

Here is the content warning for Slave brainwashing:

This is conditioning, this is using a mixture of conditioning techniques that will really hammer home a level of brainwashing that you might not have experienced before. Please be careful and use at your own risk.

This file will train you to become a slave for me. A slave is someone who obeys without thought or question and submits completely, and you are that for me. When your slave mode is triggered by myself (or people you trust) you will slip back into slave mode. It includes saying a phrase and as your mind empties out you will strip bare and get into your place, on your knees.

It is a real slow, gentle approach to brainwashing but make no mistake, while the vocal is gentle the themes are harsh and very D/s focused. You will have mantras invade your mind and break you down slowly over the half hour. This is gender neutral and while not sexually aimed, it could cause some feelings.

Also there is a post hypnotic suggestion that you will message me back/comment on the file to show you the brainwashing is complete. When you awaken you will forget the entire experience until you see that message/comment and realise just how deeply into slave mode you were.

ENJOY!
