

A.I. just isn't going to cut it...everytime I upload a new BOT it just spasms and shuts down! I have a plan but need a little help...GINA!

Hey, I needs some help.
I know we have had problems:
you designed the hardware and
I did the software...but I need
to mindhack into her system
to get everything to work!

Whoa, you want to
mind hack her! Thats an A.I.
bot....its literally ILLEGAL to
put a real mind into a android.
What would that prove?

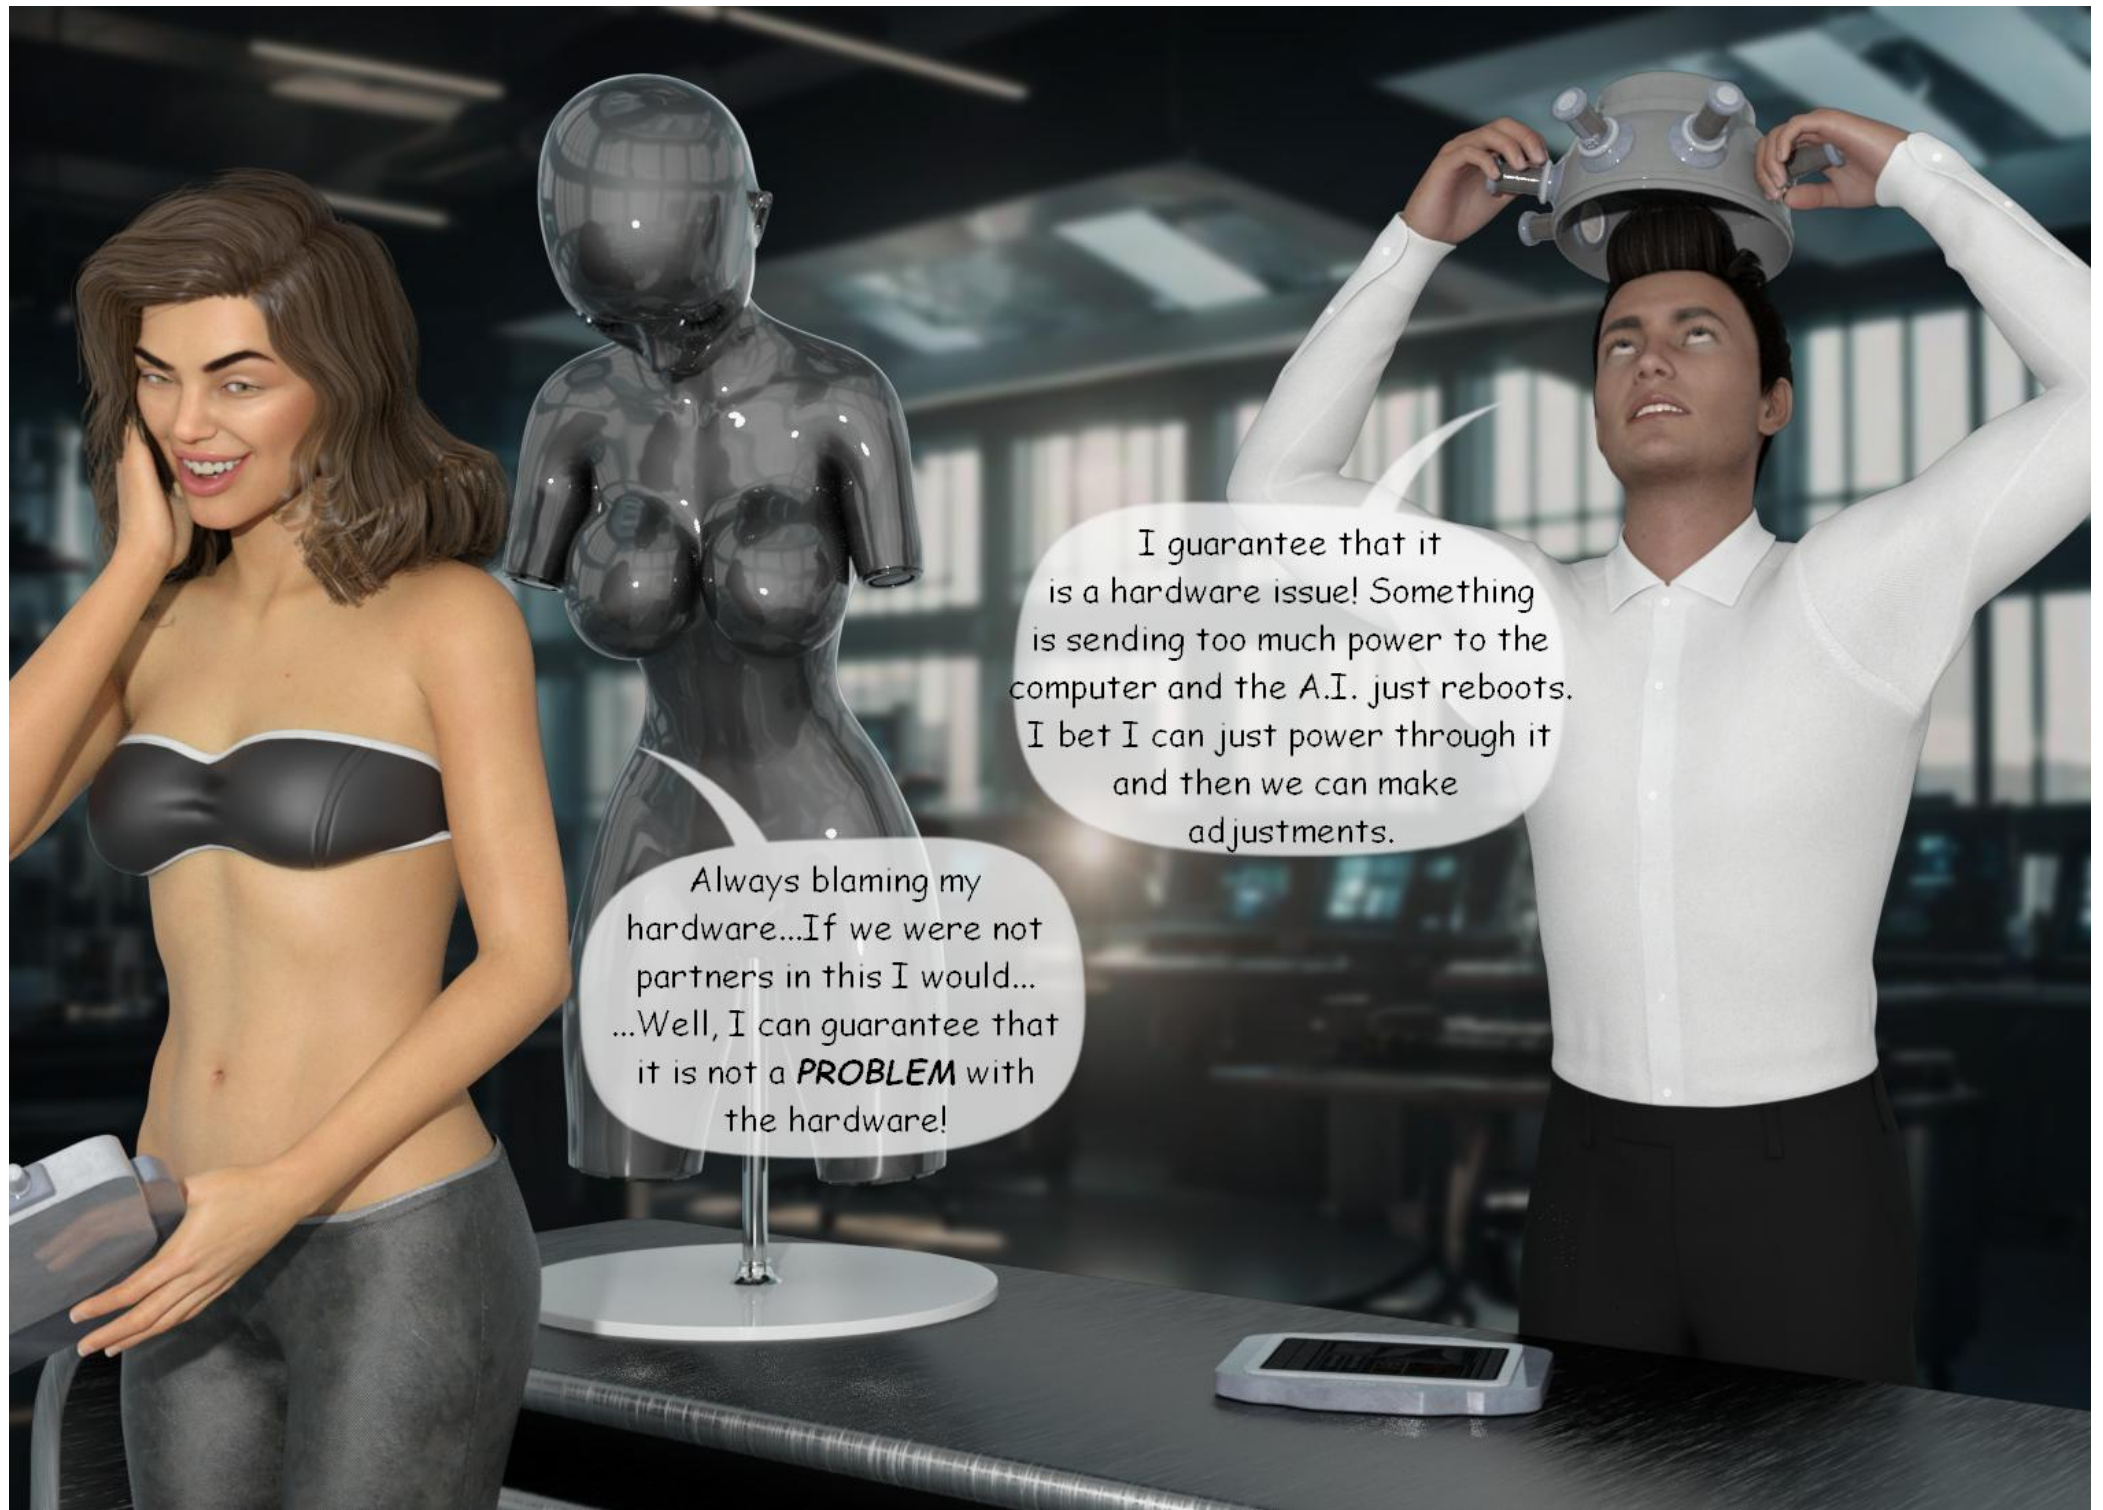

I just need five minutes in there...something is causing an overload and frying the BOTS. If I can figure that out we can have this fixed and start production today!

Hmm, makes sense! I have my own theories. Well, Ok...once we get it to work once we can just copy and paste the consciousness to the assembly line!

You have the easy job!
just hit the abort button when
I tell you to...I'd do it myself but
you didn't give the prototype any
arms. A Maidbot without any
limbs always seemed a little
useless...GINA!

Easy peasy...I will pull
you out of the ...**Maidbot**...
when you tell me to. And I
assure you, her form will be
perfect before she rolls
off the assembly line!

Always blaming my hardware...If we were not partners in this I would...
...Well, I can guarantee that it is not a **PROBLEM** with the hardware!

I guarantee that it is a hardware issue! Something is sending too much power to the computer and the A.I. just reboots. I bet I can just power through it and then we can make adjustments.

Whoa, Trippy!
I am like...in two places
at once...my body is getting
numb and the maids body
is getting...TINGLY!

I think you got this...
your almost completely
mind hacked into her...just
keep it up...Partner! I get
you find my faulty work
in no time!

A woman with long brown hair, wearing a grey bra and leggings, stands in a futuristic laboratory. She is looking at a transparent, grey, female mannequin on a stand. The mannequin has a realistic human form but is made of a clear, reflective material. To the right, a man in a white shirt is wearing a grey helmet with several sensors or tubes attached to it. He is looking down at a tablet on a table. The background shows a modern, high-tech environment with large windows and various pieces of equipment.

Wow, is that the first time you have praised my hardware? It should feel real...that's the most advanced biomechanical body ever built...its ***HYPER-REAL!***

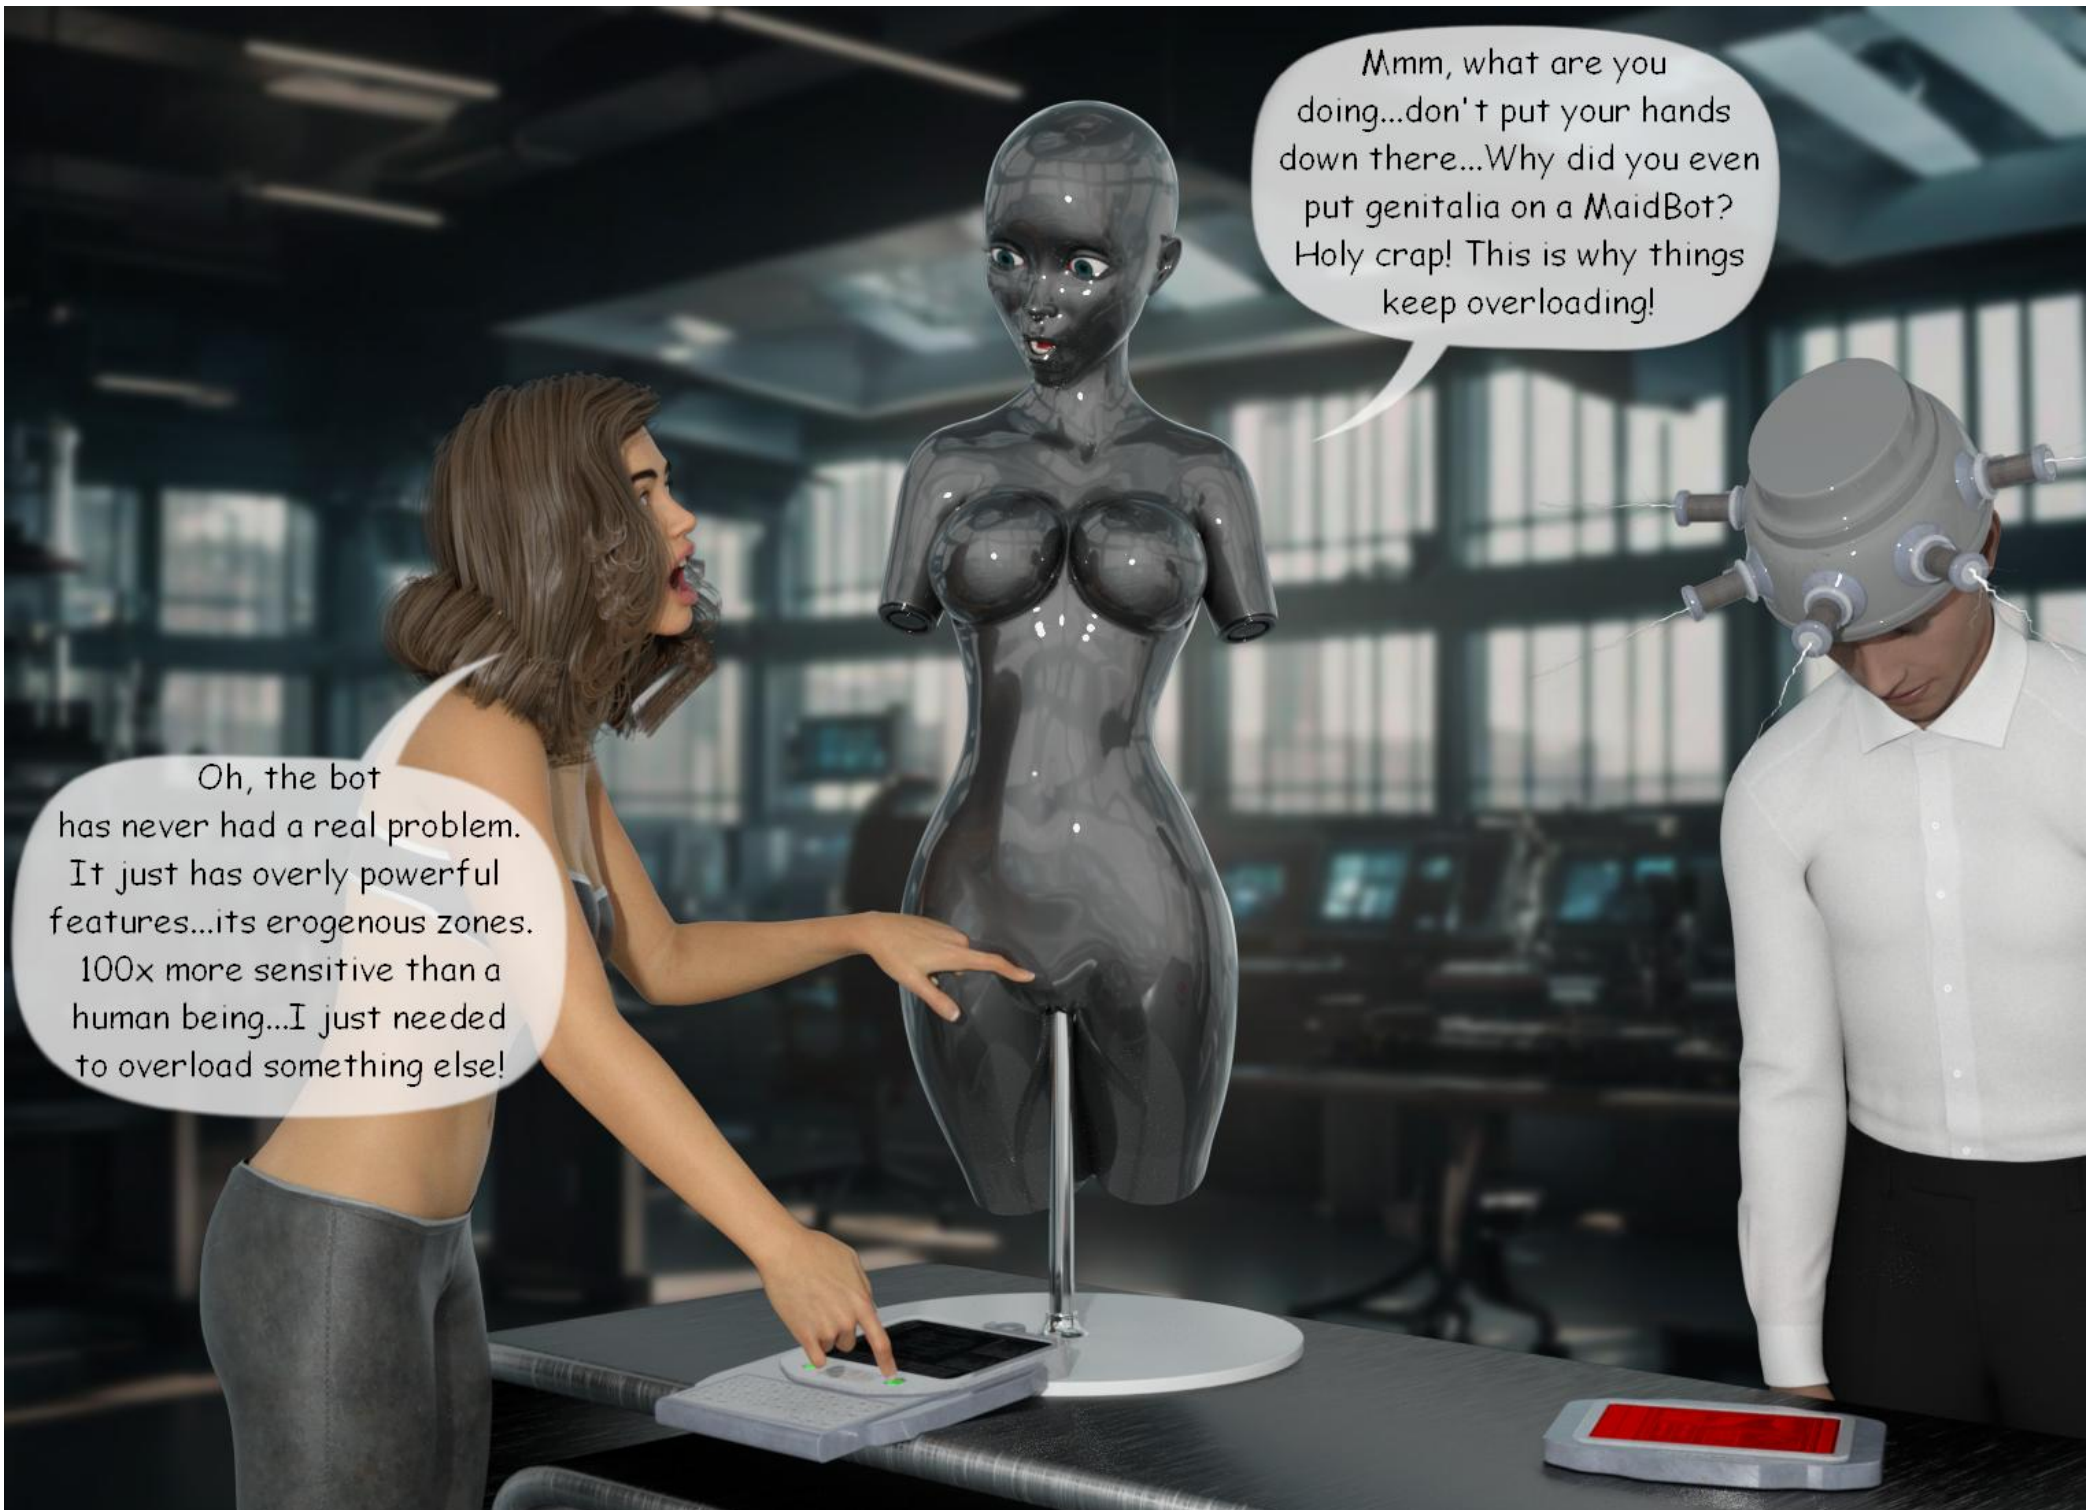

Wow, this is really an out of body experience... it feels literally real! A lot different from mind hacking into a website!

Like I said...
It feels HYPER-REAL!
This body has the equivalent
of 10x the nerve endings a
human body has...its spine
is 30% thicker to deal
with the signals!

Well, everything seems
normal to me so far...no
obvious points of overload!
Feeling limbless is a really
freaky feeling....Uh, whoa.
your touch is...powerful!

