People who enjoy Platform game at the train window. Collision detections are automatically generated based on the shapes of the buildings which be recorded by cameras on the glasses. recorded-landscape, data and collision data are automatically saved on data center.

Nevertheless, sample data is still small, and the collision detections is still dull, so people with high trusted are helping to fix the collision data by their hands and updating the artificial intelligence.

By the way, high-speed routes with many elevated lines such as the Tsukuba Express line is gonna inevitably hard stages, so the people who often take that line will be great player of this game easily even children and elders.

Shinkansen is not supported, because it's too fast. (but it doesn't matter: there is the unofficial MOD to joint to shinkansen. however it still works super slow)

...And that is no exception for me.  
I haven't registered my account and I  
did not post my face data to the SNS but...  
Who has edited my details?  
...Haa? I didn't kick rabbits!!  
...What is speaking?!

[Ariakegawa Aomi] (Her name)

- a day before: fall from bike
- 3 days before: kicked rabbits
- 9 days before: picture that she drew s1203.jpg
- 10 days before: wet herself in the science room
- 13 days before: played feign innocence
- 15 days before: wet herself in the Audio-Visual room
- 20 days before: crossed the road carelessly and made the bus to stop

And this means that even if I took off  
my glasses, anyone that I don't know  
keeps recording me and sharing it in the  
cloud, right? I can't escape anymore ...

These glasses has cameras... Oh my gosh!!  
My bath time!! were these cameras  
recorded my naked body!? ah!!!  
I hope they haven't post my naked images  
to anywhere on internet...

You have a trouble right?

who's there?!

Oh ...  
We are monitored 24/7 by  
anyone.  
we can't go outside without  
being monitored...  
I really miss the freedom...

If you are worried that your face will be taken every time you go out and will put every information about you into the cloud, I'll suggest you to change your appearance when you go out if you need!

Eh... Ah... Yeah...?

Sorry, I forgot to tell you that who I am... I'm an artist.

Hey master! Do you know why is Tokyo Tower called "Tokyo" Tower? ...Because it's built in Tokyo!

An app that you can take a walk with your favorite 3D avatar. It has a lot of walking motion data, so it can respond to any demand. sending location and other data, 3D avatars that are supposed to be there "on my screen" can be shown to other connected users screen too.

There is a paper about shopping. According to a study by Lohvi-University in 2017, among the group of subjects who purchased a large package and the group of people who purchased a small package, the group of subjects who purchased a large package was necessary to reserve large spaces to storage empty too...

This is a right price if you buy it, and even if it is 1.20 times as expensive. Because if you don't buy it in this time, you'll be never get it for the rest of your life, this is a limited production of only the initial lot, and the factory that manufactured it went out of business in January ...

Should I buy or not buy... help me professor!

the selling points of this product is... ummm...my sage tells it!!

The image of people with reduced thinking ability who refer to the "professors" 's opinion when they making important decisions. This is a kind of stand fight of "professor" with full of selling techniques and "professor" with enormous information to make smart purchases.
