of helping Trix, she clearly wants to hang out more. When you suggest doing so, she suggests a club she knows. **This scene has unlockable content.** If you have **Dominance of 3 or more** (which is only possible if you've taken other Dom options beyond just Trix's content), you will unlock an extra scene where you can order Trix to service someone in the club's glory hole. *This content is OPTIONAL.* It does get you an extra **Dom point** if you do it, however.

Day 3: To Tease a Trix

This is the first time you actually get to use Trix's **chastity belt key**. Working with her, she's clearly distracted...and you decide the time is right. You take control and add unlock her belt...just long enough to add a toy you acquired with part of your first

paycheck. You proceed to tease her for the rest of the day...and then let her earn an orgasm back in her office by giving you one of your own. Not that you'll be letting her out of the belt for her to get it! Animated H-Scene. Results in gaining a **Dom Point**.

Week 2 Threesome Events

Arianna + Talia: Only unlockable if you've both done the previous Week 1 Threesome event for them, plus have done at least 2 events from each of their paths during Week 2. You conspire with Talia about Arianna again. This time, the two of you lure her out to drinks...and end up having a threesome in a rooftop hot tub. Gives relationships points for both of them, but no other points.

Revina + Trix: Only unlockable if you've both done the previous Week 1 Threesome event for them, plus have done at least 2 events from each of their paths during Week 2. Checking up on how Revina and Trix are doing, you find yourself sucked into a test-cum-roleplay involving Futa Potions and a helplessly bound Trix. Obviously, this scene contains **futa/transformation** content. **Grants a Sub Point**. First non-spoiler hints of where this path is going...

Week 3 – Weekday Events

At the beginning of Week 3, Talia calls everyone together for a meeting. In order to gather ammunition to use against the City Council in its continuing efforts to shut down Left Hand Magic Solutions, Talia is asking each of the girls to at least consider bringing a new product to market. Whether this be a side project or their main project. Who you choose to help will start having a serious impact on the direction of the story from here on out...and, of course, you'll only really be able to help those who you've already worked with so far. After all, those are the ones you've familiarized yourself with their work over the last two weeks!

Note: Minimum requirements for each girl's scene set is 6+ Relationship Points. This is currently balanced in favor of being generous to the player and may be adjusted in the future.

Arianna's Route:

Day 1 – Sexbot Assembly: As you should have discovered previously, Arianna has a side project called Project Aurora. While the androids she's developing to be possessed by spirits should hopefully be useful for a lot of things...the first design is intended as a Sex Bot. There's plenty of horny spirits around to volunteer! This first day you'll be helping her put the cover on the frame...while also getting the chance to ask her questions about herself. By default there are two conversation options open. However! If you did her event during Weekend 2, then you'll also have a third option. That third option allows you to get more information on her previous relationship with Veronica...and earns you an extra +1 Relationship Point.

Day 2 – Hypno Intro: This time, when you find Arianna working on Project Aurora, the bot is nearly complete...and she's programming it with Hypnotic Commands useful for its job. After getting an explanation from her, she offers to let you try it out yourself. This is the first, very lightweight, introduction of the Drone Kink that was voted for by Patrons!

Day 3 – Sexbot Testing: The sex bot, now named Yen1, is awake! And you came just in time to help ‘test’ Yen1’s skills...

Revina’s Route:

NOTE! You MUST have completed Revina’s Weekend 2 event in order to progress with her. It’s too important to her development to allow it to be skipped...

Day 1 – Revina’s Overdue Paperwork: After a few hints about what will happen later in the week, you arrive to find a very embarrassed Revina. Apparently, she’s been sitting on a number of essentially completed projects for months. As you help her get her paperwork done so they can be finalized, you can ask her some questions as a way to get to know her a bit. All three of Revina’s questions are available to anyone on this route. One of the three will provide a +1 Relationship boost. So make sure to see them all!

Day 2 – Visit from a Specialist: I’m not going to spoil this one! Suffice it to say, the MC called in professional help to help Revina through her problems. Someone she knows personally...and who is quite a lot of fun, I hope! While that specialist is off with Revina, you work in the lab on the potion applications...and stumble across some more testing videos from Revina trying those potions out...