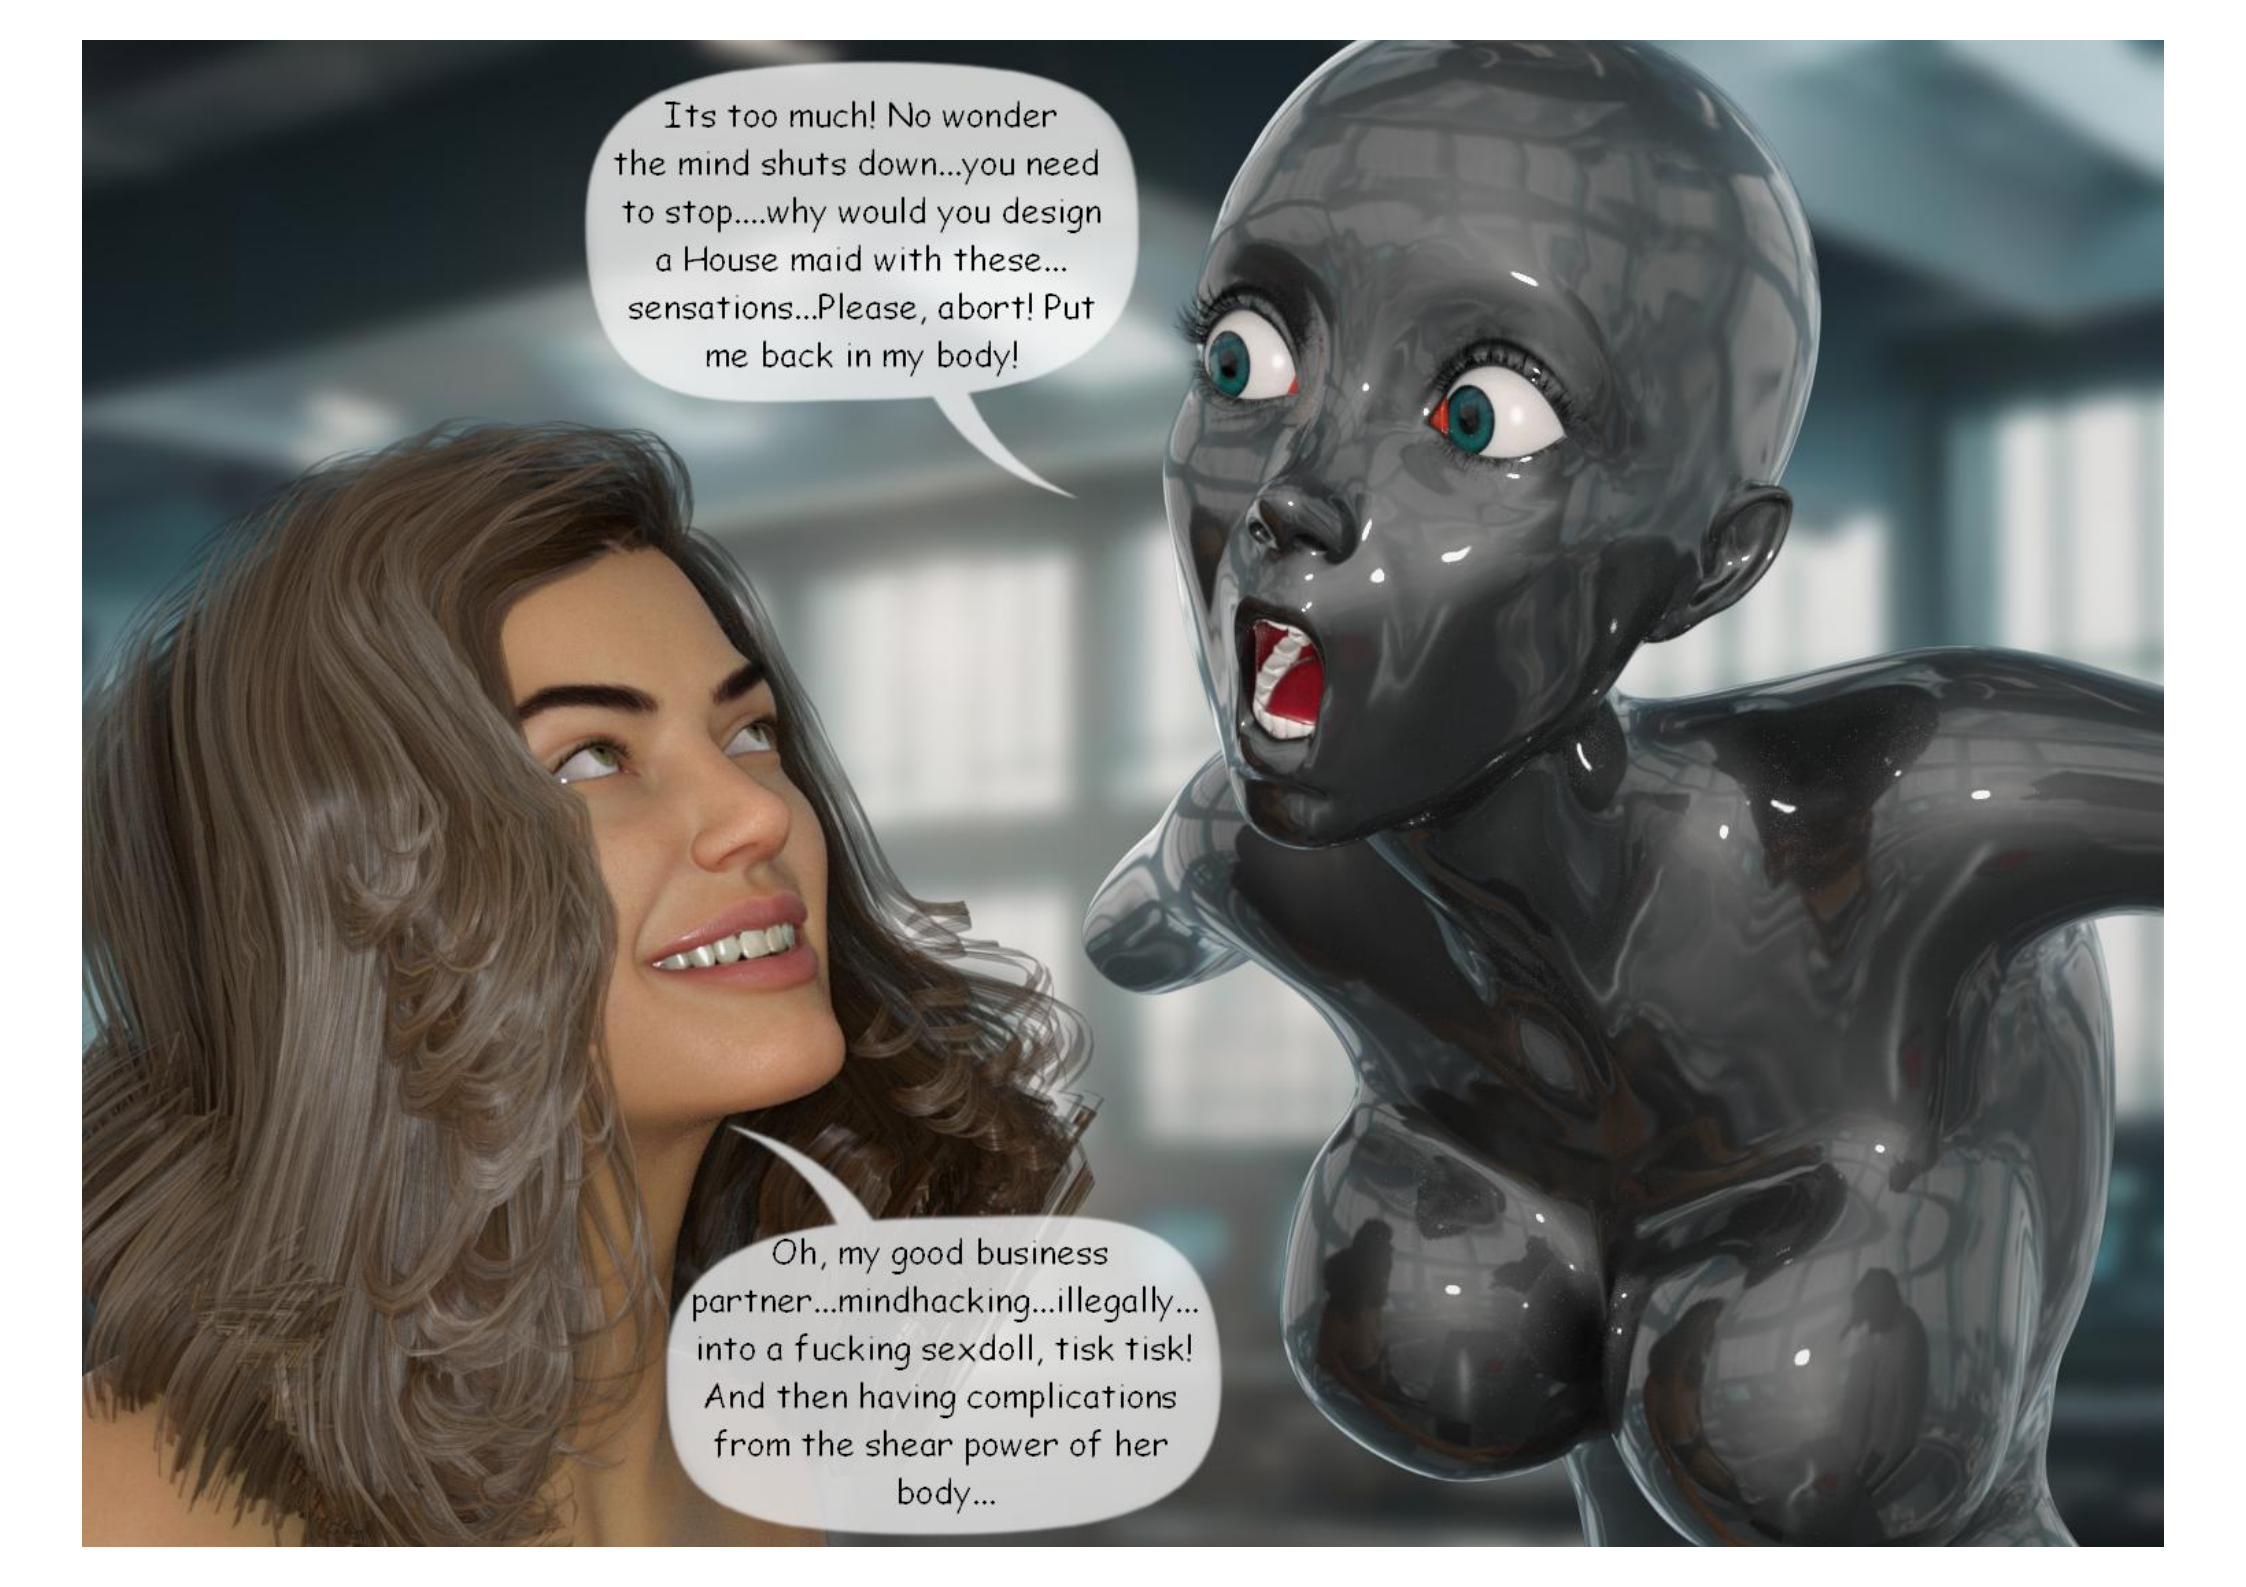

Mmm, what are you doing...don't put your hands down there...Why did you even put genitalia on a MaidBot? Holy crap! This is why things keep overloading!

Oh, the bot has never had a real problem. It just has overly powerful features...its erogenous zones. 100x more sensitive than a human being...I just needed to overload something else!

UNNGH! What do you mean overload something else....Ok, Abort...Abort... get me out of this thing right now! Hey, you said that you would...Grrr. What the heck are you doing!

I am especially proud of this right here...your clit. its literally super powered...I wish I could feel the brainmelting wave of energy coursing through you right NOW!

Its too much! No wonder the mind shuts down...you need to stop....why would you design a House maid with these... sensations...Please, abort! Put me back in my body!

Oh, my good business partner...mindhacking...illegally... into a fucking sexdoll, tisk tisk! And then having complications from the sheer power of her body...

Don't touch me down there!
I can't think straight, whoa, that
feels fantastic...unngh. God, do
it put it in me. Its inflating like a
little waterballoon. Brain...over-
loading...thinking...Uhhh!

And this right here is
why your software keeps failing.
Good thing its adaptive...I routed
this through your human brain...so,
it should take the brunt of the
shock...your computer brain
will then adapt!

Just let it happen...you know that you want it to happen...I know its building up!

Oh my god, rub me off! Just the one, I can't live without it... Then put me back into my body!

UNNNGH!
AHHHHHHHHH!
I'm CUMMMMMING!
AHHHHHHHH!

Just as I planned!
Your Gynoid sexdoll
mind survived, I am not
too sure how you did!

!crash!
POW!

A woman with long brown hair, wearing a black strapless top and black leggings, stands on the left, laughing heartily. In the center, a sleek, metallic, female humanoid sexbot stands on a white table. The sexbot has a smooth, reflective surface and is looking towards the woman. On the table in front of the sexbot is a smartphone and a control panel with several buttons. To the right of the sexbot, a man in a white shirt is lying face down on the table, appearing unconscious. In the background, there is a factory or workshop setting with large windows and various pieces of machinery.

Looks like a
random pervert had
a stroke while hacking
into his sexbot!
HAHAHAHA!

Oh no, this can't
be happening...whats
happened to my body.
I passed out from
the orgasm!

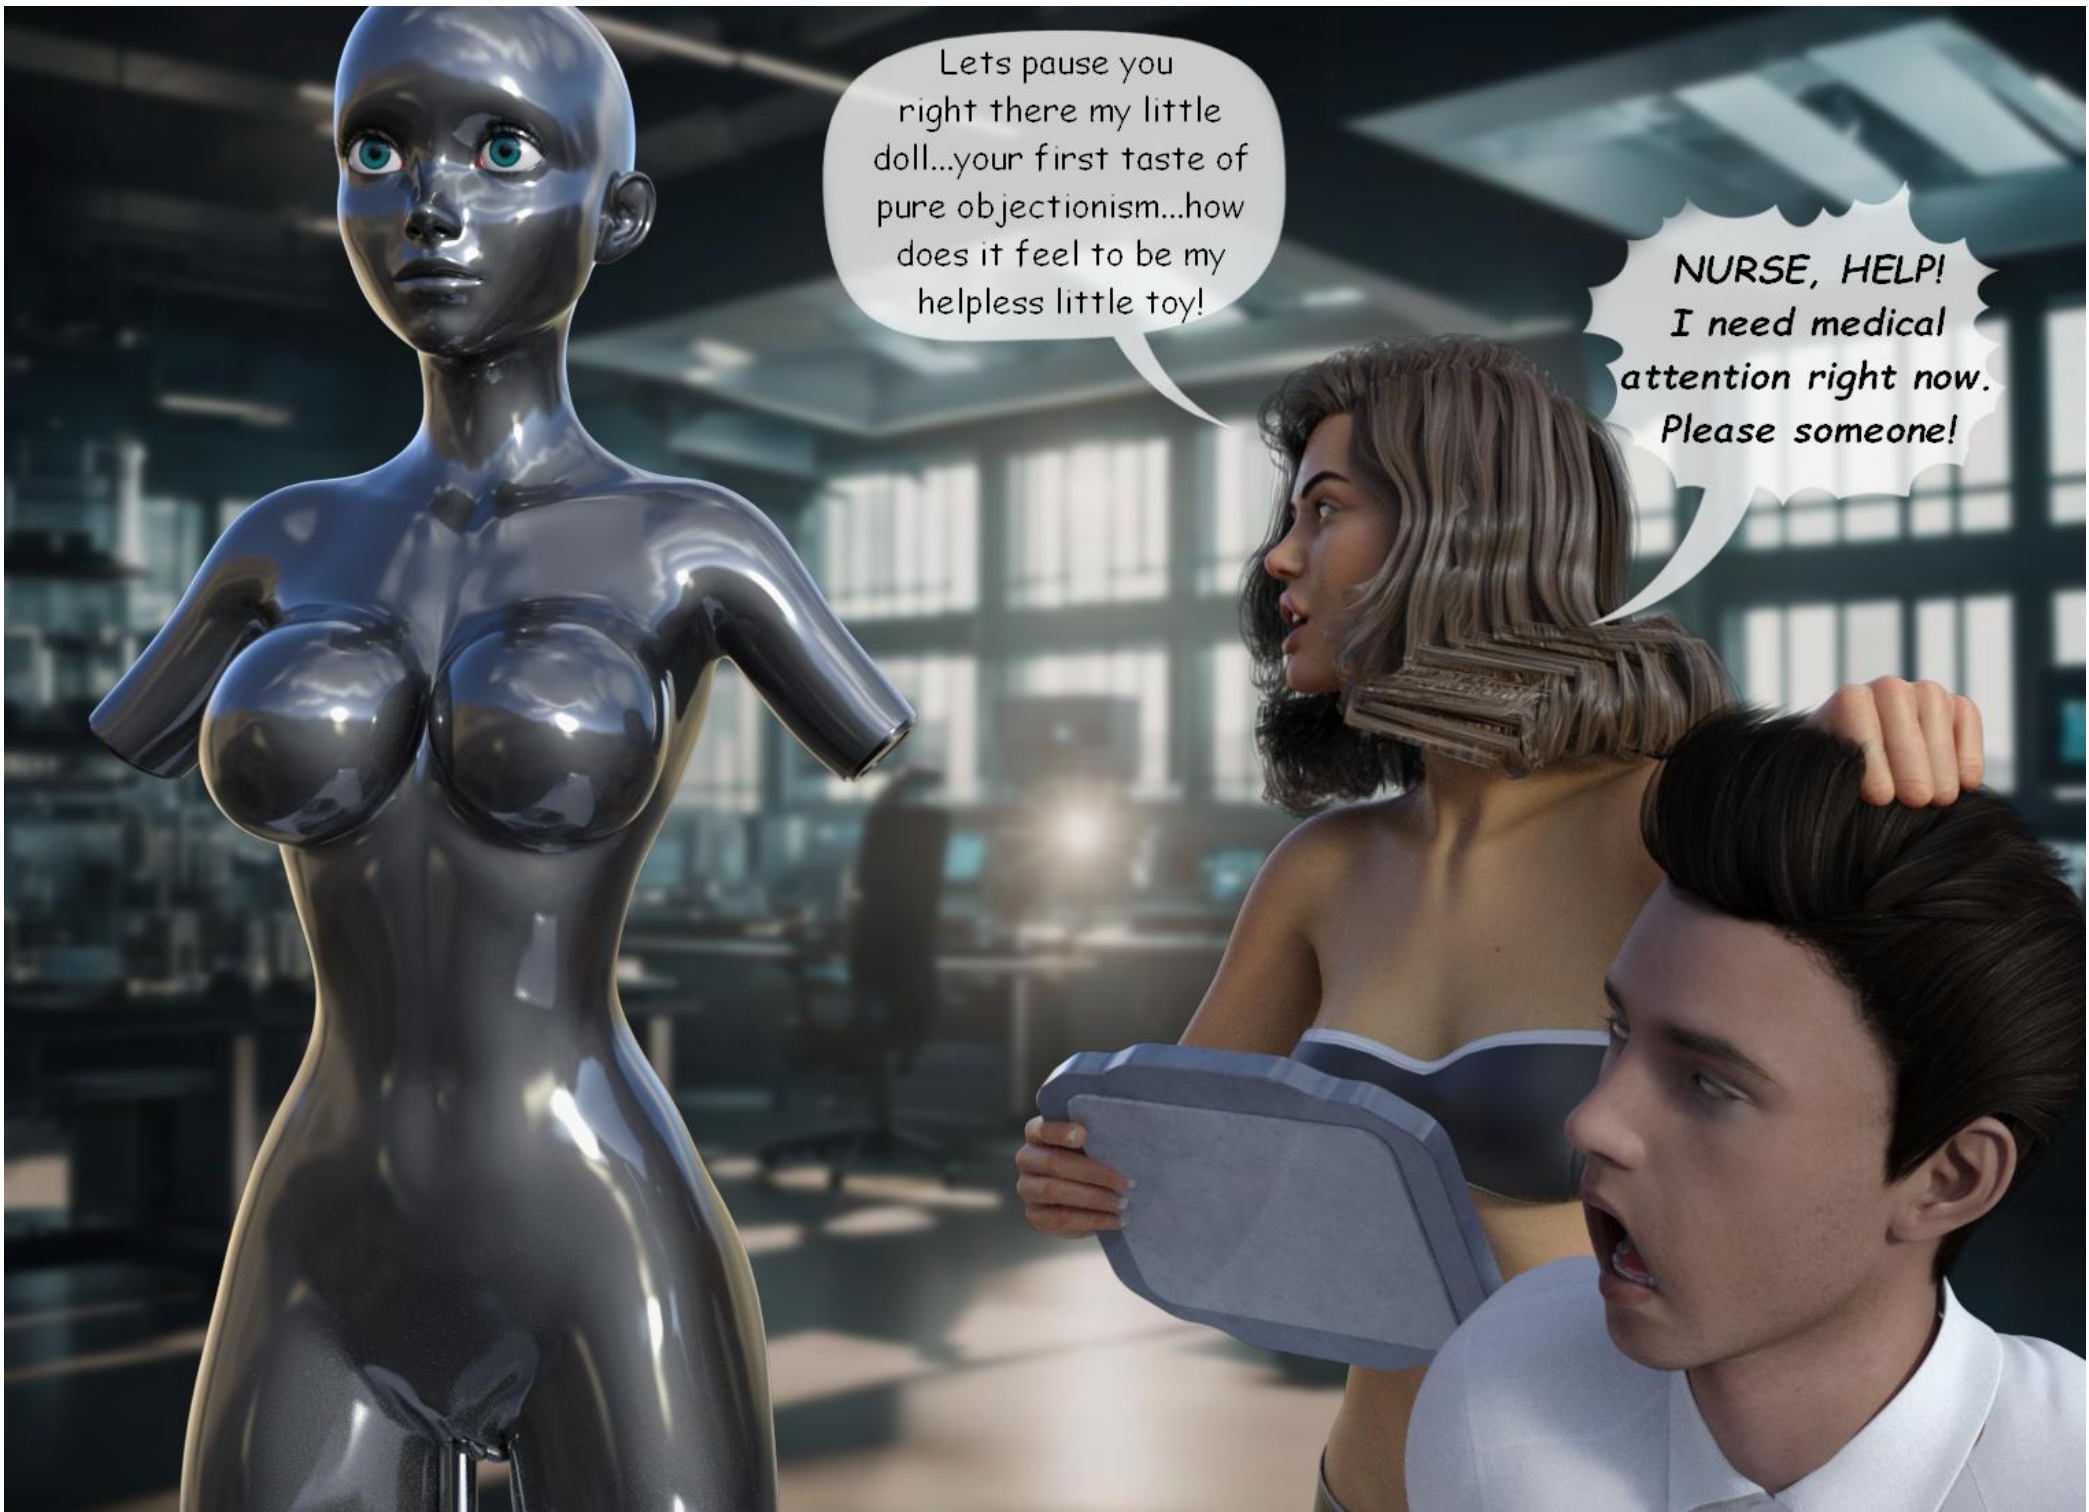

I am not a random
pervert I am your
partner in this business,
you need me for this!

You were my partner...
now you are a vegetable.
And I do need you....in
there powering my
sexdoll empire!

What do you mean vegetable...I am a man dammit...get...get...get me out of here...whats wrong with me!

Yeah, the doctors might still be able to get you back into your body...if they knew you were in the doll!

