This is the formatting test. I'm only going to do one for real chapters, as formatting things takes time, and the auto-export tools that I've investigated don't work well enough when it comes to the tables. I am trying to think of words to type. It is hard. Maybe I should just put in some lore ipsum? Is that how you spell ipsum? Doesn't matter. Is this enough words? Oh, this is Delve, I should add some numbers.

How about now? The number went up, see? I'll do it again.

Okay, now I'm just getting carried away. I'd better stop there, before anyone gets too excited.