Day 3 – Rewards for the Good Girl: After the specialist had their first session with Revina...they also had some new bondage gear delivered to your apartment, with a note that it’s a good outlet for Revina. After she works hard to finish up all the applications, you take her home for some experimentation with the new bondage machines.

Talia’s Route:

NOTE! You MUST have completed Talia’s Weekend 2 event in order to progress with her. While it isn’t as critical to her plot as Revina’s, it IS critical to the introduction of her hobbies...

Day 1 – New Summons: Your previous work with Talia has freed up enough of her time for her to perform some summons from other planes. She’s arranged for a meeting with a potentially useful summons from an unaligned plane, who might be able to help with a different kind of ecological disaster. Since that disaster is much more famous, it would buy the company a lot of breathing room and good will. Help her with the negotiations...and afterward you’ll get a chance to ask her some questions about her past! In particular, asking her about her VR hobby gets you an extra +1 Relationship point.

Day 2 – Underwater Fun: It’s time to see if Talia’s new summons can help! Talia takes you with her on a dive to the Great Coral Reefs, to watch her work. Of course, you both eventually get bored of watching and wander off for a little underwater fun...

Day 3 – The Photoshoot: Talia and you work hard on finishing up the paperwork for proving Perilla can help with the Reef issue...and then take a well deserved afternoon off. Talia takes you back to her place...where she reveals that she’s into Cosplay as a side effect of her love of gaming. She convinces you to try a costume she’s modified for you out...while she works the camera. One thing leads to another for some H fun in the photo studio...

Trix's Route:

Day 1 - Burn Tests: When you approach Trix, you'll be faced with a conflicted blood mage. She wants to talk about your relationship. And she also wants to set you on fire. For science! You'll need to deal with both. Note! There is an extra **relationship point** for Trix available here *only if you did her Weekend 2 date*. If you did so, you can set her at ease by asking more about her grandfather. Which also gives you some additional insight into him...which *might* be important later on ;-). You gain an extra +1 Relationship if you ask about her grandfather.

Day 2 – Lab Work: Trix needs help doing a lot of mundane, boring prepwork for her experiments. Well, good thing you've acquired a few things recently to spice the day up and keep the two of you from dying of boredom! Contains a short H-Animation. **Note: This is the first introduction of Pet Play** into Trix's content. It's a fairly mild addition, but also you're first in-game indication that she might be interested in that sort of thing...

Day 3 – Conjunction Experiments: Time to put that prep work to use! Faced with another boring day, this time of running unending tests on ethically conjured animals, you grab your chance to make things interesting when you spot a vial of Trix's 'baseline test' formula. Injecting her with it part way through the day, you drive her crazy until the experiments are finished...then drag her off to Revina's 'Eros Testing' chamber for some mutual relief. Results in a full 2-stage H-animation.

Arianna + Talia Threesome Route:

Note I altered the way Weekday 3 stuff works during Week 3, in order to help expand the Threesome Routes. Requirements are no longer the same Build 7 and onward and have been changed to reflect that here.

Unlock Requirements: As the threesome routes ARE intended to be at least a bit harder to get, this scene has the strictest requirements so far in the game. You need at least 6 Relationship Points with BOTH Arianna and Talia. You need to have helped both of them at least once during Week 3, and you must have already done their previous Week 2 threesome scene. If you meet all of those requirements, you'll unlock these options during Week 3.

New Summon the Lightning: Your attempts to get into Arianna's pants have produced an unexpected boon. Between the three of you, you've discovered a possible solution for Clean Energy. Doing this + The Ruins of Xes will unlock a new Weekend 3 event for the combined project.

The Ruins of Xes: You help Talia convince Arianna to give a VR game with the two of you a shot. There, you let her have fun exploring ruins and solving puzzles as Doctor Laura Craft. Yes, I went there ;-). When she unlocks the ruins, however, she finds out that this is an H-game...

Revina + Trix Threesome Route:

Note I altered the way Weekday 3 stuff works during Week 3, in order to help expand the Threesome Routes. Requirements are no longer the same Build 7 and onward and have been changed to reflect that here.