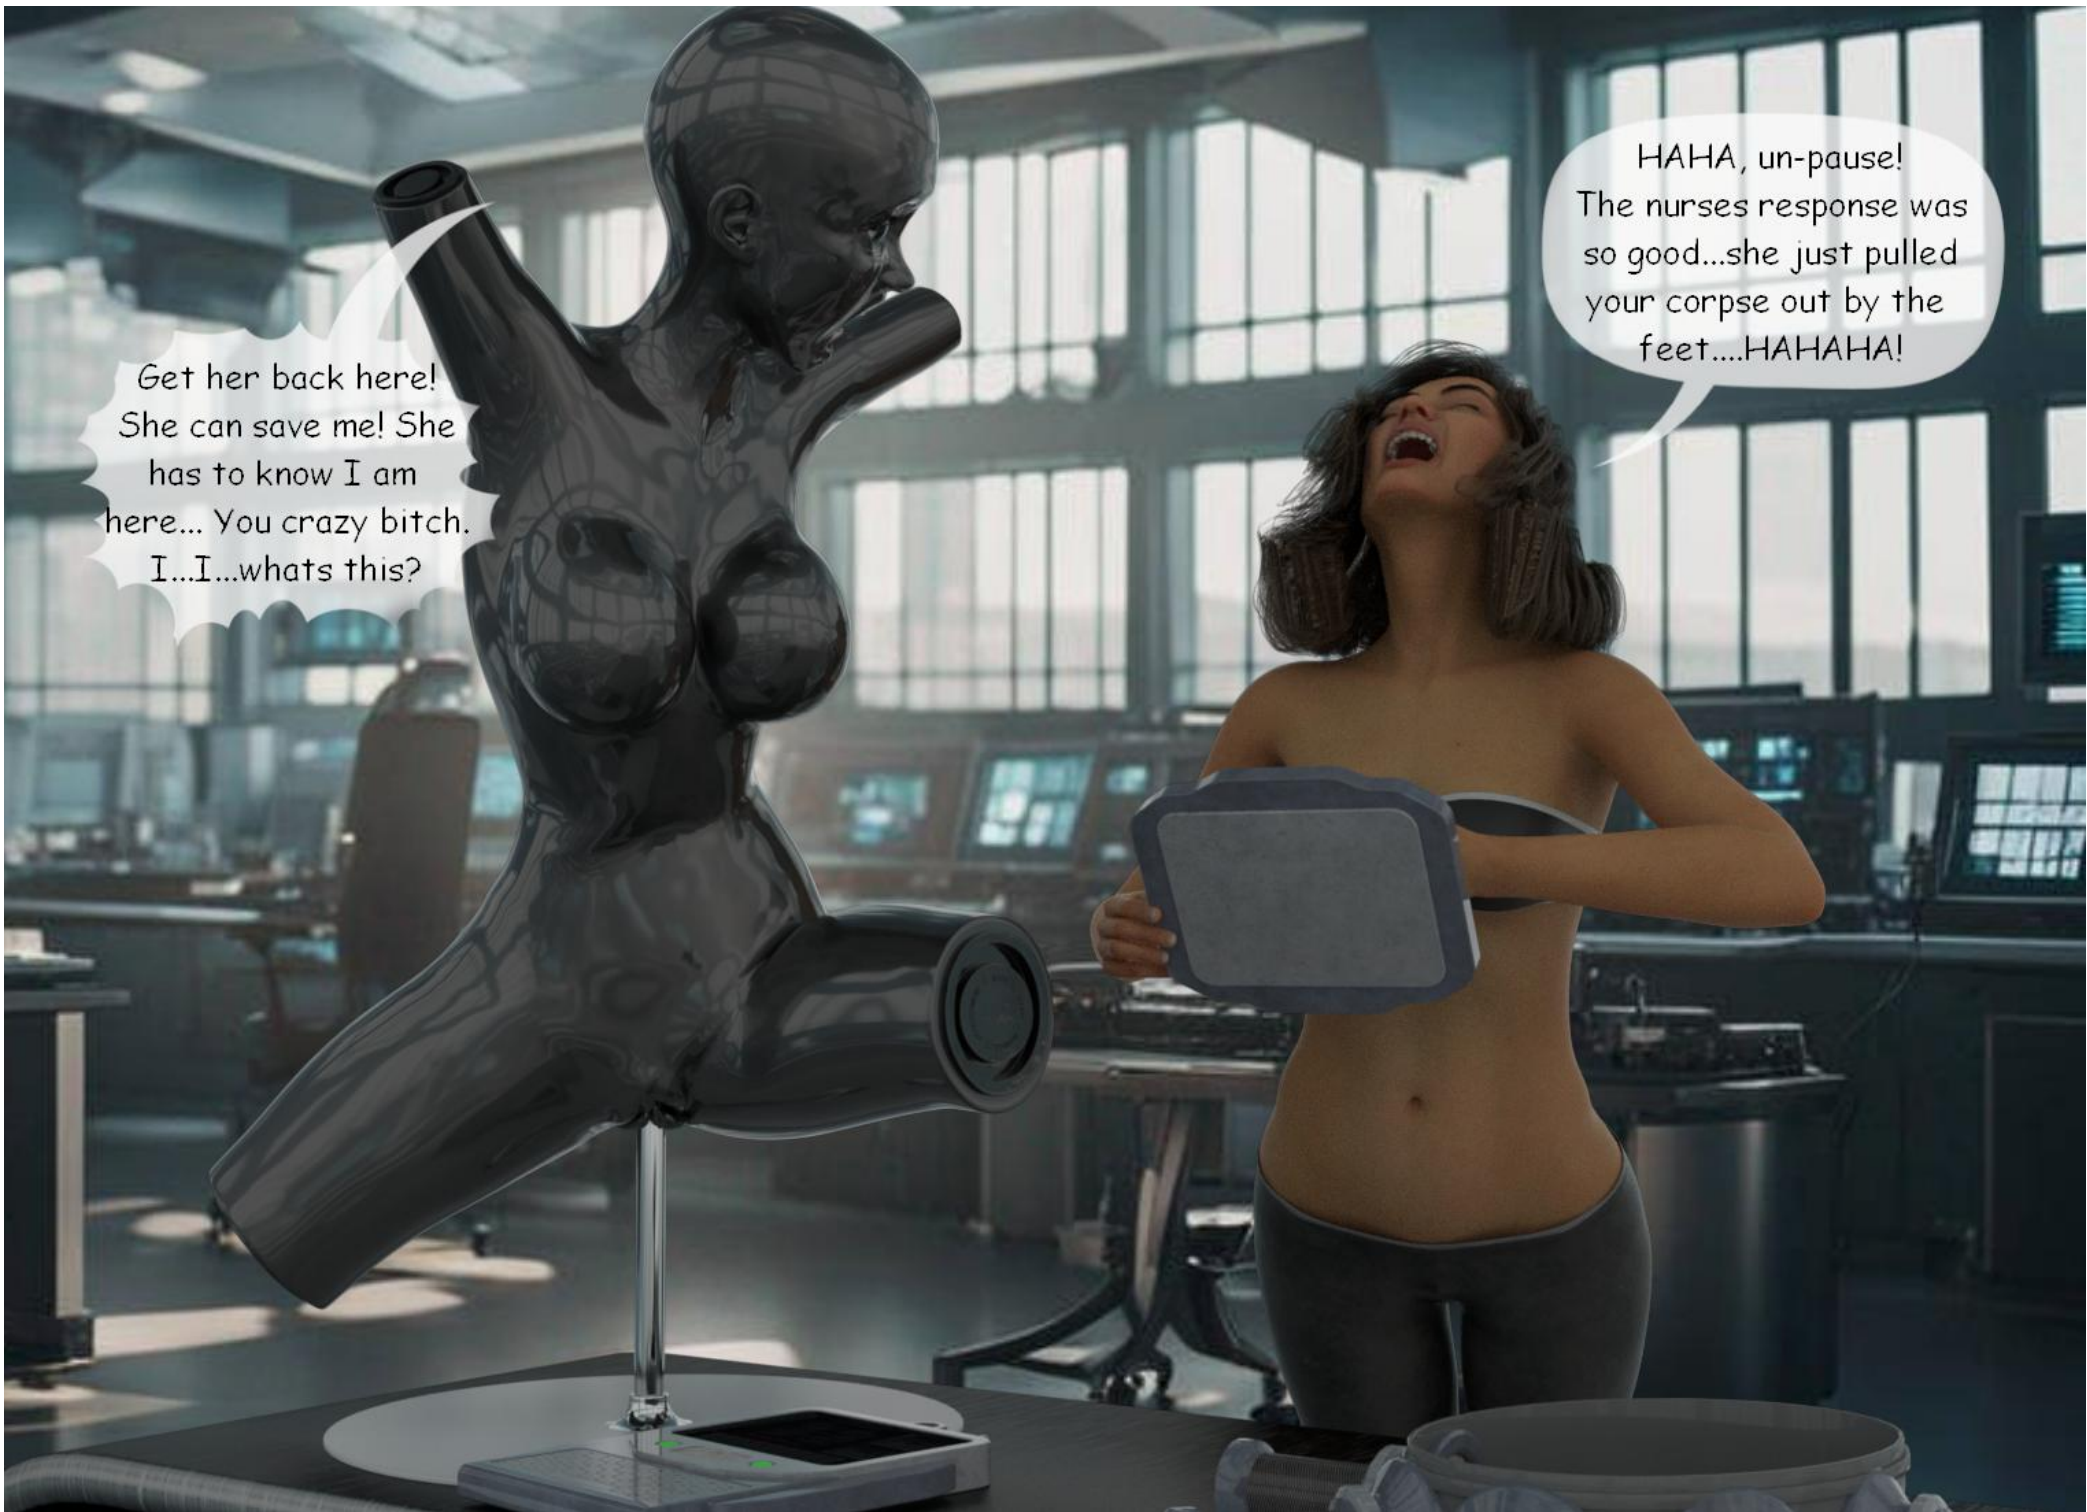

Lets pause you
right there my little
doll...your first taste of
pure objectionism...how
does it feel to be my
helpless little toy!

NURSE, HELP!
*I need medical
attention right now.
Please someone!*

It looks like the dumbass lobotomized himself mind hacking the sexdoll...weirdo doesn't deserve a gurney. The vegetable will be at hospital!

.....

OH NO, how could this happen. Its so horrible! Thank you nurse!

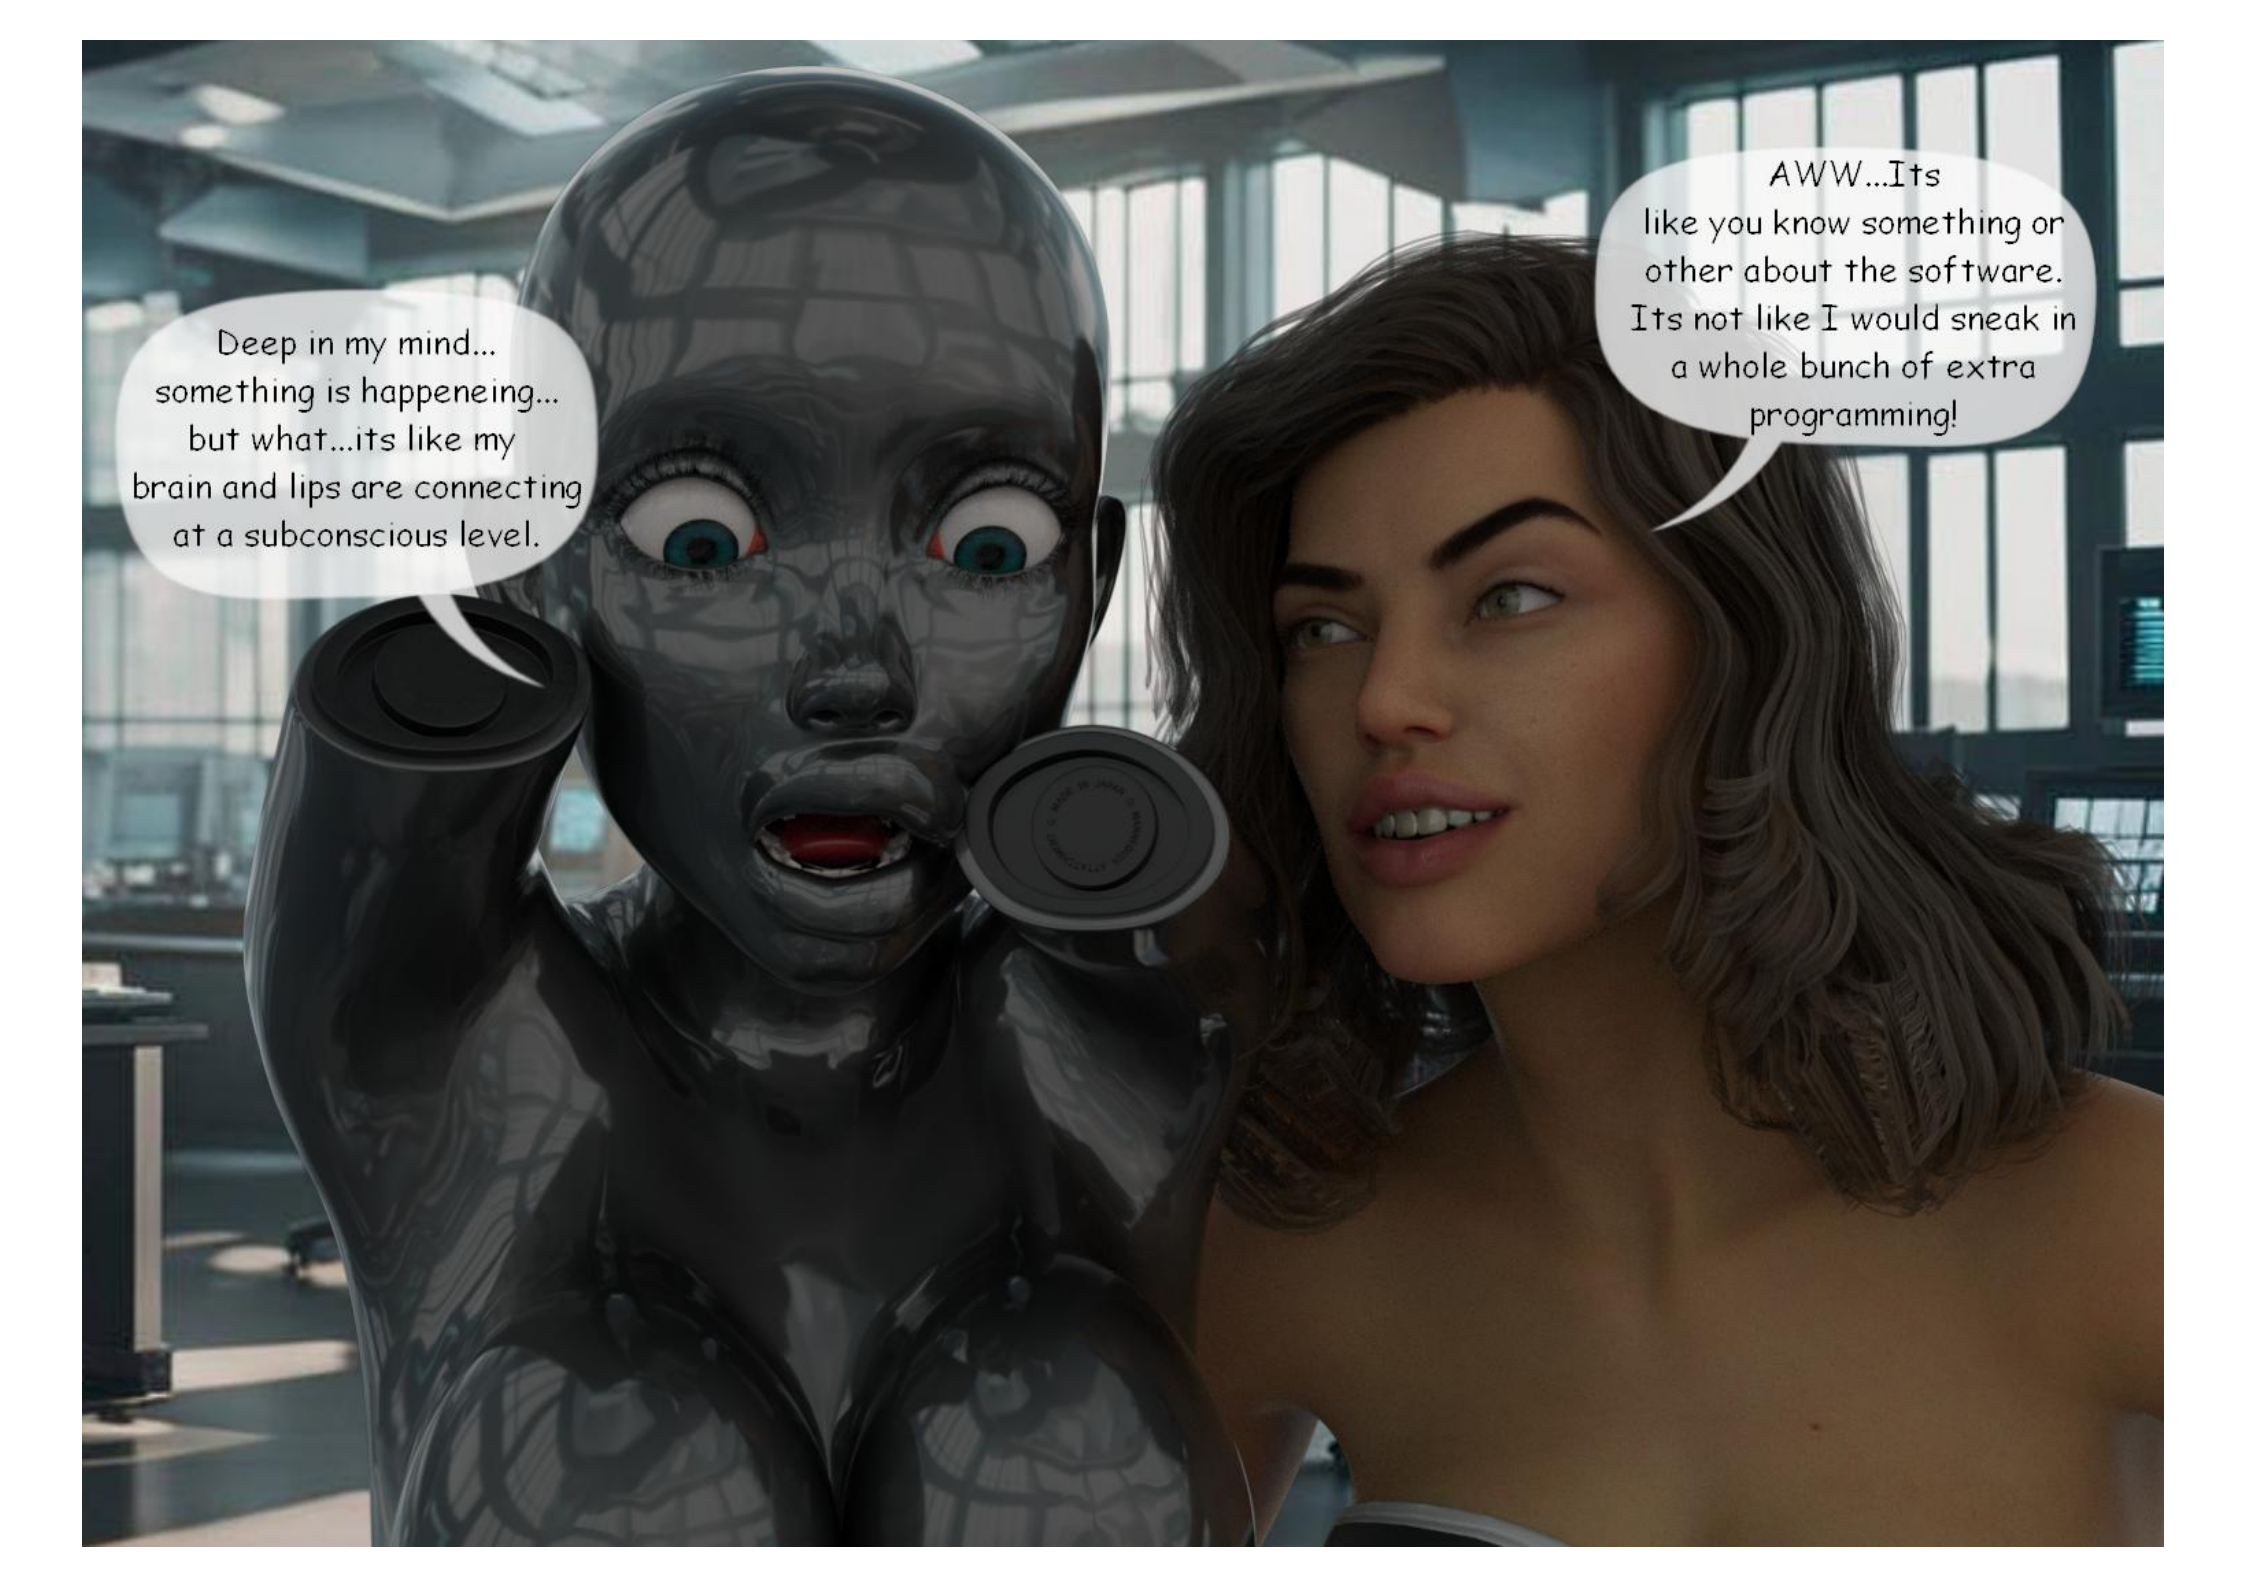

Get her back here!
She can save me! She
has to know I am
here... You crazy bitch.
I...I...whats this?

HAHA, un-pause!
The nurses response was
so good...she just pulled
your corpse out by the
feet....HAHAHA!

Why are my lips...
swelling up so much...My
whole mouth feels...like...
its inflating...it feels
unnatural...my brain
feels them!

I told you before...
my hardware will be perfect
before the SEXDOLL hits
the assembly line...now that
I have my doll...its time to
customize you!

Deep in my mind...
something is happening...
but what...its like my
brain and lips are connecting
at a subconscious level.

AWW...Its
like you know something or
other about the software.
Its not like I would sneak in
a whole bunch of extra
programming!

