

2-3

Where's all my equipment!?

We left experiments running last night to —

I WON'T accept
reassignment. Not
without an explanation.
I've led this project
for over twenty years!
Twenty. YEARS, Bharr.

The serum has been synthesized and is stable across a wide range of conditions.

The correct compound for the Omen of Iden has been extracted.

Our most recent tests have had very promising results.

The results were INCONCLUSIVE.

Well of COURSE they were inconclusive!

Until the Serum connects with a suitable host - pair the Omen of Iden can't manifest!

That doesn't mean the serum isn't VIABLE.

It will perform as designed!

The project is a waste of Circle resources. It has been Terminated.

That is all.