Unlock Requirements: As the threesome routes ARE intended to be at least a bit harder to get, this scene has the strictest requirements so far in the game. You need at least 6 Relationship Points with BOTH Revina and Trix. You need to have helped both of them at least once during Week 3, and you must have already done their previous Week 2 threesome scene. If you meet all of those requirements, you'll unlock these options during Week 3.

New Prolong Research: Much to their own shock, having grown closer to one another has resulted in Trix and Revina accidentally discovering a combined use for their research. This will open up a new option for Weekend 3, though only if you also do A Last Touch of Freedom.

A Last Touch of Freedom: Revina and Trix are interested in you joining their new relationship. And Trix has noticed you casting interested glances at her chastity belt. Last week, Revina got your measurements...and this week they are offering for Revina to become your keyholder as well as Trix's. Of course, they also understand that a last bit of fun before the MC's pussy is locked away is called for! Warning – This route will ultimately lock you out of all other routes, since the MC will be in chastity. Make sure to create a save before you start it!

***New* Week 4 – Weekday Events**

Note: Week 4 is where the routes start to well and truly split. With each route slowly getting more content as the various ideas you can present during the Weekend 3 events take off. As of Build 7, only Arianna has solo content. Though both Threesome Routes have three full days of content. Each solo route will eventually have 4 full days, instead of the 3 days previous weeks had. Currently, due to time constraints, I was unable to finish the 4th day for Arianna. So she is currently at 3 of 4 days with both threesome routes at 3 of 3 days.

New Arianna's Route:

The only two unlock conditions for this route are to A) have done Arianna's Weekend 3 event. And B) Not be in Chastity.

Day 1: Project Aurora has been approved...which means you need to set up the hardware for producing more of them! The Bot Warehouse, will six bays to produce Sexbot chassis, needs to be set up. Day 1 is simply rolling up your sleeves and getting to it!

Day 2: Now that the bays are more or less online, you need to test them on running the production model! Lots of bugs to fix...and a nice long break while waiting for more things to break to take advantage of. Specifically, for Arianna to sneak up on you with a new and improved Hypno Device...

Day 3: A bit more work with the bots...and another use of the Hypno Device! But this time...Arianna is taking you out in public with the device in place! After getting you into some Clubbing Clothes, she takes you to the Club. Things escalate when she reveals that this particular club has a Gloryhole in back. The first stage is set in stone...but what happens when she tries to push for a bit more with the second stage sees the introduction of a variant option!

Currently, if you 6 or more Sub Points, you'll obey her order to escalate from a blowjob to sex. If you have less Sub Points than that, you'll use a safeword and Arianna proposes an alternate plan, where *she* is the one getting fucked while she eats you out.

Dev's Note: I'm not sure that's how I actually want to handle this. I'll likely put a poll up before Build 8. To see if people want it tied to Sub/Dom points like this...or would prefer it simply be a choice that the player can make. Given that the vast majority of the game is Lesbian/Futa focused, enough people may be put off by the idea that it would be better just to have it skippable. Also note, Arianna's route is the only one in which this sort of thing is currently intended. Her particular kink set lends it to adding others in, whereas that's not true with the other girls.

***New* Arianna/Talia Threesome Route:**

The only two unlock conditions for this route are to A) have done the Arianna/Talia Weekend 3 event. And B) Not be in Chastity.

Day 1: The Lightforger Energy Consortium has given you the perfect facility to start building a true prototype of your new Reactor design. It's a bit of a fixer upper, though...so get to fixing it up!

Day 2: A long day of experimenting with the Reactor now that all the equipment is installed! And long days demand some stress relief at the end. Arianna barely puts but a token protest at this point!

Day 3: After setting up an experiment to run, the three of you end up having an early end to your day. Arianna surprises everyone but suggesting another VR game...one she picked out herself! Cue a Jungle Survival VR game! And she even included, without prompting, the adult mods...

***New* Revina/Trix Threesome Route:**

The only two unlock conditions for this route are to A) have done the Revina/Trix Weekend 3 event. And B) The Player MUST be in Chastity!