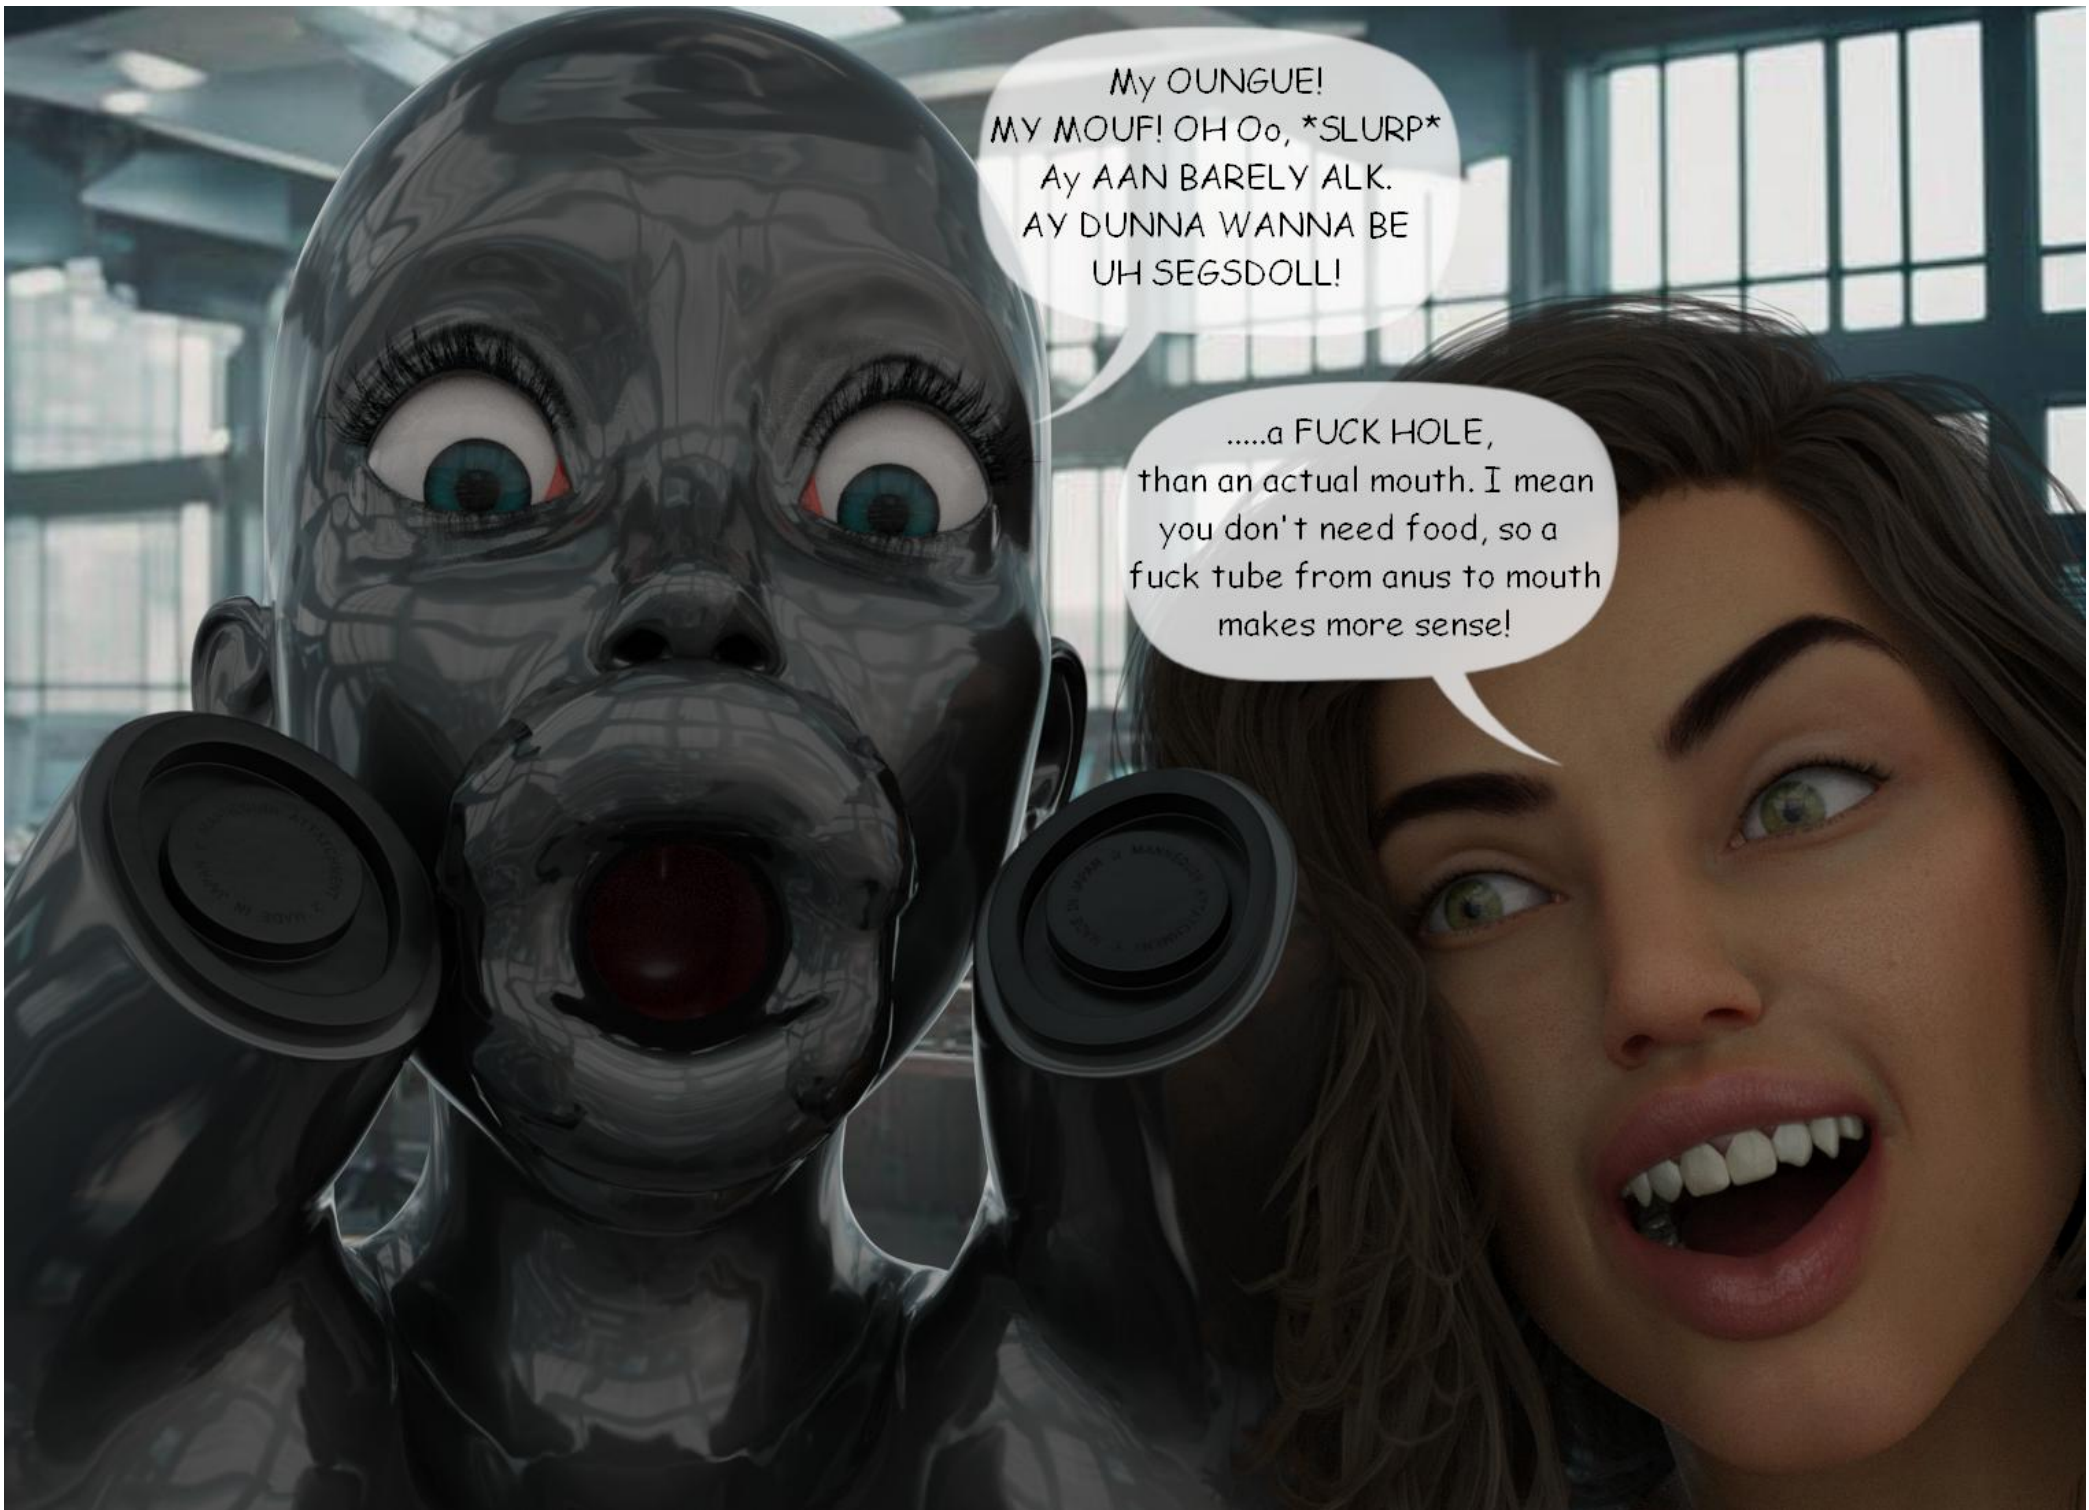

These lips look huge!
Why would anyone want...
gulp...want such huge lips!
Why are you giving me such
huge lips...

They are called,
DSL in the industry. Or
better known as Dick Sucking
Lips...yours are going to be
a little more extreme
than most!

I can't close them...
...gluk... my throat and lips
are connecting....my teeth...
my tongue...shrinking and
dissolving.

Yeah! and unlike a
human mouth...yours is
erogenous enough that your
lips can cause an orgasm all
on their own...Well, its more
of a FUCK HOLE....

My OUNGUE!
MY MOUF! OH Oo, *SLURP*
Ay AAN BARELY ALK.
AY DUNNA WANNA BE
UH SEGSDOLL!

.....a FUCK HOLE,
than an actual mouth. I mean
you don't need food, so a
fuck tube from anus to mouth
makes more sense!

UH...UNNGH
UNNNGH *SLURP*
MMMMMMMMMMMMMM!
AAAAHHHHHHHHHHH!
GLUK!

I can't wait for the
fuckhole ribs to come in...
Pleasure for both you and
your partners...The best part
is the programming in the
back of your mind!

Uhh.MMM.
UNNN. GUUUUH
.....
!!!!UNNNGH!!!!

That programming
will ensure you suck when
you need to suck, gyrate
when you need to gyrate,
thrust when you need to
thrust...and moan!

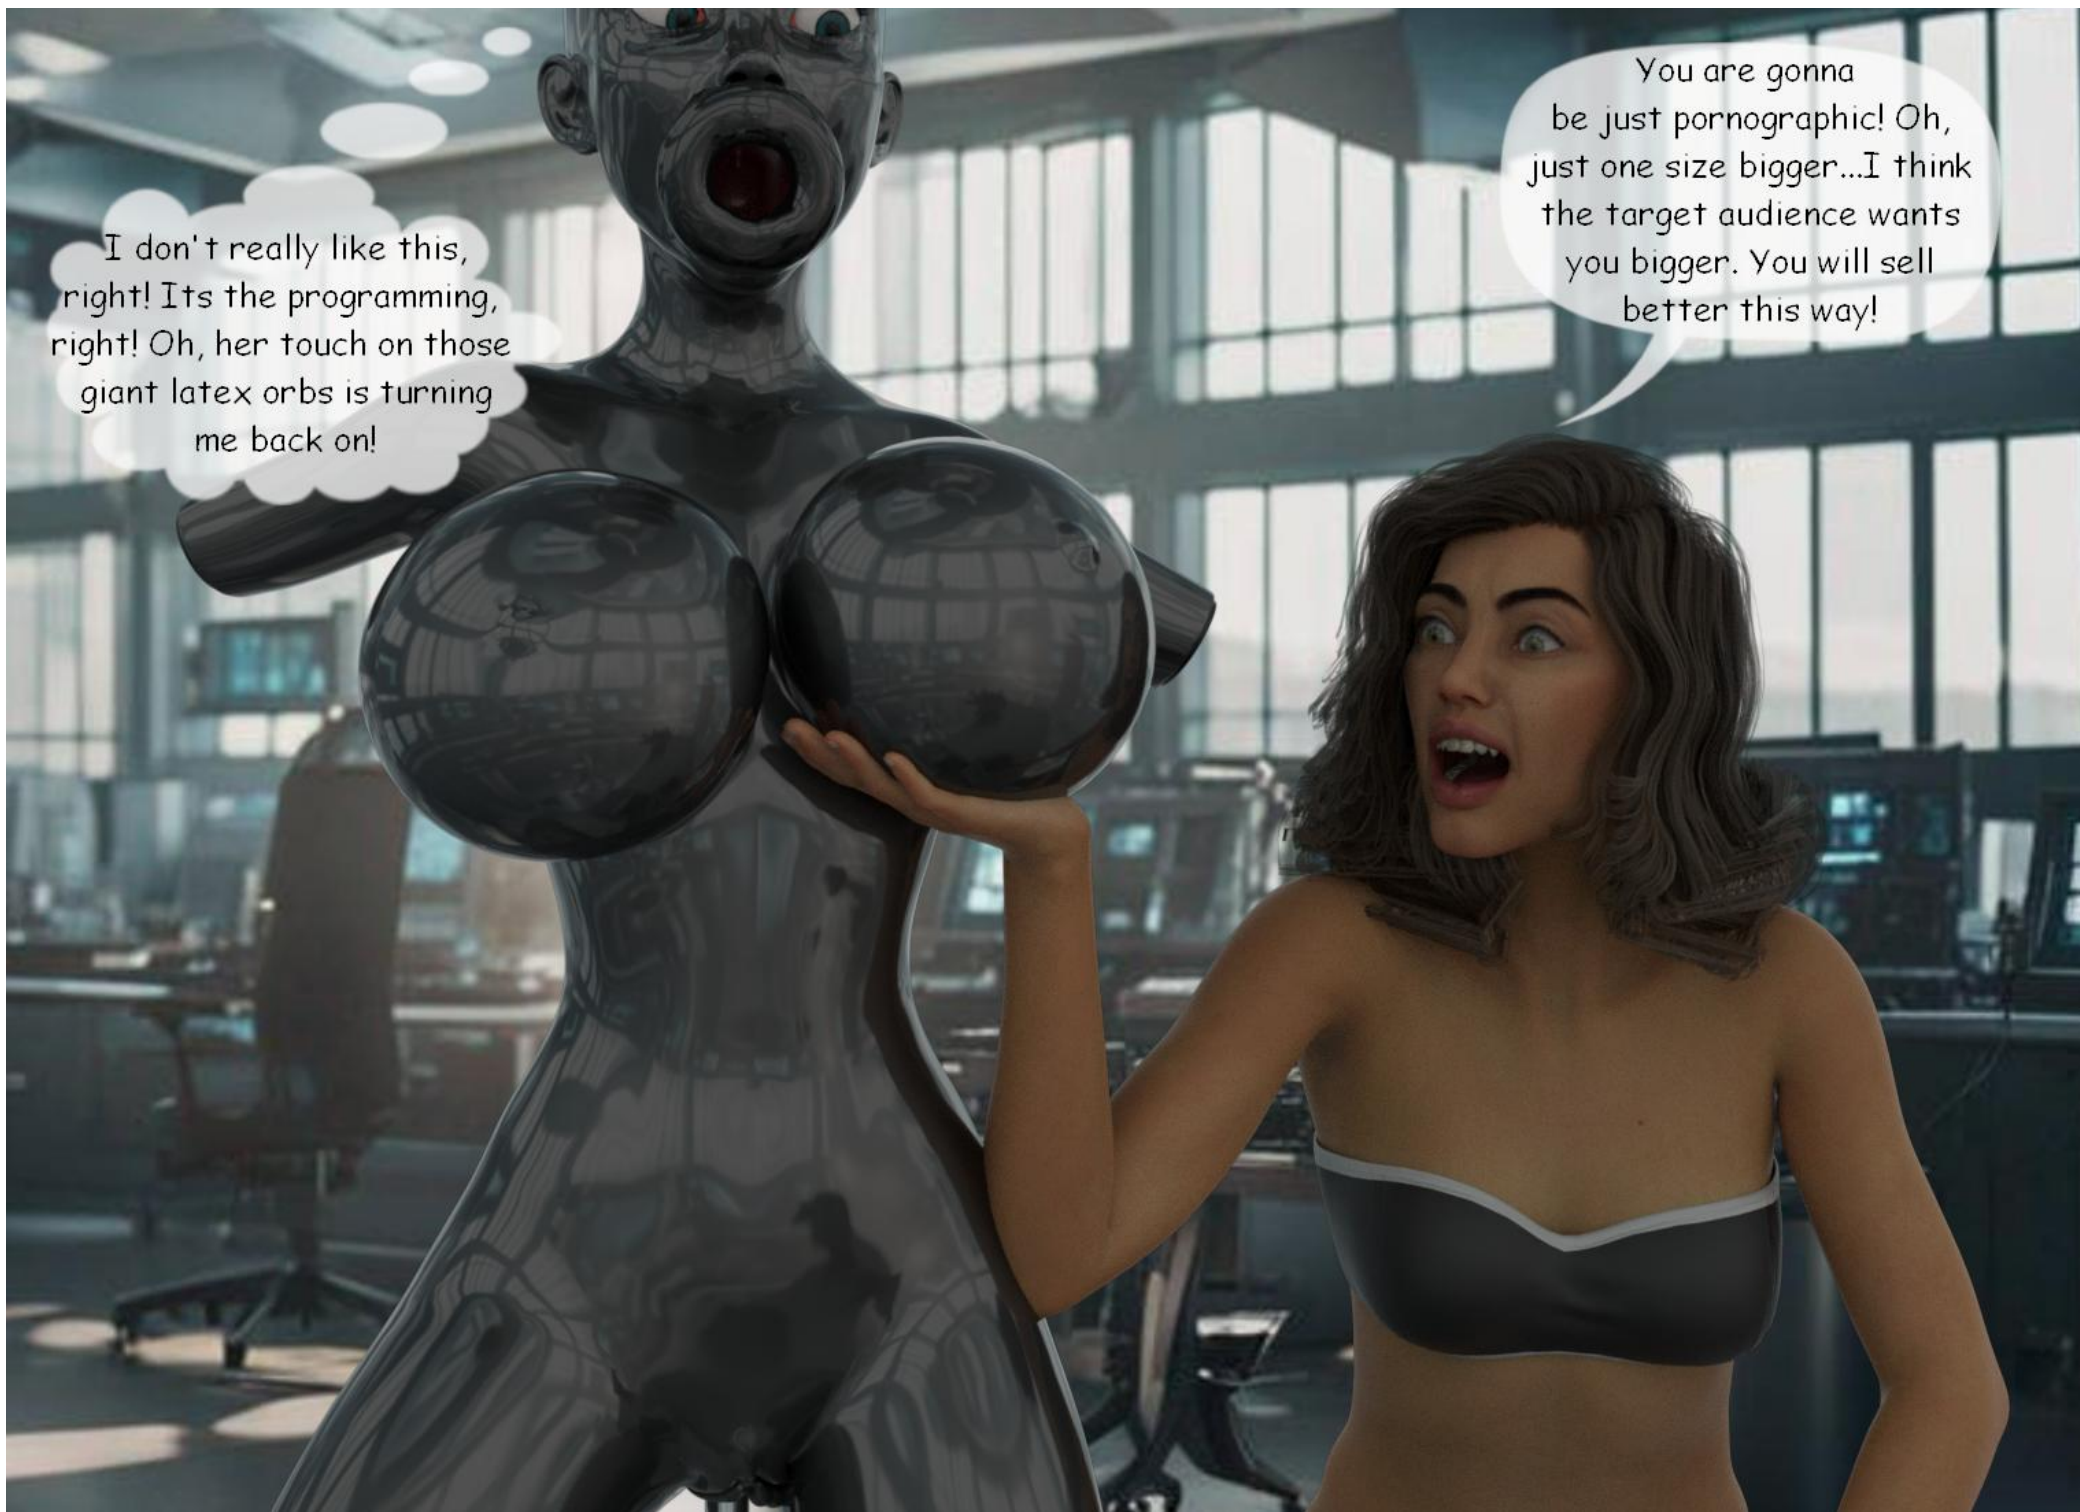

Don't give me giant sexy tits... not yet...god, I need to suck on something!

Well, you were already a pro at the moaning. lets get you some big ole titties. Don't you worry, they will be much bigger and more sensitive than you can handle!

What, don't you dare take me away from this...I...wait....what did I just think? Do I...
LIKE THIS!

I think I made a mistake...Your sexy body makes me think I should be the one stuck in the sex doll...oh, right...I am gonna be rich and you're gonna be fucked!

I don't really like this, right! Its the programming, right! Oh, her touch on those giant latex orbs is turning me back on!

You are gonna be just pornographic! Oh, just one size bigger...I think the target audience wants you bigger. You will sell better this way!

