### **CARPET OF FLOWERS**

- *Current Price* > \$10.00
- In 70,131 decks on EDHREC
  - 5% of the possible decks.
- Only caring about islands may seem narrow, but it's less narrow than you think. Benjamin Nicol broke down the odds of playing against a particular color late last year in an article on EDHREC called "Solve the Equation - The Odds on Color-Hosers"
  - The top 100 commanders have an average number of colors in their color identity equal to 2.77, with just 11 commanders featuring 1 or fewer colors. Below is a complete breakdown of what colors commanders have within their color identity.
    - White: 52%
    - Blue: 62%
    - Black: 60%
    - Red: 56%
    - Green: 47%
  - That's just the odds of one commander being that color, but most of our commander games feature 3 opponents. Let's take a look at the odds that at least one of our three opponents will have a commander of any given color.
    - White: 89%
    - Blue: 95%
    - Black: 94%
    - Red: 92%
    - Green: 86%

### 3) **TO THE LISTENERS**