Day 1: Wow! They weren't kidding about wanting to move fast on testing for the new Prolong Treatment! A bunch of equipment has arrived, along with a bit of help, to set up an Injection Lab to process the first group! Also contains a tiny bit of a revelation about how the Medical Magic community views Revina...

Day 2: With the Injection Lab up and running, it's time to process the first batch of testers! Of course, since all you can do is help check people in, Revina decides to keep you from being bored by turning on your Chastity Belt's 'Tease' function. If you're a Good Girl, at the end of the day she might let you cum!

Day 3: With only a bit of paperwork to still do for the initial Prolong Project setup, Revina decides to treat you and Trix to a surprise she's cooked up. Only after making sure both of you are good and horny from being left on 'Tease' all day!

That teasing escalates when she takes the two of you to the Velvet Pussy...but even that proves to be just preparation for her actual plan! When you get to her apartment, you discover she's set up two Pillories and two Fucking Machines. And you are Trix are going to be competing! Whoever manages to hold out the longest against the merciless machines will get a second round of Revina's *personal* attention. But the loser will be belted, bound, and forced to watch as the winner gets that attention!

Winner/Loser is determined by your Sub/Dom score. Dom Points are Subtracted from your Sub Point total. If your end total is greater than four (in other words, you have at least 5 more Sub Points than Dom Points) you win. If it's not...you lose! The second stage animation has an alternate set of animations for Win/Loss.

Weekend Events!

A quick introduction to weekend events first! While your five working days will be spent as you choose, on the weekends Major Events occur. Sometimes, it will be something to do with the company. Other times, there will simply be the chance to follow up on who you're most interested in. **These events have the greatest impact on which route you'll end up on.**

Weekend Event 1 - Emergency

The MC gets an emergency message that brings them into work despite it being a day off. There, they catch the tale end of a confrontation between Talia and a representative of the City Council, Veronica. In their ongoing desire to see Left Hand Magic Solutions shut down (as they feel it's bad for their city to have a company of openly operating Left Hand Magic users), the council has quietly passed a law changing the deadline for some critical paperwork. Now with only three days to the deadline...and a boss who is *really terrible* at focusing on paperwork, something drastic will need to be done, lest the company be shut down.

Trix's Route Solution:

If you have at **least 3 relationship points with Trix**, you can choose to cook up a solution with her. Taking advantage of Trix's knowledge, you use a combination of carrot and stick to get Talia feverishly focused on her paperwork. You also learn that Trix is just a *little bit* scary and you shouldn't piss her off.

Talia's Route Solution:

If you have at **least 3 relationship points with Talia**, you can take advantage of the fact that you've already been helping her with paperwork this week. Between her actually being ahead because of that, and you there to help her focus, you can get it done in time. Though...you may

need to help her relieve some stress at times. Results in gaining a **Sub Point** if you choose this route.

Revina's Route Solution:

If you have at **least 3 relationship points with Revina**, you'll observe that you've seen a lot of high-end equipment in Revina's lab. Asking Trix about it reveals most of the equipment in of Revina's own making...and that she's an expert hacker, among her other talents. Choosing to pursue this option results in Revina taking you back to her place...and you celebrate with some one-on-one time after she succeeds in changing a few critical details in the City Council's system...

Arianna's Route Solution:

If you have at **least 3 relationship points with Arianna**, you'll decide to speak with her about some irregularities you noticed in Veronica's behavior. This results in you speaking to Arianna in her capacity as an older, more experienced elf. Since there's a minor twist that results from this one, I'll not spoil it here :-).

Weekend Event 2 – First Dates

The second weekend differs significantly from the first in a couple of important ways. In doing so, it represents the other 'type' of weekend content that will appear in Left Hand Magic. First, you get to choose different events for different days. Essentially, you can choose one option each of Saturday and Sunday. Second, this second weekend is really for getting-to-know the girls better. While they may not be formally acknowledged as 'dates' within the game, that is, for all intents and purposes, what they are. They are also *large* encounters, compared to regular scenes. Each girl has a date with between 16 and 21 still renders, plus a 2-stage H-animation. The last thing to note here is that, since it can't be guaranteed that they player either can or wants to pursue multiple girls' weekend content, there is also an option to 'pamper yourself' for a day. This results in a handful of unique still renders, followed by a new 2-stage animated masturbation scene.