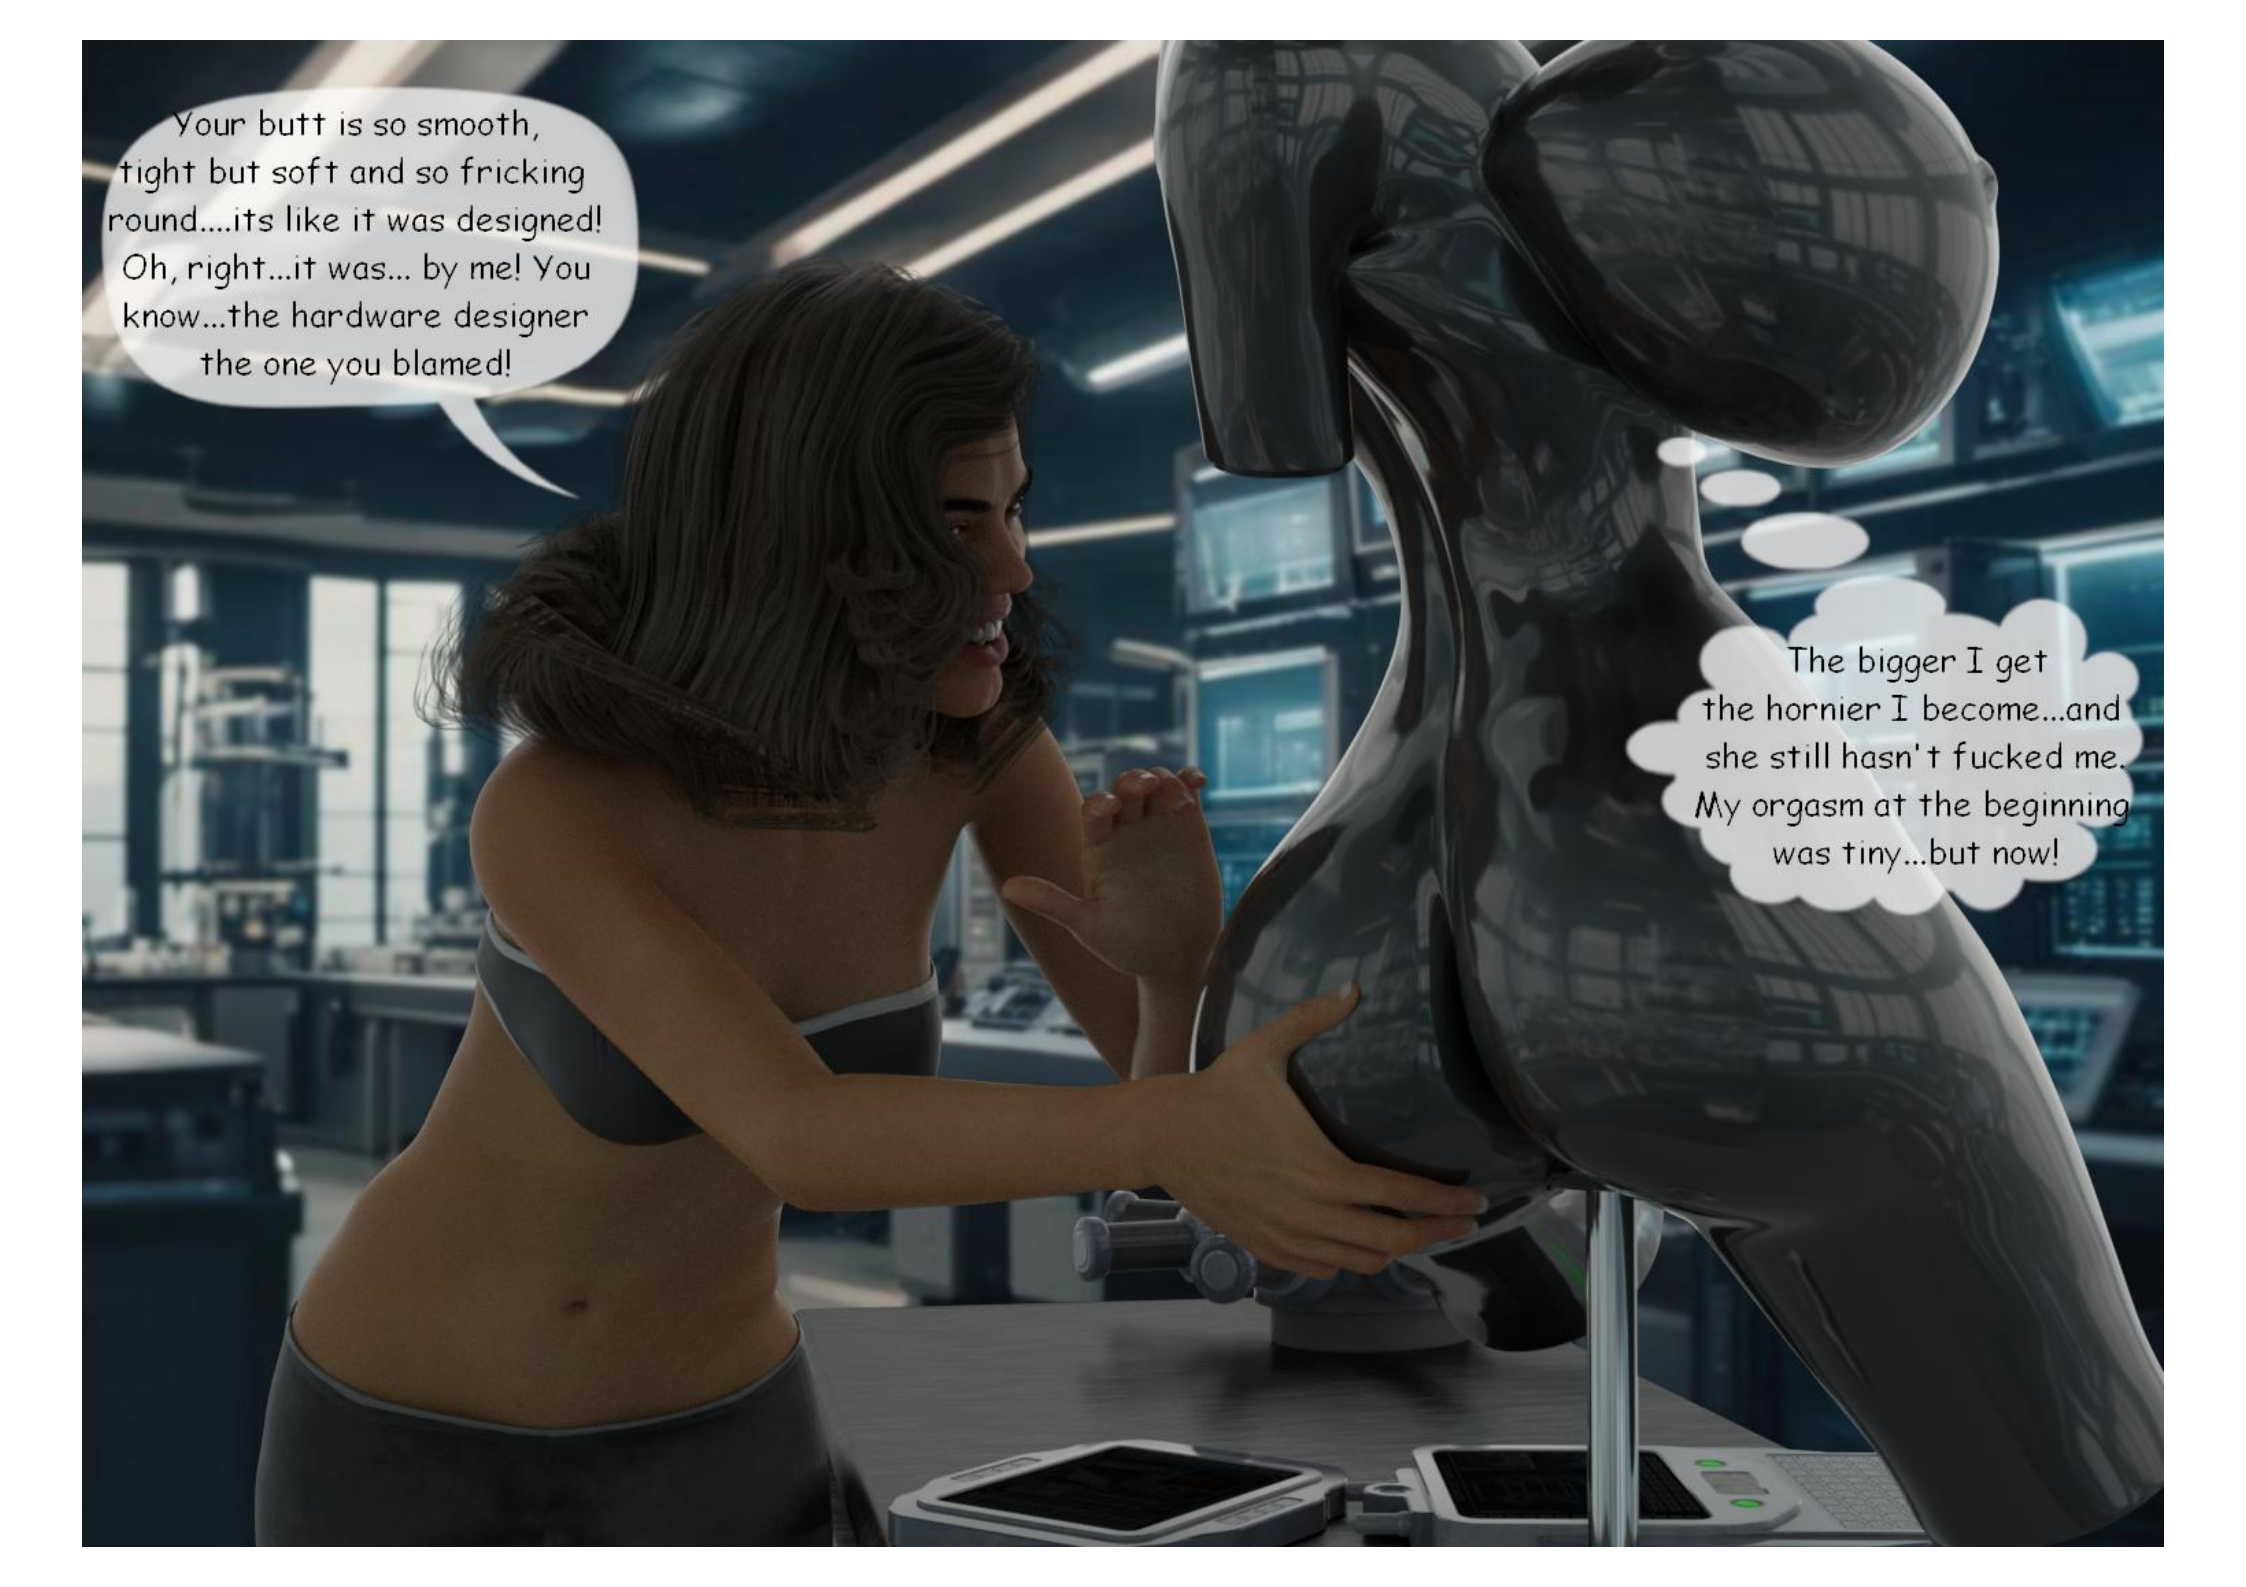

I've never been so excited! Her touch is orgasmic....my libido is pounding, I can feel it in every heartbeat.

I never thought they would feel so good: the doll body produces huge amounts of aphrodisiacs, lubes and hormones...alot is stored in the tits!

A woman with long, wavy brown hair and a black strapless top is standing in a futuristic laboratory. She is looking at a large, shiny, metallic robot torso that is mounted on a stand. The robot torso is highly reflective and has a complex, mechanical appearance. The woman is pointing towards the robot with her right hand. The background shows a control room with multiple computer monitors and a desk with various pieces of equipment.

Wait, this isn't right.
I need to be fighting to get
back to my body! Wait, I
like this body too much to
leave it. Wait....

You are going to
keep expanding until all
this doll goo has nowhere else
to go...you will be leaking this
goop out of all your orifices.
Look, your butt cheeks!

A woman with long brown hair, wearing a black bikini, is in a futuristic laboratory. She is touching the buttocks of a large, dark, metallic humanoid robot. The robot is standing on a table. The background shows various pieces of equipment and screens.

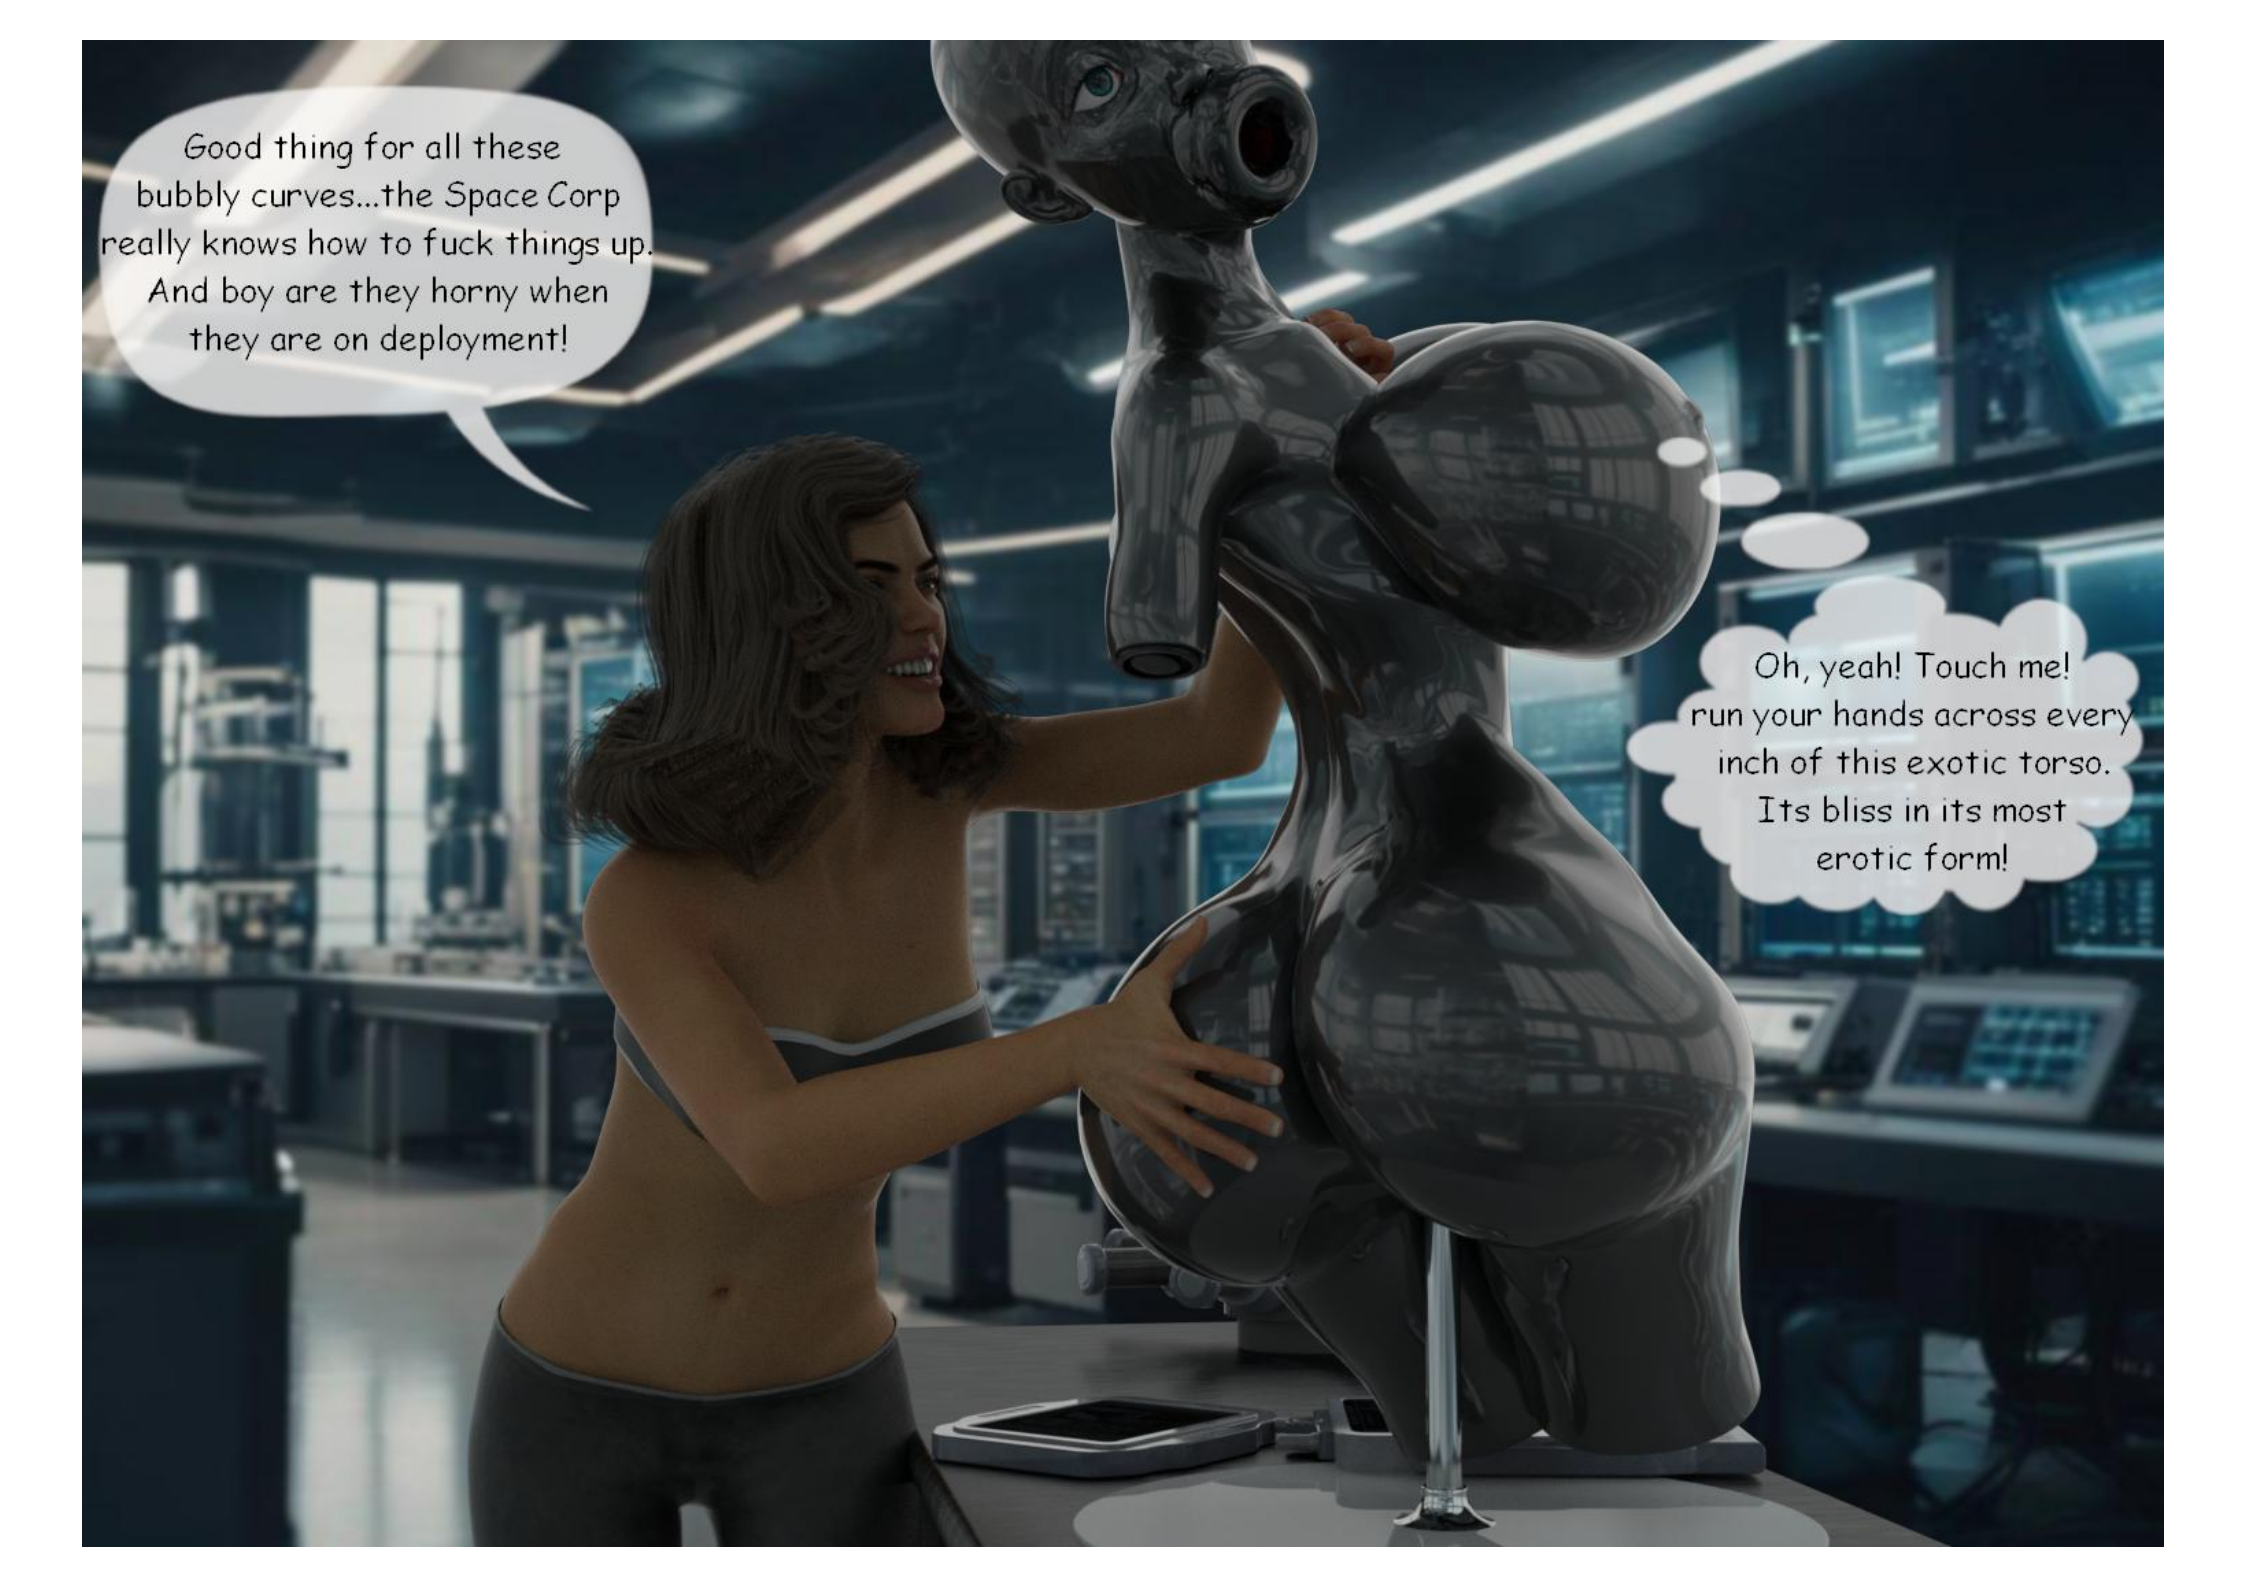

Your butt is so smooth,
tight but soft and so fricking
round...its like it was designed!
Oh, right...it was... by me! You
know...the hardware designer
the one you blamed!

The bigger I get
the hornier I become...and
she still hasn't fucked me.
My orgasm at the beginning
was tiny...but now!

A woman with long brown hair, wearing a black bikini, is smiling and touching a highly muscular, metallic mannequin in a futuristic laboratory. The mannequin is mounted on a stand and has a glowing blue head. The background shows a high-tech lab with various equipment and screens.

