

Hey guys !

"Every single day a woman fall into the most addictive trap she can ever encounter : muscle growth. It becomes a dark road filled with steroids, hormones and sex everywhere. There is no limit to what those ladies will do to get a bit bigger, a bit stronger, gain a few striations or some veins here and there.

As long as they can get their fix they don't care about the rest and when they are in desperate need of hormones they just go for it wherever they can find it.

Every single years the numbers of women getting buffed, addicted to steroidal cum is growing. Amanda is one of them and it seems like there is no going back for her. Steroids, hormones, anything she can take are not enough. No matter how big and hard she looks, how manly and roided she turns, she is thirsty for more, always.

She sucks dozens of cocks a day, every time she sees a muscular man she is in deep need of feeding on him, she can feel the cum pumping in their cocks, their roided prostate and their hard balls shooting the hormone inside of the white powerful liquid. The bigger they are, the more roids there is to suck for her. She can't and won't stop sucking all the dicks she sees. There is no limit for her appetite and no limit for her growth !"

Enjoy !
