

Autumn's Rush Outline

By Jester Laughie and Frostfir3

Overview

Autumn's Rush is a side scrolling platformer and beat'em up style adult game. The game takes place in a steam punk themed world with anthropomorphic characters. Gameplay and style is similar to that of titles like Mega Man. The player will encounter simple puzzles, unlockable items, weapons and bosses. If Autumn is defeated or stunned in battle, enemies will take advantage of her sexually to fill her with a corrupt sexual magic. If Autumn defeats or stuns an enemy, she has the option to (temporarily) cure them of their lust to gain bonuses. Entering into a sex scene will open a mini game in a sort of sexual tug of war that requires the player to repeatedly hit a button at a certain timing in order to win the game and receive an advantage. If an enemy instigates a sex scene the mini game becomes exponentially more difficult as compared to if Autumn instigated the scene. Autumn will have a lust bar and a health bar. If the Lust bar increases to max, Autumn loses the game, likewise if the health bar reaches its minimum, she will also lose the game.

Level Design, Atmosphere and Atheistic

The level design will contain open fields, towns, caves, mountains and a sky fortress. The Atmosphere should be similar to that of a colorful Autumn landscape containing vibrant golds, deep oranges, fading greens, yellows, reds and crisp browns. Architecture will primary constructed out of wood stone and metal with complex arrays of brass pipes interconnecting the buildings. All machinery and weapons should be steam powered using energy from coal or a magic energy-crystals. The interactions and sex scenes should generally be light hearted and comical.

Combat

Combat mainly consists of close-range combat with a few limited long-range weapons. Enemies have two types of attacks, one that stuns and one that does damage. Stun attacks are special moves that will render Autumn defenseless for a given period of time where she can be taken advantage of. Damage attacks are self-explanatory. As Autumn takes damage her clothes will also take damage and eventually disappear, after they are gone Autumn is more susceptible to stun attacks.

Adult Scenes

For now, each enemy will have two sex scenes, one where Autumn is the victor and one where Autumn is the loser. This may be expanded later. Bonuses from winning a fight include extra health, currency, a lust bar decrease and possibly, experience points.

Story and Characters

Autumn lives alone on the outskirts of Maple Town. She was raised by her mother and father who owned a respectable farming equipment business. Her father only referred to as Papa throughout the game is a famous engineer and taught Autumn all she knows about steam power and engineering, while instead of putting her skills toward farm equipment Autumn put her skills toward weaponry and upon her 18th birthday decided to move to the outskirts of Maple Town to start her own business. She is visited frequently by a local friend named Allister who is the son of a local parts vendor, and a nerdy looking wolf who has always had a huge crush on Autumn since the day they met.

During one of their common visits, Allister is dropping off a handful of supplies when an evil scientist drops named Malicious Malachi (an opossum) drops a bomb that was designed to turn all the residents of Maple Town into terrifying blood thirsty monsters. To Malachi's dismay it ends up turning all the residents into lust hungry beasts. During the bombing, Autumn is retrieving items from a secure location in her basement and returns to find that her dear friend Allister has been turned into a lust hungry beast. Autumn ends up successfully locking Allister in the basement after nearly getting taken advantage of and vows to cure him of his affliction permanently.
