**When a daughter comes home,
she is immediately summoned to her father's room.
I have an image that most 6th grade girls don't like their fathers,
but this father and daughter must be very close.**

No... this is a natural thing in the future Japan.
In today's Japan, where incest was considered a problem,
it is unthinkable.
In the future Japan, where it has been determined that
there are no scientific disadvantages, incest is encouraged.
Therefore, about 80% of girls have sex with their fathers before
they start school (according to the Cabinet Office).

I want Daddy to hold Inori's beautiful body.

As a result...it is no longer unusual for a child to give birth while in school. Polygamy, polyandry, and polyandry are now permitted, and the husbands of wives, daughters, and grandchildren are all the same man. There are more and more cases of girls in the early grades of elementary school being married to multiple adult men.

They were already sweating when they returned from the bathroom, to their father's room. It was still a hot summer night, but they had turned off the air conditioner. This way, they could feel each other's body temperature, body odor, breath, and even their heartbeats.

Their hot summer night begins...