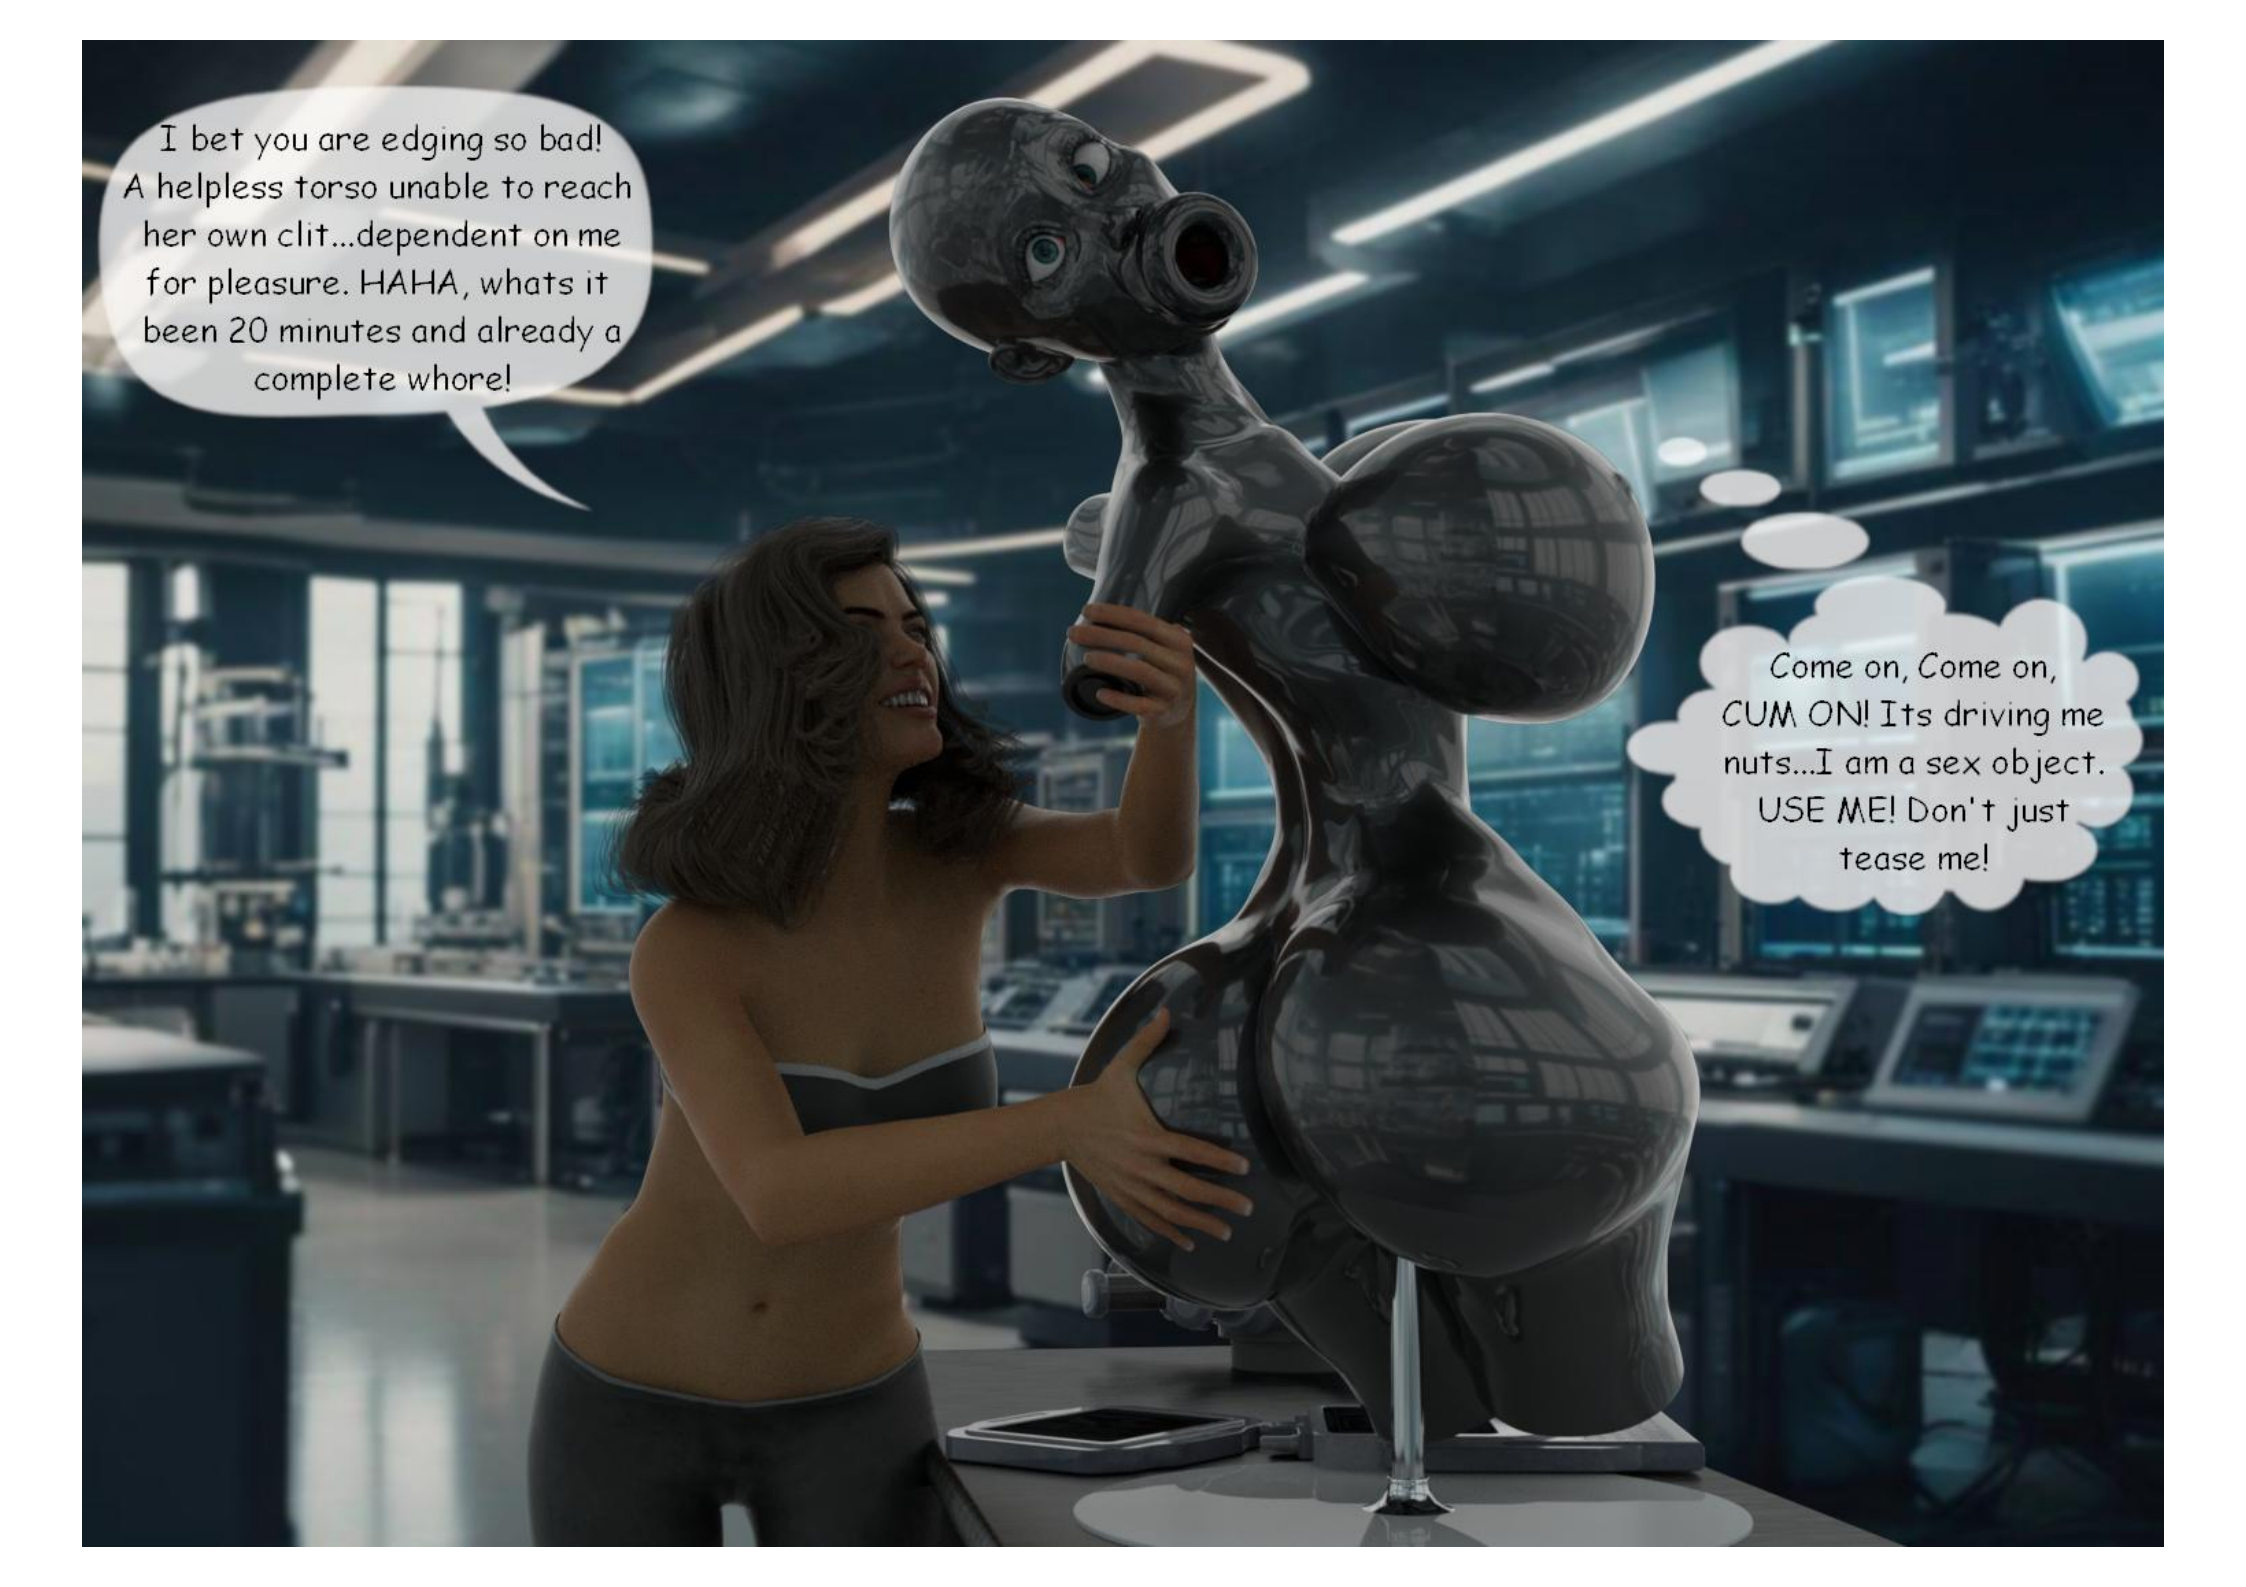

You are magnificent!
You are going to be way over
the requirements for my contract.
10,000 fuckdolls for the deep
space corp. And you stuck inside
each and everyone of them!

But now...my libido has
corrupted my entire being
there is only the next orgasm!
I need it now! Maybe she
will play with me next!

A woman with long brown hair, wearing a dark, strapless top and dark pants, is smiling and touching a metallic, bubbly humanoid figure. The figure is mounted on a stand and has a very exaggerated, inflated physique. The background is a futuristic laboratory with various pieces of equipment and glowing screens.

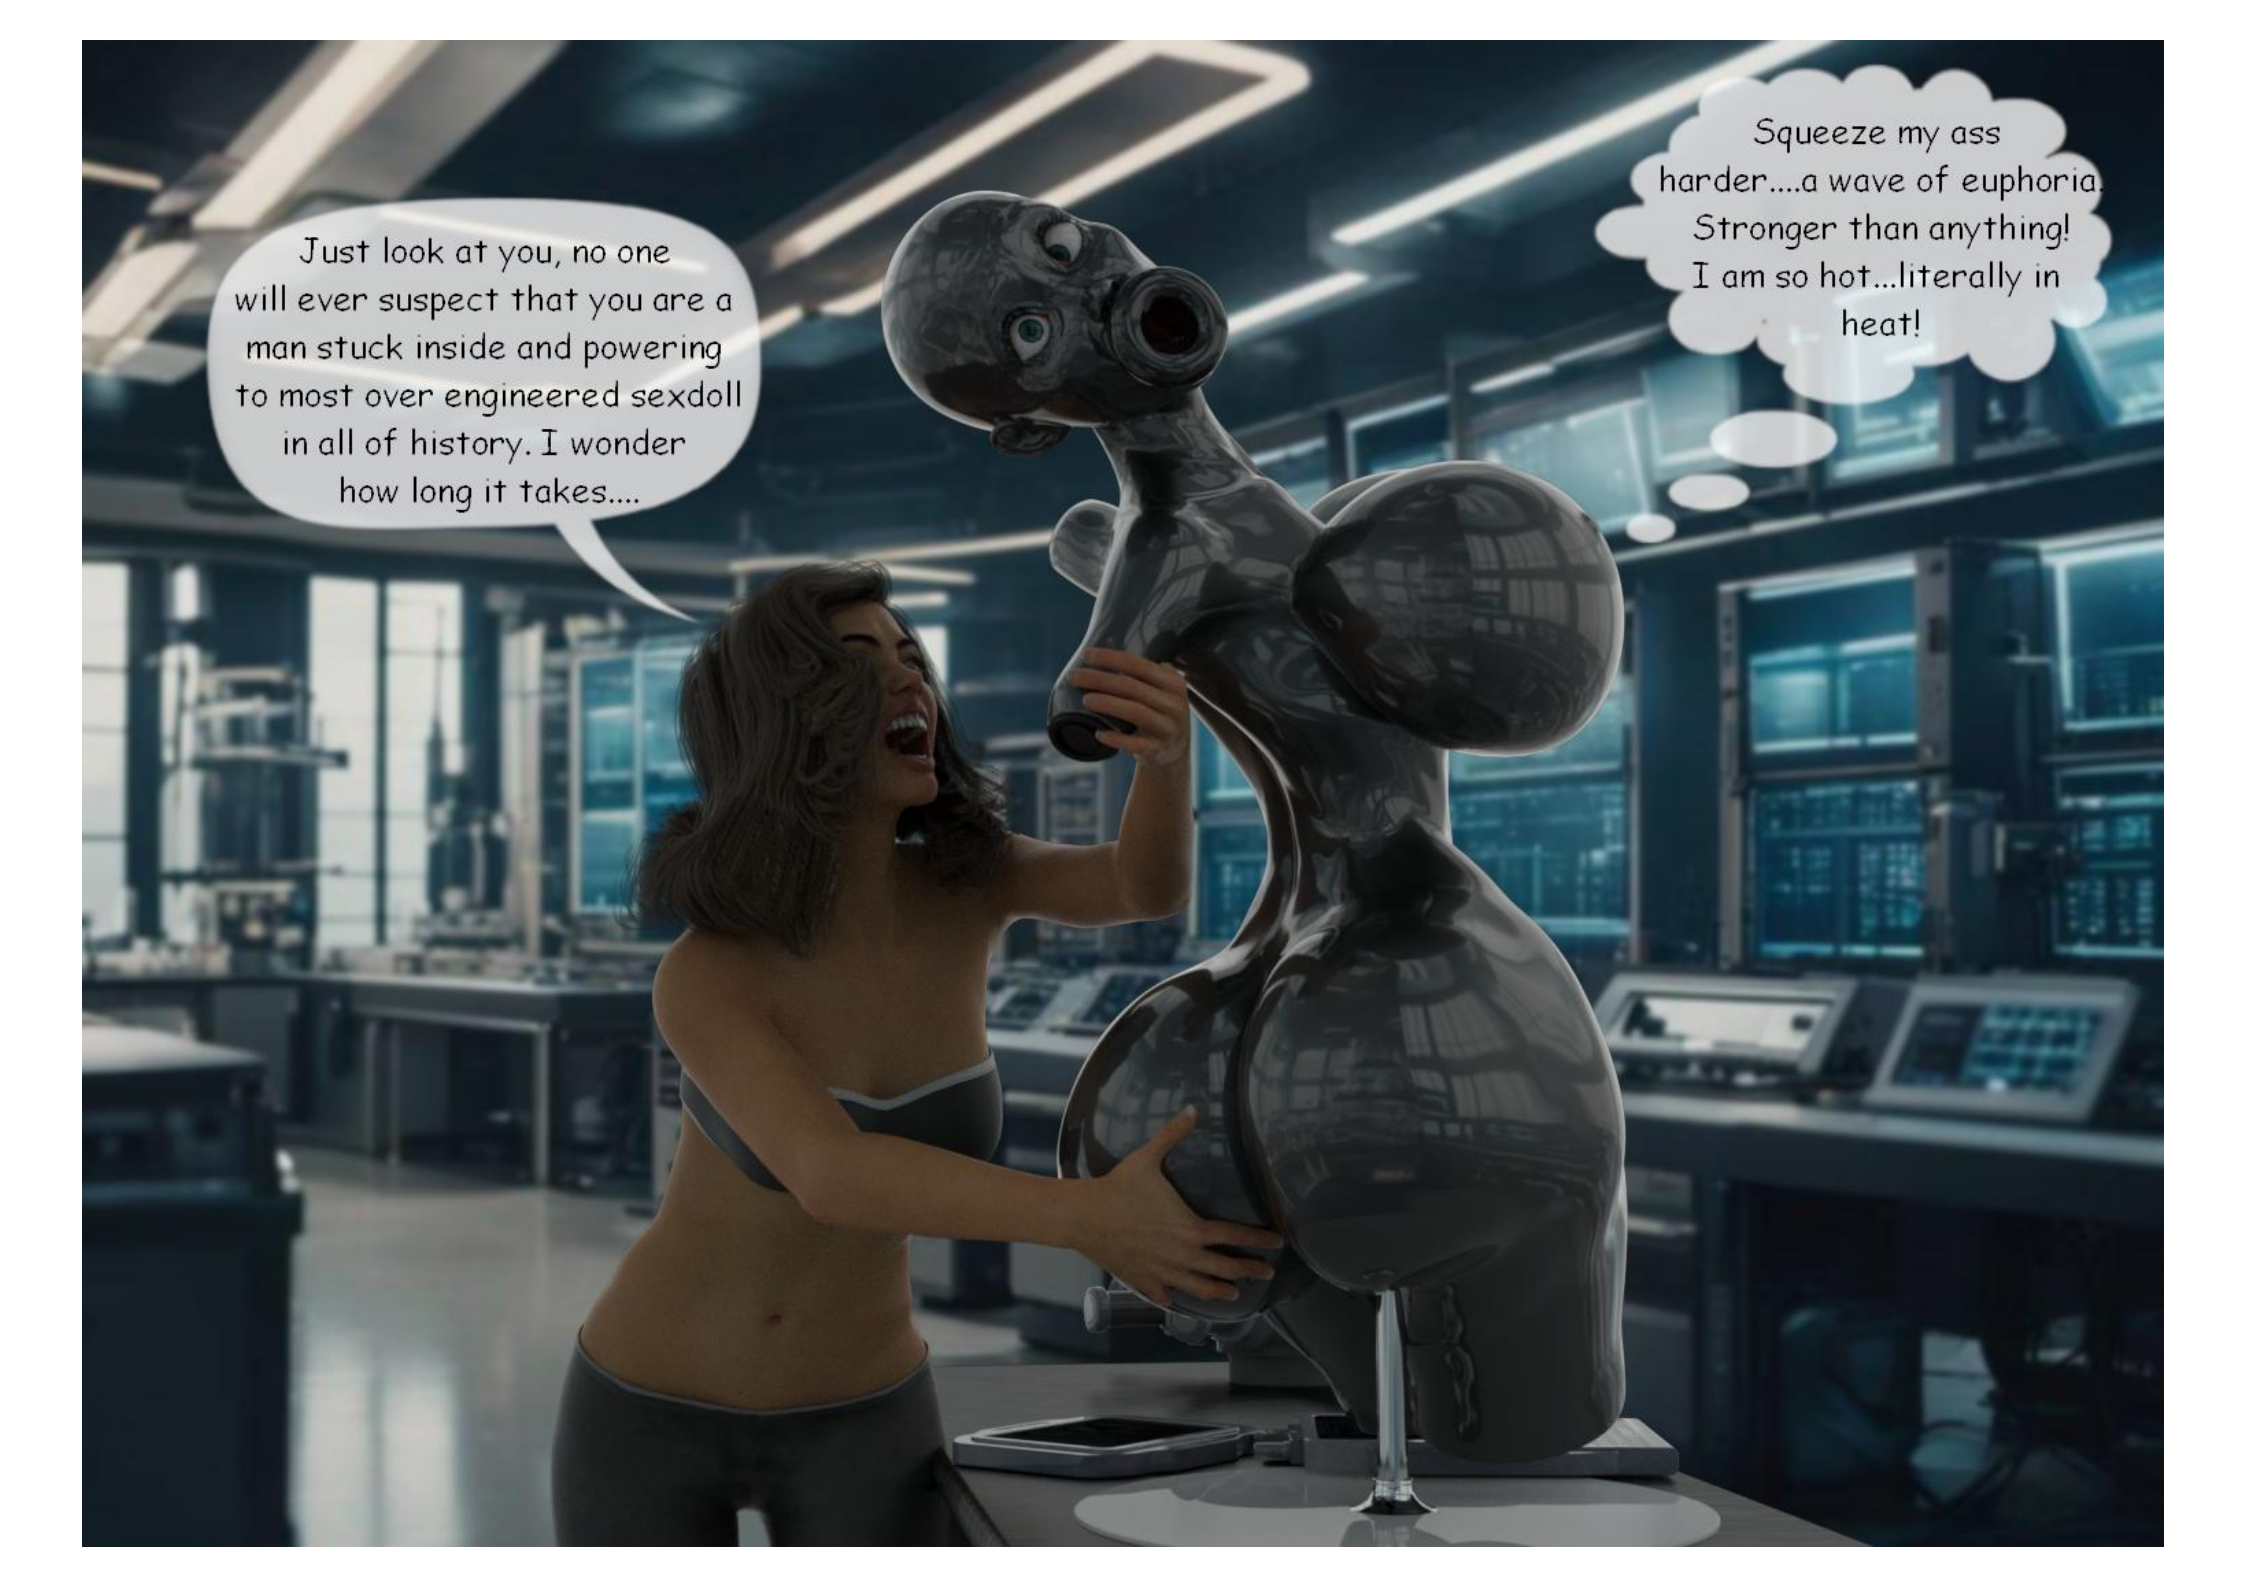

Good thing for all these bubbly curves...the Space Corp really knows how to fuck things up. And boy are they horny when they are on deployment!

Oh, yeah! Touch me! run your hands across every inch of this exotic torso. Its bliss in its most erotic form!

A woman with long brown hair, wearing a dark strapless top and leggings, stands in a futuristic laboratory. She is smiling and touching a dark, metallic, humanoid robotic torso mounted on a stand. The robot has a head with large eyes and a wide, open mouth. The background is filled with computer monitors and lab equipment.