Basic Notes: The following descriptions contain spoilers. Each encounter will give you +2 relationship with the girl in question. Only Trix has something mildly resembling an extra unlock. You must have a minimum of 5 relationship points with any of the girls for their dates. This **does** mean that it's possible to unlock two of them at once.

Arianna's Route: Arianna invites you on an adventure with minimal details. She ends up taking you to a BDSM club...which happens to be owned by a familiar face. This date gives you a **submissive point**. No extra relationship points available.

Revina's Route: You get a lot of emotional backstory from Revina, which I won't ruin here. Results in taking her to a strip club, then home to your apartment for some fun with you as the dom. This date gives you a **dominant point**. No extra relationship points available.

Talia's Route: You find out that Talia is a VR gamer when she drags you along for a dive into a modded, post-apocalyptic world. Results in Bondage scenarios with you as the submissive. This date gives you a **submissive point**. No extra relationship points available.

Trix's Route: Like with Revina, you get a lot of emotional backstory which I won't ruin here. Results in you finally taking Trix's belt off to fuck her properly...once she's helplessly bound, of course! This date gives you a **dominant point**. Relationship Points: Well there are technically no extra points exist within the date itself...you MUST go on this particular date with Trix in order to find out about her relationship with her grandfather. Knowing that will unlock an additional available point for her in Week 3.

Self-Care Day: Instead of dating anyone, you can simply choose to do some shopping at the mall, including for some new lingerie. Choosing this day will also result in a new Masturbation scene at the end of the day. No points.

Weekend Events 3 – Present Your Work

Week 3 is where the various Routes are going to really start splitting up. Based on who you chose to work with during Week 3, you'll be able to present the project you helped them with to different backers/investment groups. You **must** have completed at least Day 2 of *someone's* Week 3 content, or you'll get a game over. On Saturday, you MUST present one project. On Sunday, you can choose to present another project if you can, or else take a 'self-care' day. Currently (Build 6) each of the girls has a project to present. Eventually, there will also be different, combined events for the Threesome Routes.

Arianna – Yen 1: If you've helped out Arianna enough...Yen 1 will be ready for presentation to one of Left Hand Magic's backers. That backer is enough of a surprise that I won't reveal it here. Suffice it to say that she and Talia have...history. That you'll get a few hints of here. Negotiations go well...and end up in Yen 1 demonstrating her skills, right there in the conference room...

Revina's Potion: If you've helped out Revina enough, then the transformation type potions that you helped Revina with are of interest to various medical fields. There's a complication, however, with a member of the Department of Magically Regulation shows up. Everyone hates DRM. Yes, I did make the bad joke of their acronym on purpose. No, I'm not sorry. Revina was a good girl and made a useful thing...so she wants a reward. That's reasonable, right?

Talia's Reefer Project: If you've helped Talia enough, then the same environmental committee that Left Hand Solutions already deals with for it's Land Cleansing project is even more interested in funding a project to restore the Dungeon Reefs. Afterward, Talia kidnaps you from some kinky tentacle fun back at her place...

Trix's Elixirs: If you've helped Trix out enough, you'll have to option to present her new Blood Magic based work to a alchemical lab. Trix's Grandfather, William Crow, is present as both one of Left Hand Solution's backers and as a broker for the deal with the alchemical lab. Afterward, you take Trix out to a Love Hotel in the Red Light District to celebrate.

New Infinite Power! (Ariana/Talia): Electrical power, that is! If you've done Summoning the Lightning + The Ruins of Xes, you can present your new Reactor design to the Lightforger Energy

Consortium and the Department of Environmental Magic. Afterward, Talia takes you and Arianna out for a fancy meal...and then back to her Penthouse for some fun. Note: This represents the real start to the Threesome Route splitting off into a full route of its own.

New Prolong Treatment: Requires Prolong Research + A Last Touch of Freedom to unlock. The combined work of Revina and Trix has accidentally produced a treatment that may extend the lifespans of humans and other short-lived races by a factor of three! This had brought the attention of a Alchemical Group that is eager to start trials as soon as possible! Afterward, Revina takes you out for ice cream...only to initiate some public fun you can't escape, using your Chastity Belt's pleasure features! Note: This represents the real start to the Threesome Route splitting off into a full route of its own.