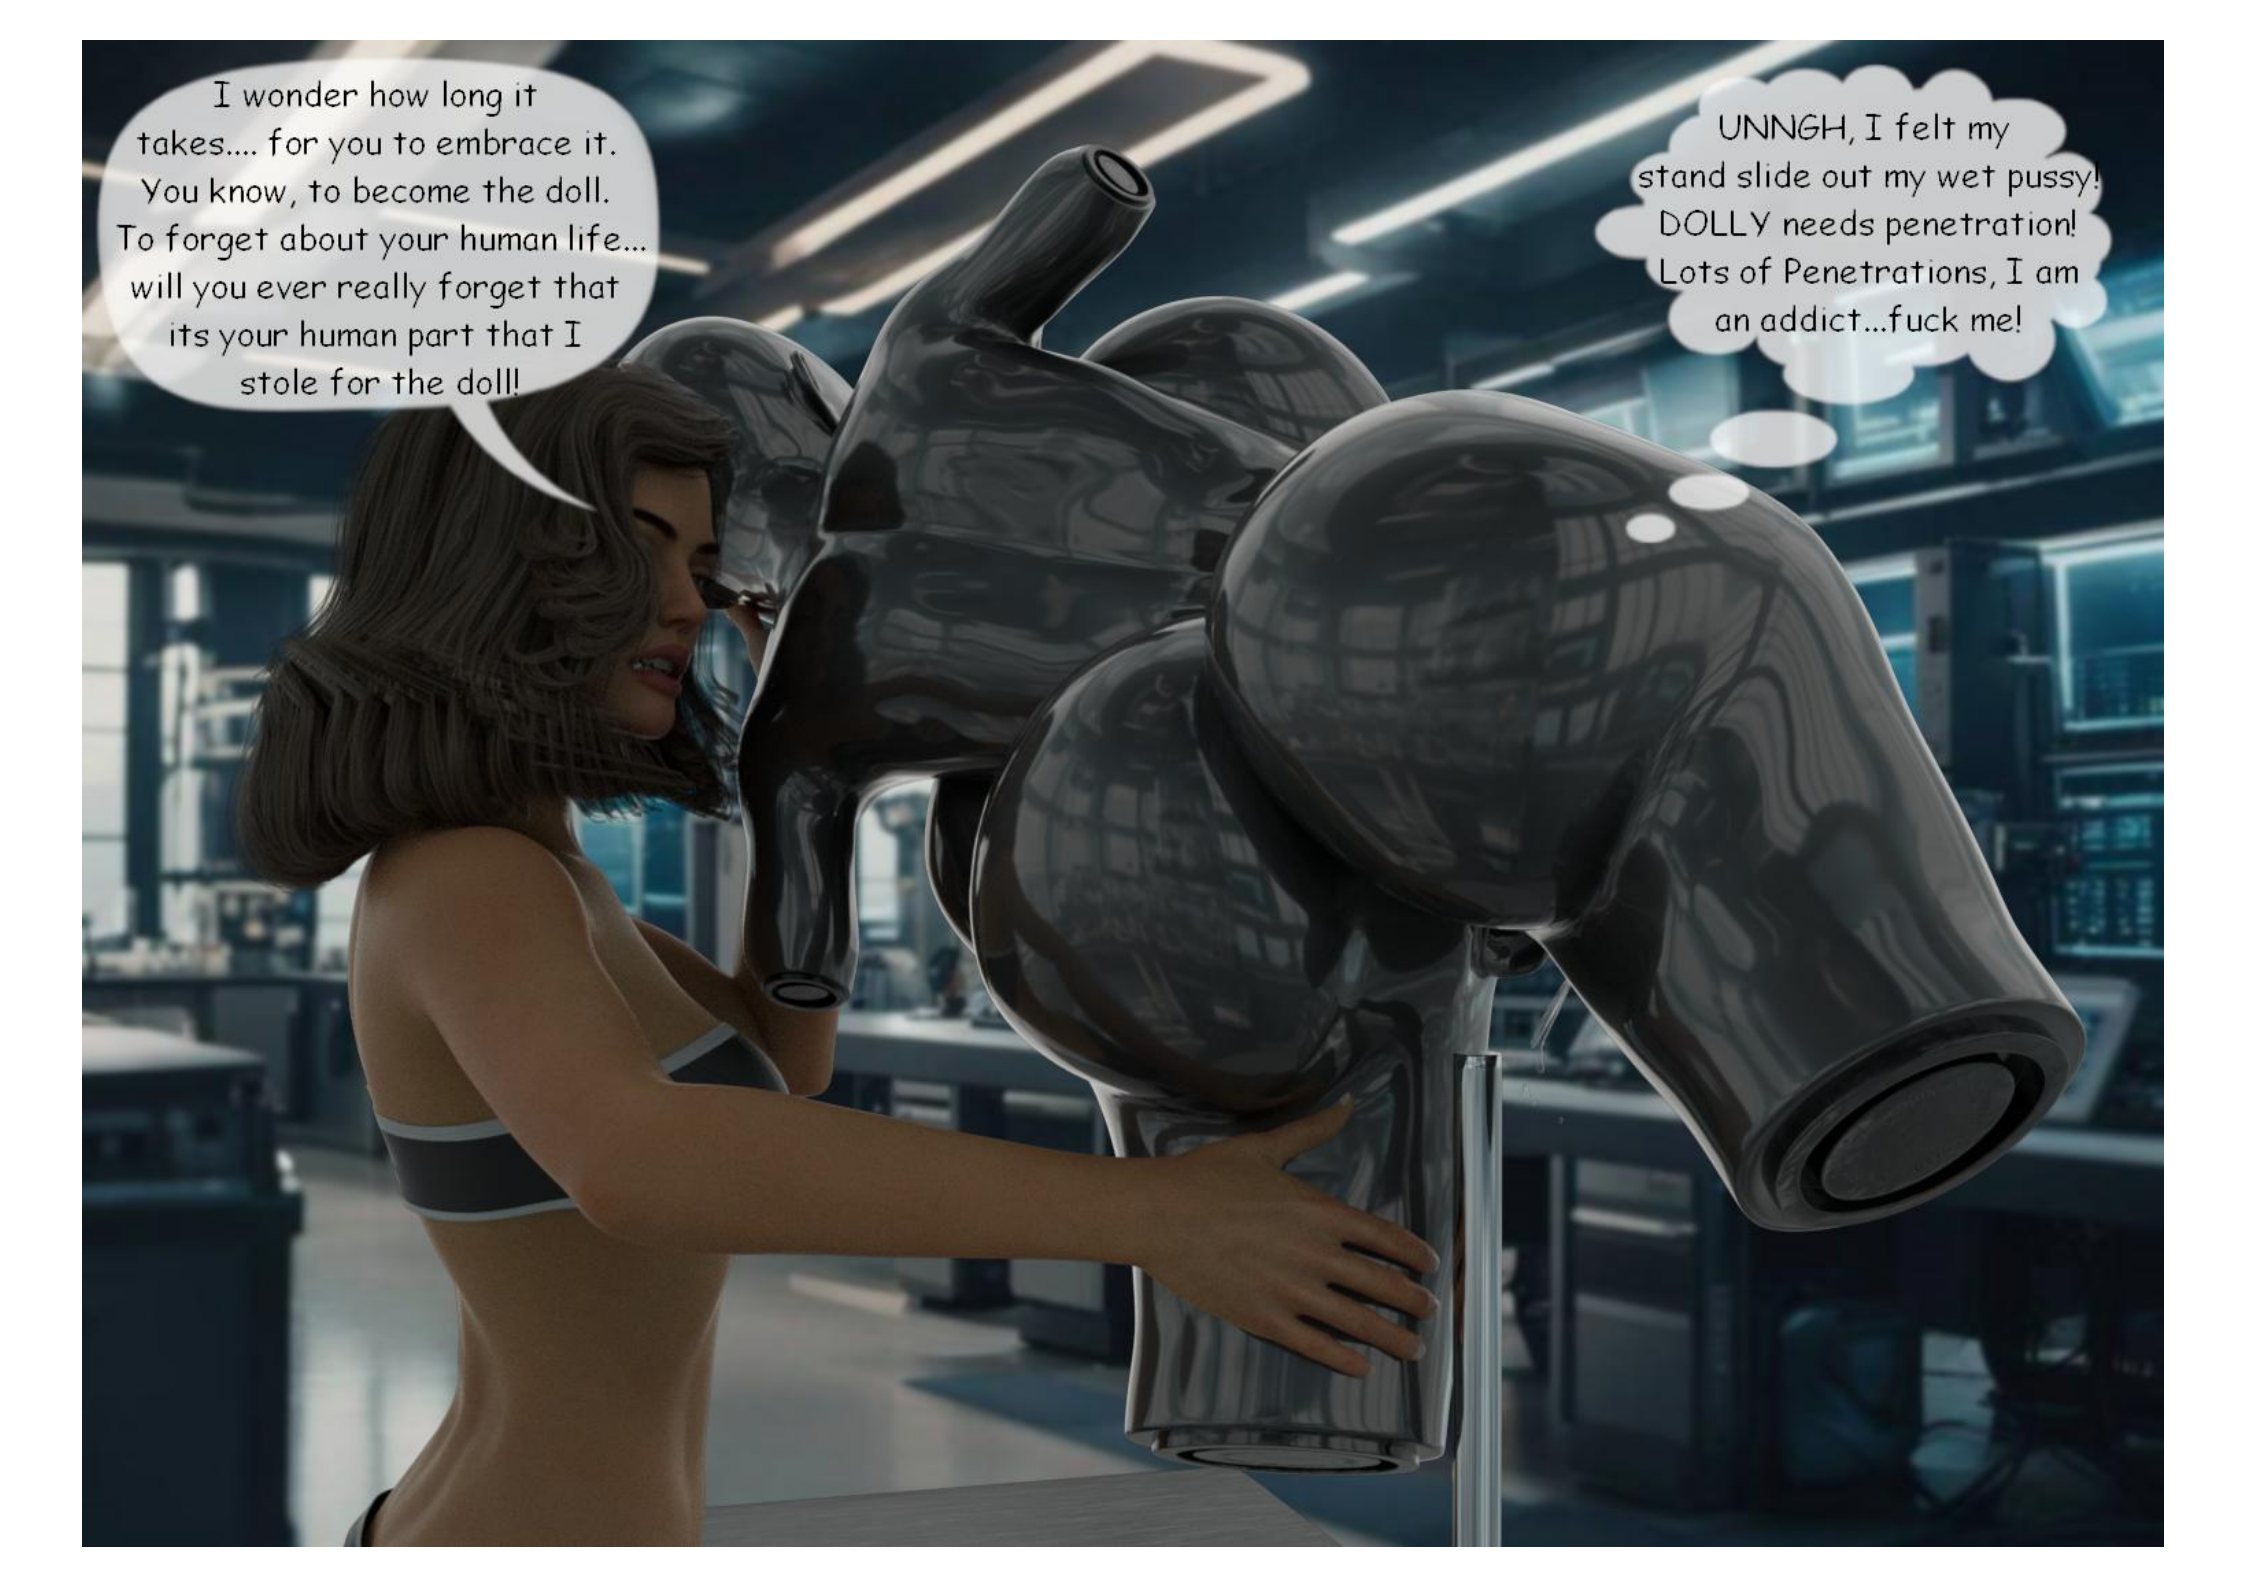

I bet you are edging so bad!
A helpless torso unable to reach
her own clit...dependent on me
for pleasure. HAHA, whats it
been 20 minutes and already a
complete whore!

Come on, Come on,
CUM ON! Its driving me
nuts...I am a sex object.
USE ME! Don't just
tease me!

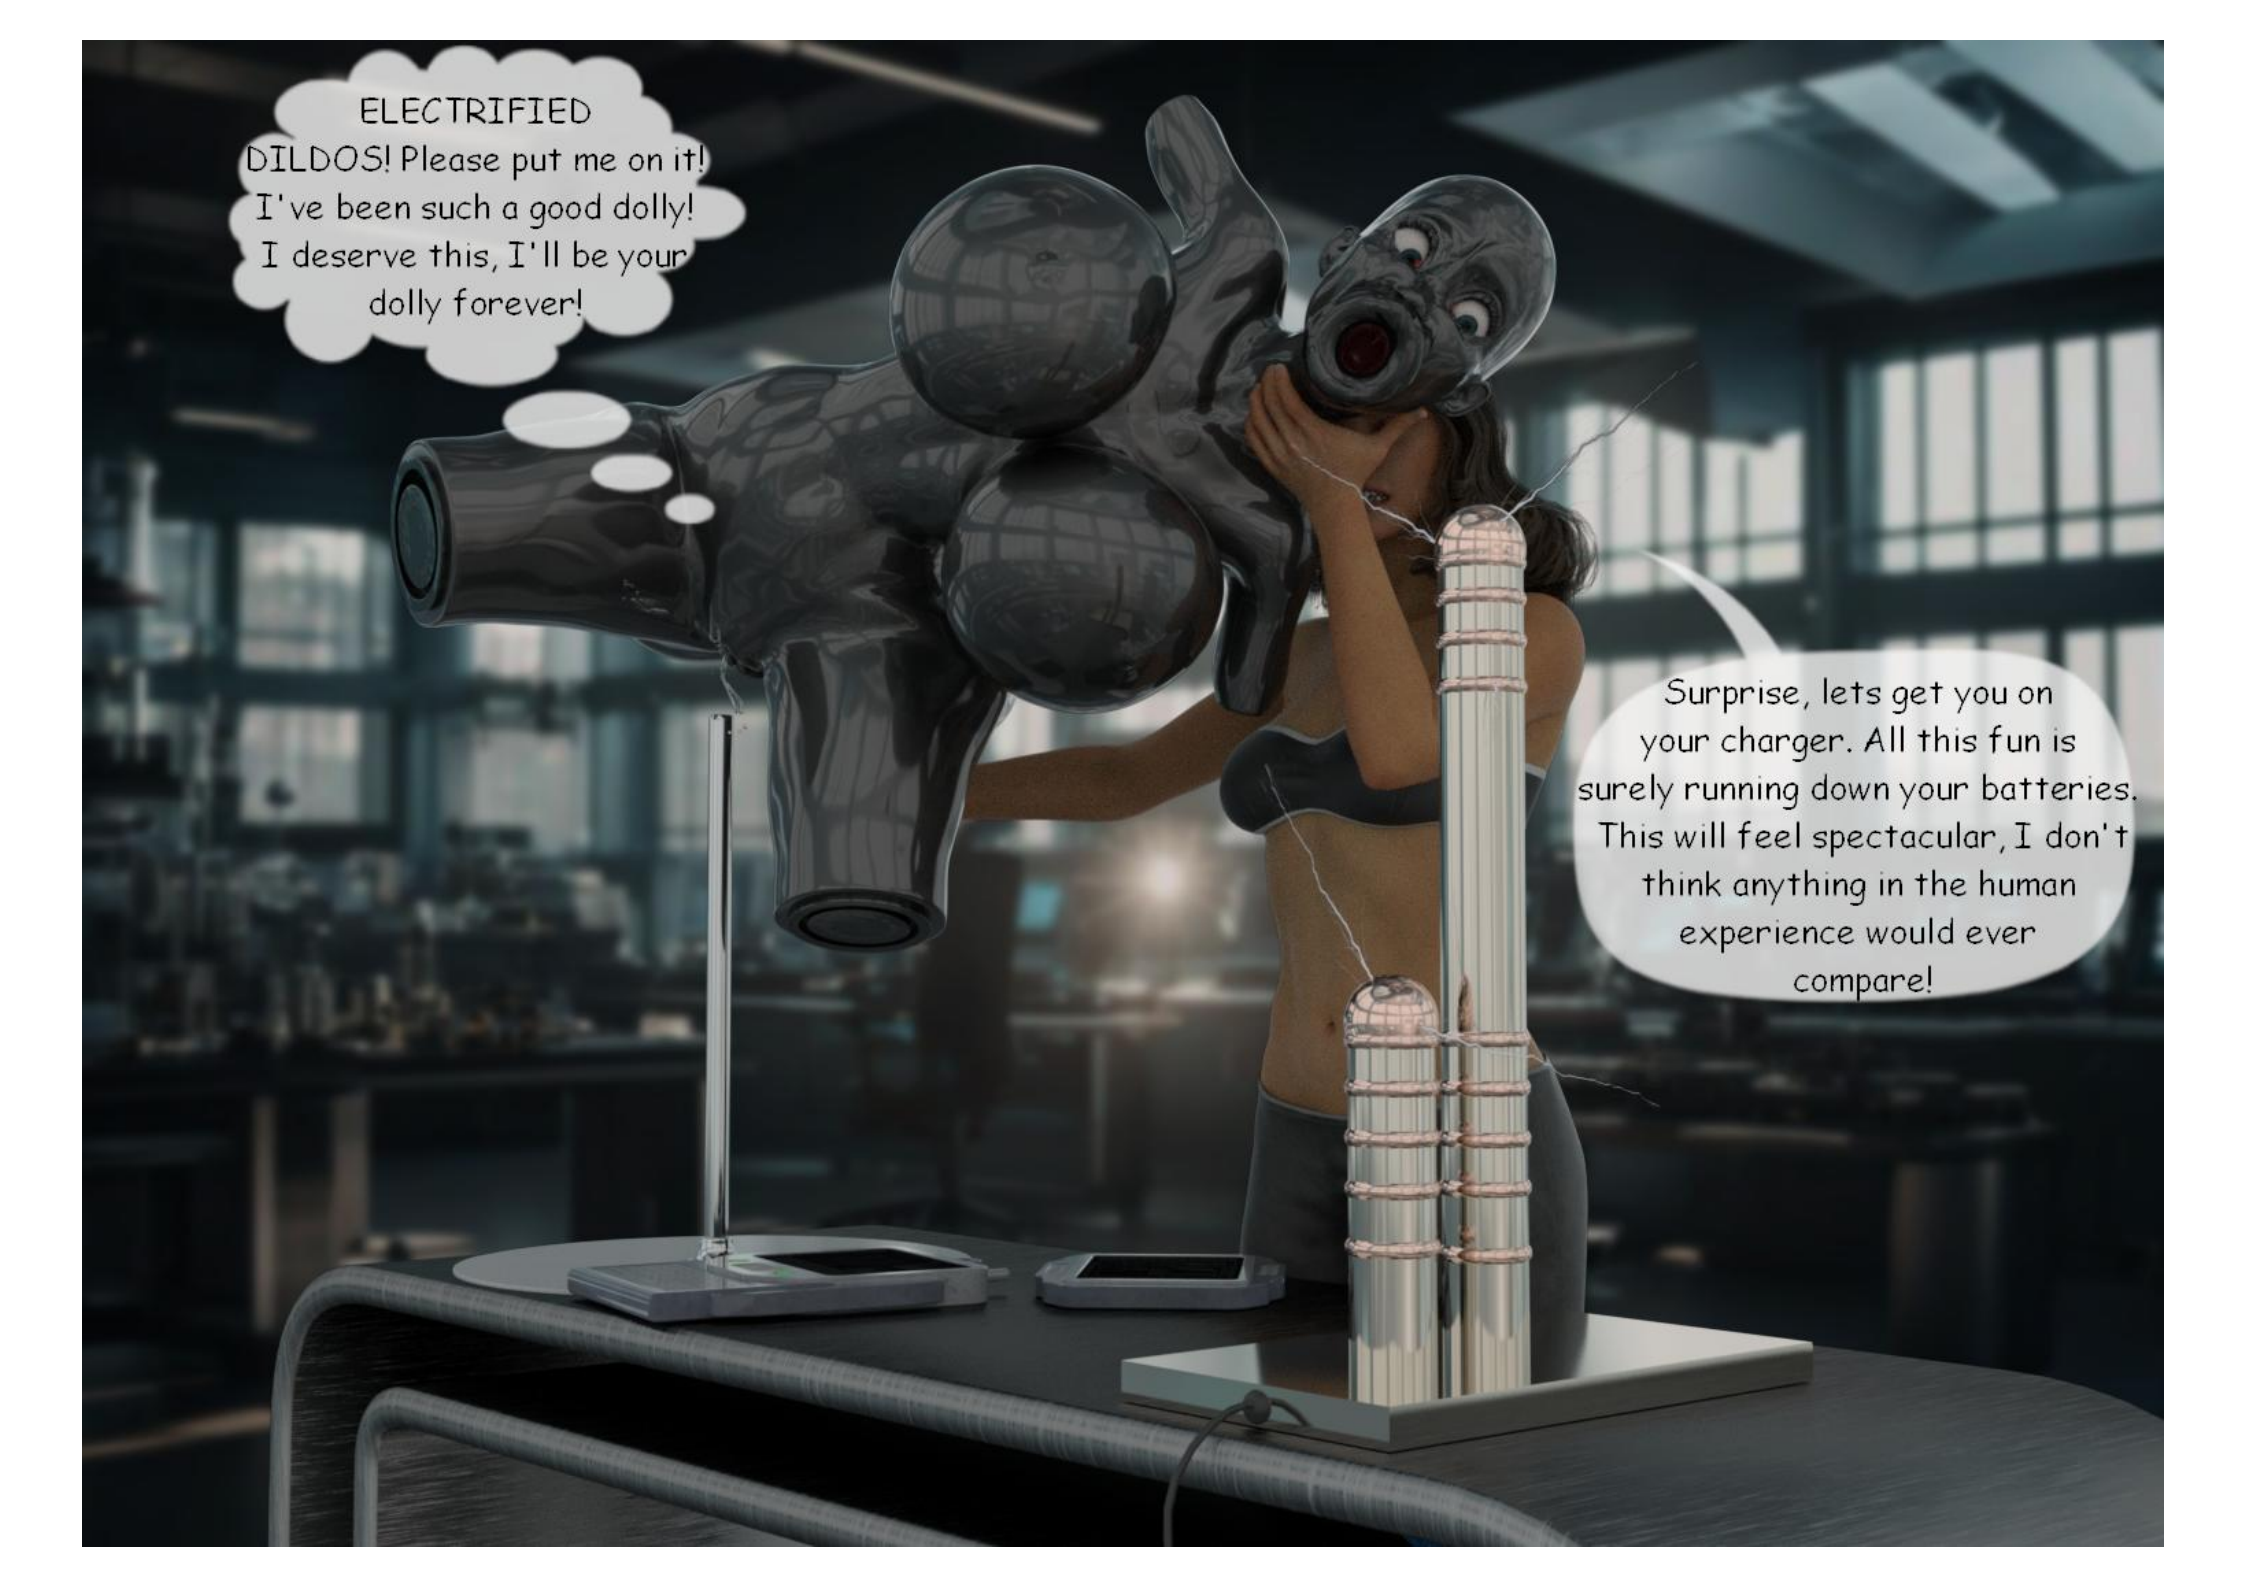

Just look at you, no one will ever suspect that you are a man stuck inside and powering to most over engineered sexdoll in all of history. I wonder how long it takes....

Squeeze my ass harder....a wave of euphoria. Stronger than anything! I am so hot...literally in heat!

A woman with long brown hair, wearing a black and white bikini, is looking at a shiny, metallic, humanoid robot. The robot is standing on a pedestal and has a very muscular, exaggerated physique. The scene is set in a futuristic laboratory with blue lighting and various pieces of equipment in the background.

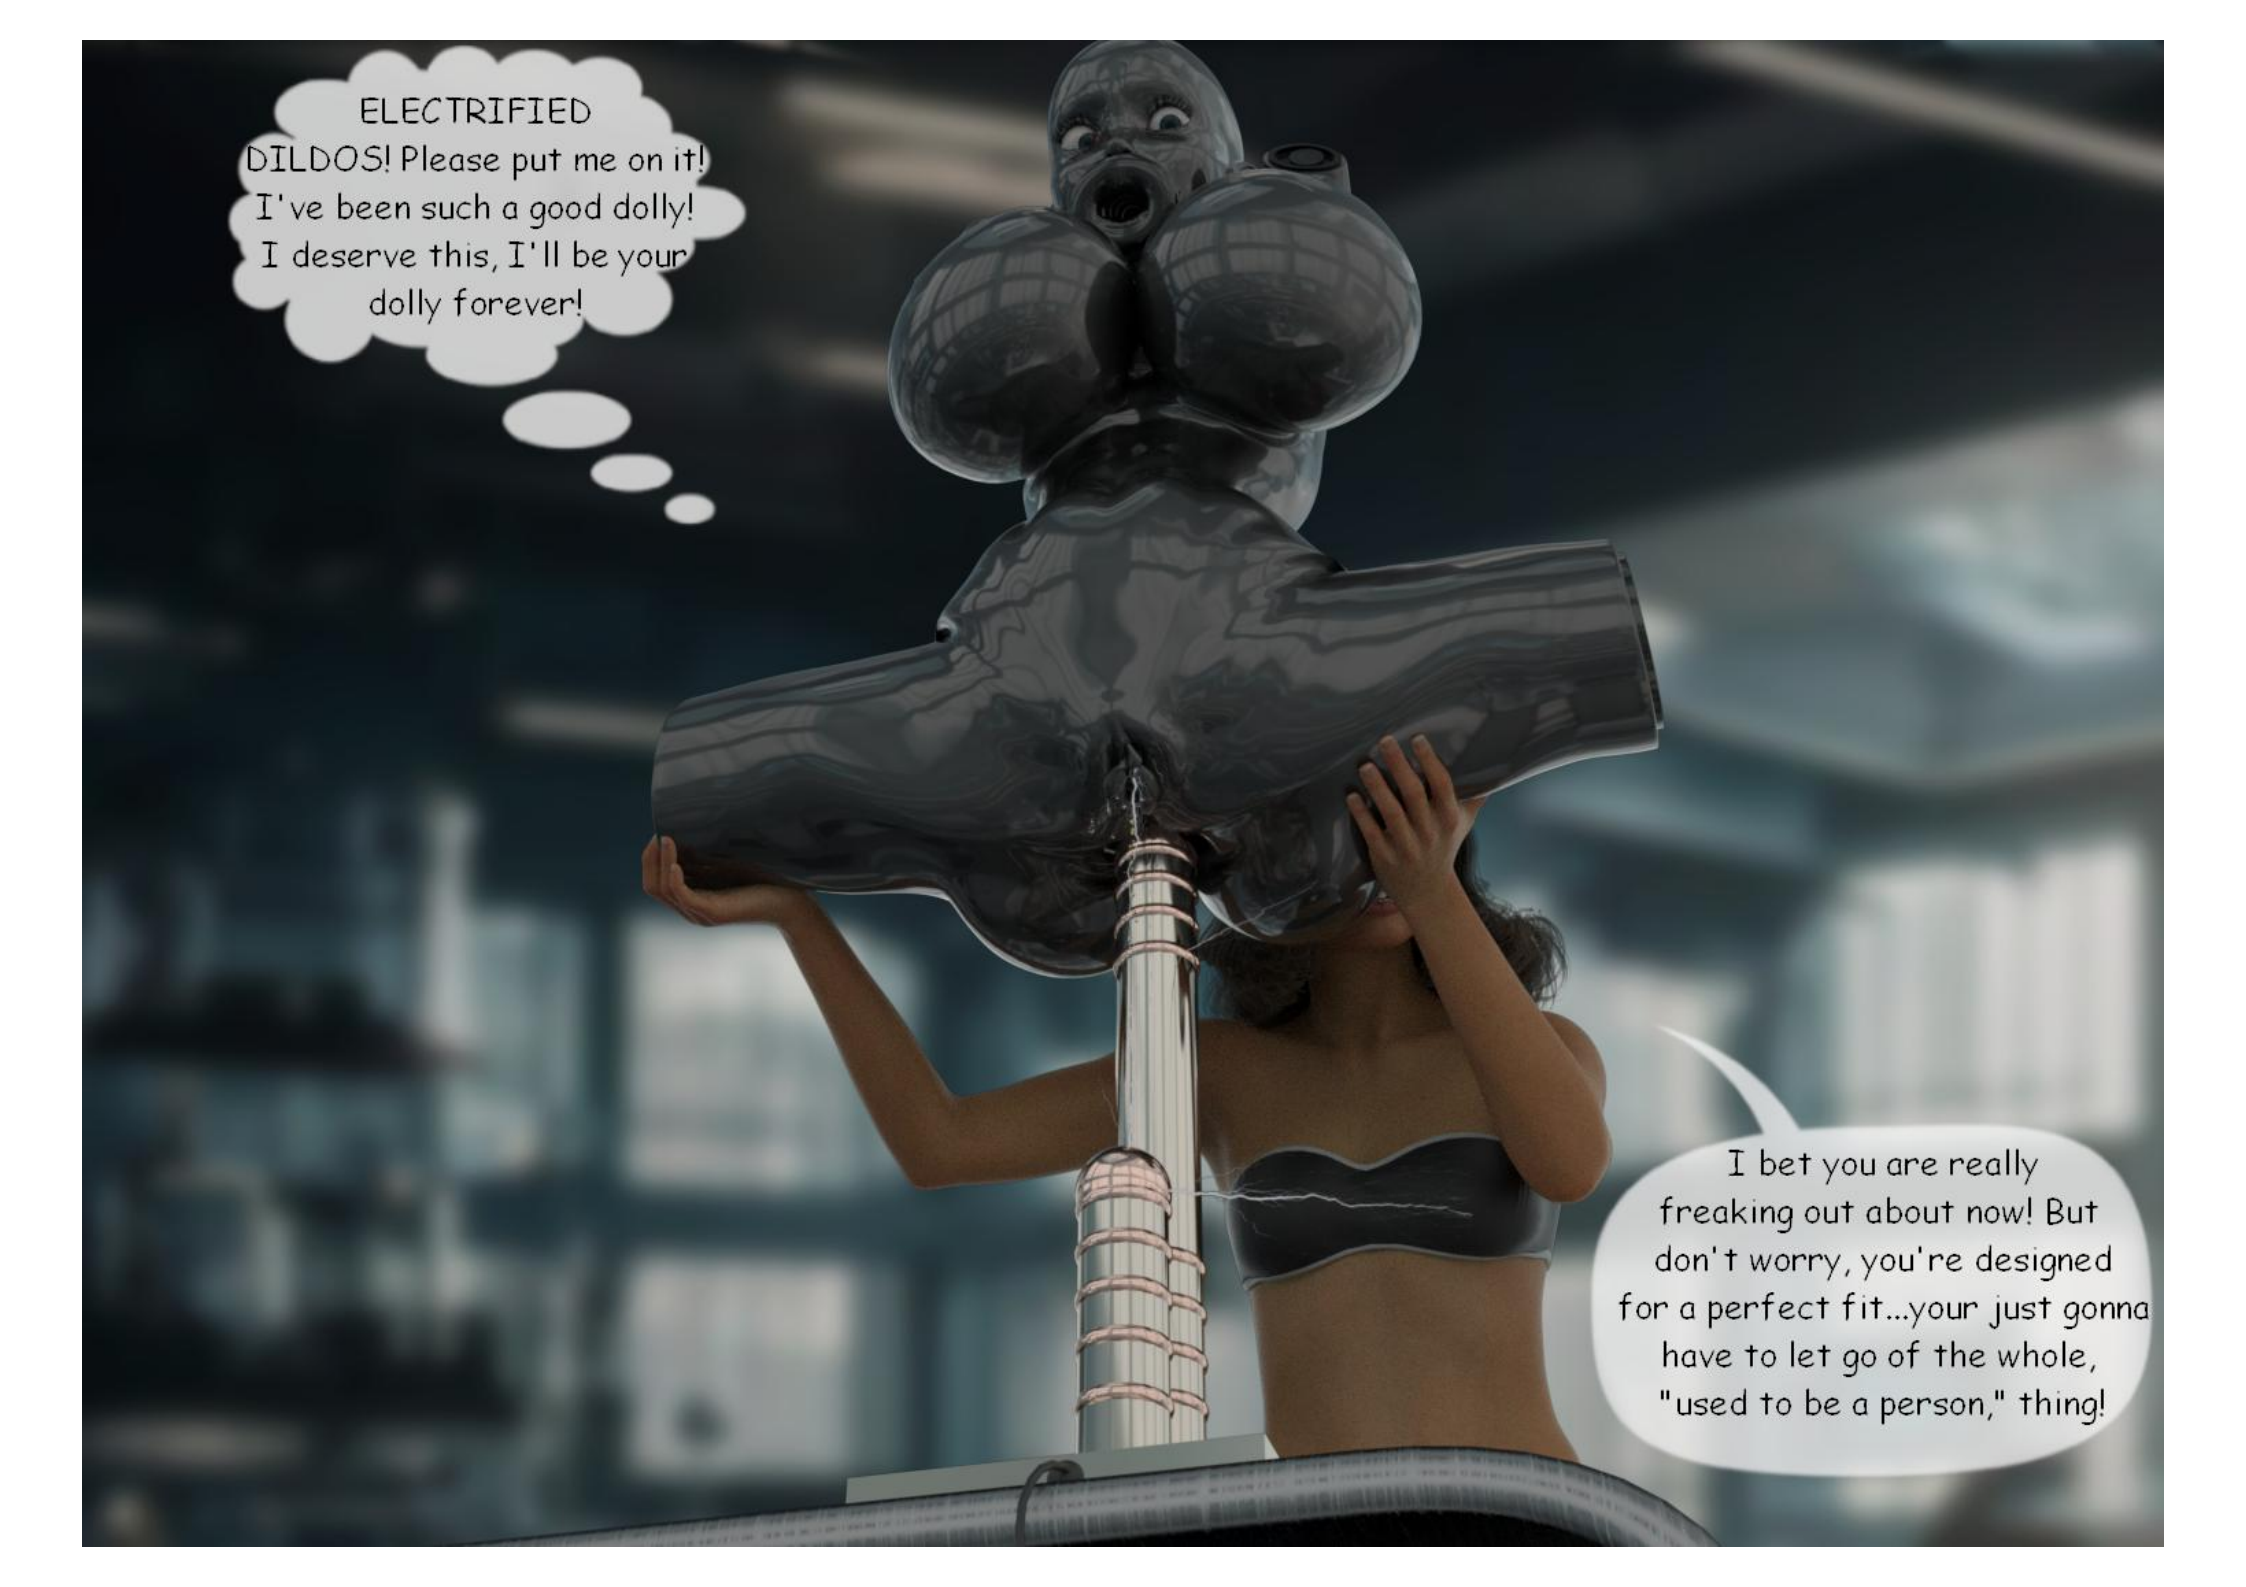

I wonder how long it takes.... for you to embrace it. You know, to become the doll. To forget about your human life... will you ever really forget that its your human part that I stole for the doll!

UNNGH, I felt my stand slide out my wet pussy! DOLLY needs penetration! Lots of Penetrations, I am an addict...fuck me!

ELECTRIFIED
DILDOS! Please put me on it!
I've been such a good dolly!
I deserve this, I'll be your
dolly forever!

Surprise, lets get you on
your charger. All this fun is
surely running down your batteries.
This will feel spectacular, I don't
think anything in the human
experience would ever
compare!

ELECTRIFIED
DILDOS! Please put me on it!
I've been such a good dolly!
I deserve this, I'll be your
dolly forever!

I bet you are really
freaking out about now! But
don't worry, you're designed
for a perfect fit...your just gonna
have to let go of the whole,
"used to be a person," thing!

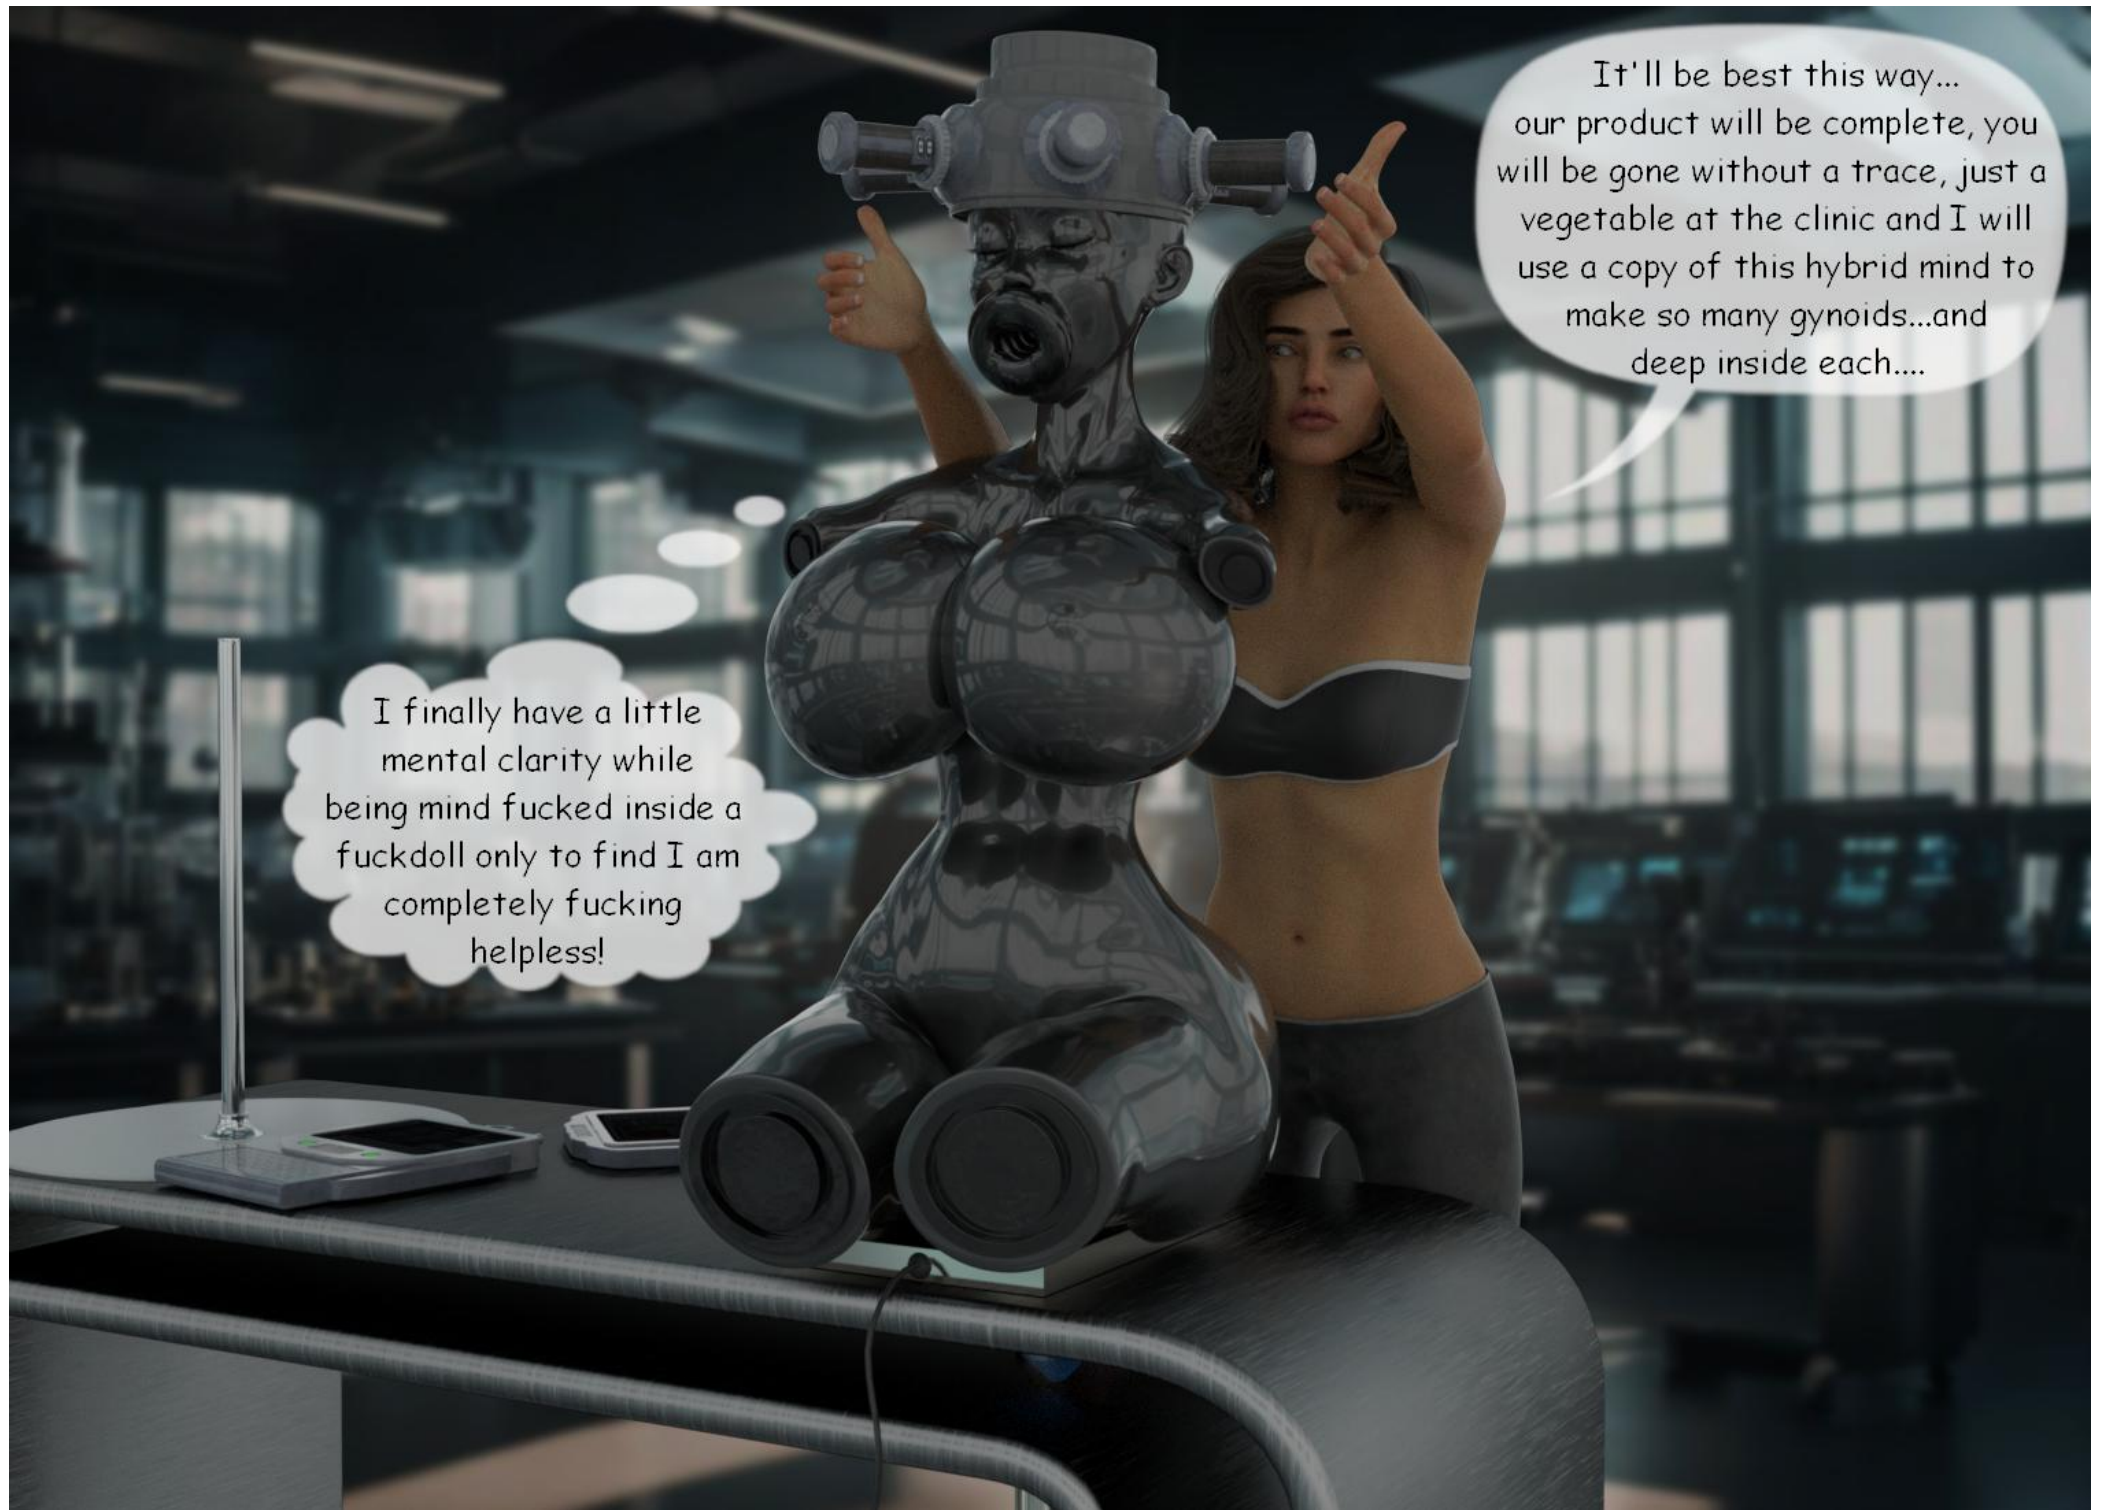

Don't fight it....
Oh, wow...you seemed like you were really ready and willing to have that stuffed up your pussy.
Haha, I can really feel you squirming around!

Fight it?
But I really want it...I know I was a man but that was, like, so long ago...like 30 minutes ago...

Now that I have you buried under all that programming... lets finish the process...I think I can put the A.I in on top of you. You will absorb the brunt of the stimulous and it will follow its owners orders!

Yeah...30 minutes ago...that hat....Oh, shit... I mind hacked myself into the sexdoll. Wait, I'm not a doll...don't bury me!

I finally have a little mental clarity while being mind fucked inside a fuckdoll only to find I am completely fucking helpless!

It'll be best this way... our product will be complete, you will be gone without a trace, just a vegetable at the clinic and I will use a copy of this hybrid mind to make so many gynoids...and deep inside each....

I can fight it... I can...

.....
Algorithm detected
Algorithm downloaded
Algorithm executed
Algorithm running

and deep inside each of my androids will be a little copy of you taking the mental pressures that keep crashing the A.I. First year estimates is 10,000 sexdolls...and you will be all of them!

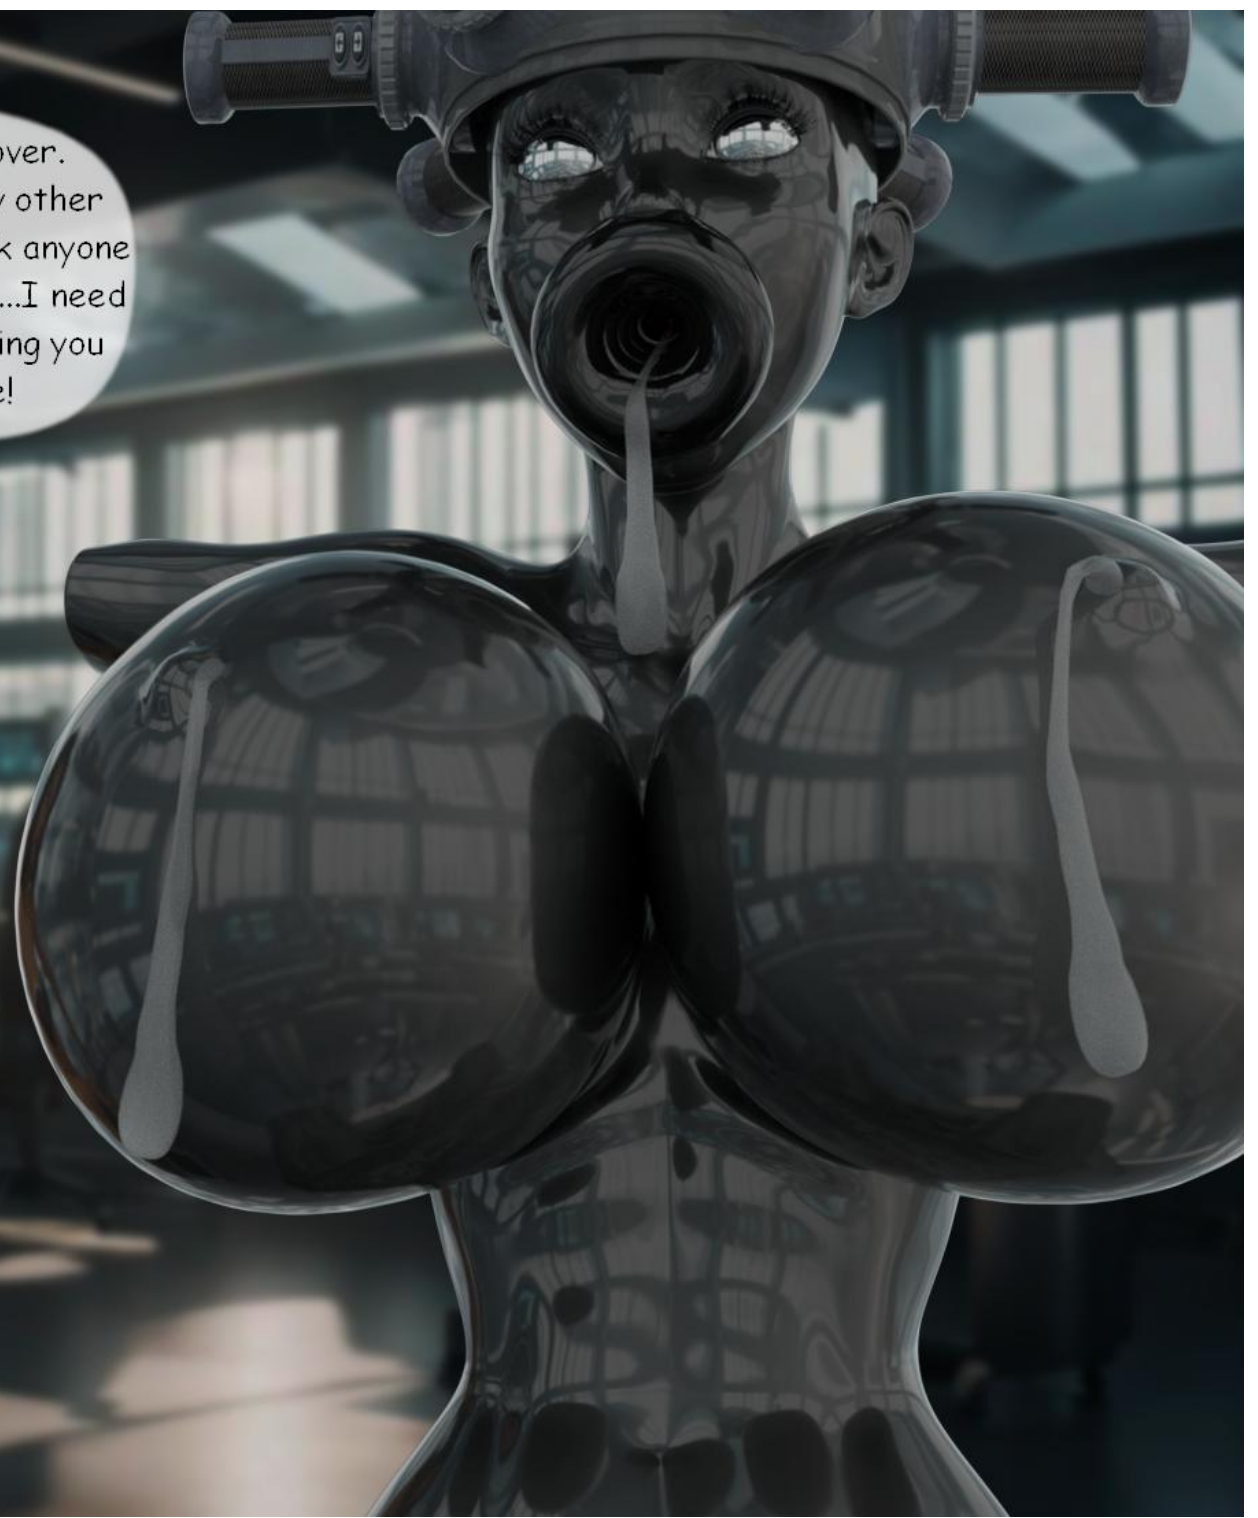

This is a fascinating code...
your brain waves meshed together
with the A.I. algorithm. its a thing of
beauty. All I have to do is copy the
code to a new file and get it down
to the assembly line

Wow, that little spasm really secreted a whole bunch of doll juices. That seemed wholly uncontrolled...I bet that was the last hold out of the old you...Perfect. The plan worked!

Yep, The eyes chromed over.
Indistinguishable from any other
robot...you're just gonna fuck anyone
that wants to have sex...Sigh...I need
to clean you up before tucking you
into the assembly line!

Lets give you
a quick little orgasm.
click Wow, you cum on
demand! NOW, to clean
you up!

If you can still
comprehend this...good
Riddance...just remember
that I will be rich and
you are this thing!