Self Care Day: This is the bit that actually might need a guide. Taking a Self-Care Day on Sunday results in a new menu. Specifically, one with different masturbation options. Two of them are repeats of previous options.

Keep it Simple: This will repeat the Intro Masturbation Scene, though with a few new around-town renders that give a tiny bit of lore and backstory to the world.

Spend time with your Luxury Vibe: This is a simple repeat of the Week 2 Masturbation Scene.

(Unlockable)The Wheel: This, on the other hand, is a completely new masturbation scene that requires unlock conditions. There will eventually be more like this, with other unlock conditions. For this one, the requirement is that you must have gotten the Bondage Device Upgrade to your apartment from Auntie Wren, via Revina's Route (Specifically, you have to have done all of Revina's Week 3 Weekday content). If this scene is chosen, you not only get a little bit of background about the MC...but the MC also decides to give the Bondage Wheel device for her own 'Self-Care' fun!

New Chastity Masturbation: If the MC is currently in a chastity belt due to the Revina/Trix Threesome Route, this option appears instead of the others. Completely new to Build 7, this option allows a chaste MC to request permission from Revina to cum. She agrees, triggering the belt's tease feature...but only for 15 minutes. It is up to the MC to push herself over the edge during that time span...or else end up frustrated! This scene has two possible endings, based on your Sub/Dom score. You must have **at least 4 more Sub Points than Dom Points** in order to actually cum. The exact calculation is simple $(\text{SubPoints} - \text{DomPoints}) > 3$. In other words, your Dom Points are subtracted from your Sub Points. And if the result is 4 or more, you'll cum...and if it's not, you won't!

A Note About the Game's Routes

(SPOILERS AHEAD! DON'T READ IF YOU DON'T WANT A PEEK INTO FUTURE CONTENT)

Okay, if you're still here, I assume you don't care about some minor spoiler bits. In this section of the guide, I'm going to show the general theme of each route. Not all routes are set in stone just yet, so some will have more details than others at this time.

Trix's Route:

Trix is 100% pure submissive. As such, her solo-route will have the MC slowly taking up the role of her dominant. The single biggest fetish/kink for this route will be Chastity Play in its various forms and types.

Remote control toys already featured. And, per a patron poll, Pet Play is now set in stone as a secondary kink.

Revina's Route:

Revina is a switch. However, in her solo route, she is intended to be *mostly* a submissive. Though she may surprise the MC a time or two. Bondage Play is current the major theme of her route. Transformation content features lightly, but per patron polling, she's mostly just into Bondage and more Bondage.

Trix/Revina Threesome Route:

This is where Revina being a switch becomes relevant. As, in this route, she will become a Dominant for both Trix and the MC. This route is the primary route planned to contain content with the MC in Chastity. Though there may be some of that in Talia's route, if it fits there.

Talia's Route:

Talia is Trix's opposite in that she is 100% dominant. In her route, the MC steadily becomes more submissive to her, with Bondage themes joining the obvious Futa content. As this is a fairly general BDSM route, other kinks such as chastity play, spanking, toys, pet play, etc, may make occasional appearances. Per Patron Polling her major focus beyond bondage is Cosplay.

Arianna's Route:

Like Revina, Arianna is a switch. However, her Solo and Threesome routes are flipped. In her solo route, Arianna will become a Dominant, with the possibility of occasional switch moments that involve Veronica. She's very much an exhibitionist. Per Patron Polling, her secondary interest is a Drone kink. Specifically, things like hypnosis with the MC, with Arianna as the dominant.

Arianna/Talia Route:

In this route, Arianna takes the role of a submissive. Whereas the MC takes the role of a dominant-leaning-switch. Talia will be the true dominant of this route, with the MC dominating only Arianna...and occasionally being dommed by Talia in the process. Of all the routes, this one is currently the most nebulous. Pony Play may feature here *if* it doesn't in one of the other routes. Bondage certainly will, possibly including Bondage Predicaments.
