

[ASMR] TESTING [MM4A][INSTRUCTIONS][SPICE]

After successfully creating a sentient robot, the duo scientists move to prepare their experiment for presentation. This includes walking, talking, reacting, and taking initiative in scenarios. However, the doll they made is much more than what they expected. Did their teasing during testing create something insatiable?

The listener is up and at 100%

~ROY

Alright. Let's go ahead and do the daily check.

~SHIA

Do we really need to? It's just walking, talking, and reactionary testing. We've done it every day for the past week.

~ROY

Better to be safe than sorry. Remember: Our investor wants a flawless result. (To listener) Are you ready for your daily check? (The listener nods) Hm. Good. Reactions are almost immediate to questioning.

~SHIA

We could absolutely call that a clear check for reactions.

~ROY

Nope. Dude, Marcel is breathing down our necks. If we don't show him a perfect robot, then we are gunna have to pay back every single cent he invested in it.

~SHIA

I know that, but there is a thing called wear-and-tear! (Listen: What is that?) Huh? Oh, it's a more casual way of saying you could overexert your functions and essentially break down the line faster than just leaving you be.

~ROY

We are literally recording the check so that our progress and proof can be shown in case something DOES happen. Just trust me a little, okay? And have some patience.

~SHIA

Fine fine... (To listener) You need to perform perfectly, okay? Or else a scary man will come and take you away. (The listener frowns) Frown all you want, it's the truth.

~ROY

You don't have to scare them, ya know.

~SHIA

And you don't have to test them literally every day. (Listen: I don't want to get taken away.) Hmm? You don't wanna get taken away? Well, I mean, as long as you do your best and don't break down, you should be fine. Okay? (They nod.) Okay.

~ROY

Cool. Great. Alright. Reactions are good for now. Let's move to walking. (Walk a distance away) Can you come towards me? Five steps should do.

(The listener takes 5 steps towards you. They are light steps, controlled.)

~ROY

Like a feather. Perfect. Great job.

~SHIA

Look at you go! See? Told you you'd be fine.

~ROY

Sure thing, buddy.

~SHIA

You wanna act like that? Fine. (To listener) Hey. Turn around and come towards me. Walking in a straight line isn't a good enough test. (The listener obeys, turning around and taking five steps towards you.) BAM! Easy for our perfect invention.

~ROY

You are absolutely gunna be insufferable through this, aren't you?

~SHIA

I can make this quick and painless. (To Listener) Talk test. How are you feeling right now? (The listener grimaces.) Huh? What's wrong?

~ROY

What do you mean what's wrong? What are they doing?

~SHIA

They're... frowning. Umm... Hey, are you okay?

Listen: Please don't fight.

~ROY

Don't fight? I mean... I don't wanna. I just wanna make sure everything's done right.

~SHIA

And I don't think we need to be so meticulous. We're gunna have disagreements once in a while, you know? (Listen: Really?) Really. We're not perfect, unlike you.

~ROY

(Approach the duo) Yeah, we made you to be more empathetic than we are with each other, so you probably feel really bad watching us bicker like this. We're sorry.

~SHIA

Yeah, we're sorry. (Listen: Prove it.) H-Huh? What did you say?

~ROY

Did you just say 'prove it'? (The listener nods) I mean... I'm not sure how we can prove we're sorry--

~SHIA

Other than saying that, now, the talking test is done. BOOYAH! I win. (Listen: That is not what I meant.) That's not what you meant? I mean, am I wrong, though?

~ROY

I think they want us to genuinely apologize to each other. Not too hard, I'm not holding a grudge. This part of the project was always bound to be the most stressful part.

~SHIA

Fair. Alright. I'm sorry for being annoying about the testing, okay?

~ROY

And I'm sorry for being a hard-ass about it. I just want to make sure nothing gets repossessed or deemed worthless if something goes wrong.

The listener approaches the both of you. "What do you mean by that?"

~ROY

Huh? What do I mean by that? Well, we didn't have the money to make all of this happen on our own. We had to get some help.

~SHIA

Yeah, a rich guy helped us get this lab and all the materials to make you. In exchange, we give him the blueprints to make more down the line. (Listen: Does that mean I belong to him?) Does that mean he owns you-- no! No no!

~ROY

We signed away blueprints, not you. If he likes what we made, he'll be making his own robots for however long he wants. You can do whatever you want, really. (Take the listener's hand) Hey. You're shivering. Are you okay?

~SHIA

Ahh crap. I think we scared them. (To listener) Hey, it's okay. No one owns you, alright? Not even us! Hell, you can tell us to get lost if you want-- (Listen: NO!!) U-uh?! Did... did you just say no?

~ROY

I think so. Listen. I know that we made you, but we don't have to be the only people you know. There's a whole world out there to explore. (Listen: But I find pleasure with you two) You find pleasure with us? I-I mean, that's good, but I mean...

~SHIA

(Put two and two together) We're not gunna force you away or anything. If you want us and just us, then you got us! We care about you and want what you are comfy with, you know? I mean, I don't mind at all if you wanna be with me at least.

~ROY

Just you? I'm right here too. And yeah, while we'll have to take on future jobs or something to support us, I guess we could work something out if you don't want to join society.

The listener takes a step forward and cups your cheek, Roy.

~ROY

U-Uh? Hey... your hand's really warm on my cheek. Are you okay, truly?

~SHIA

Huh? Are their internal temp controls broken? (Listen: No. I am perfectly fine.) You're fine? Let me at least run a quick diagnostic on you to make sure. (Walk to a desk and grab a tablet to initiate an internal check.)

~ROY

(To listener) He's right. Just, uh, focus on me okay? I gotcha. (Hold the listener's hand) You've really gotten used to touching us, huh? I'm glad. That means you equate touch as a good thing. But remember: you can always reject touch that does not feel good, okay? Even if it's from one of us.

~SHIA

ESPECIALLY if it's from one of us. (Check the tablet) Hmm... they seem to be functioning properly. (Listen: I warmed up my hand to make it feel good.) Huh? You warmed up your hand to make sure it felt good?

~ROY

Wow... that's actually very sweet of you. (Lean into their hand) Mmm... Your hand is really warm... it's nice.

~SHIA

H-Hey, uh.... can I feel too? You do have two hands, after all haha! (The listener lifts their other hand and you take it up to your cheek) Mmmm... yeah, this is really nice on my cheek...

~ROY

Hehe. You are way too kind and sweet to us. Are you sure you'll be happy with just the two of us? (Listen: What do you mean?) What do I mean? Well... there are plenty of other people out there. You don't have to be content with just us.

~SHIA

AH! B-But, you totally can if you want. It's your call, after all. Just because we made you doesn't mean we can dictate how you live your new robot life, ya know?

~ROY

Dude, you're not that clever.

~SHIA

I have absolutely no idea what you're talking about~

~ROY

Choice means they can leave the proverbial nest if they want. (Listen: But what if I don't want to?) H-Huh? But what if you don't want to?

~SHIA

SEE? They don't want to, so why keep the suggestion? Unless, of course, you don't want them to stick around~

~ROY

You're an ass. You know that's not what I meant. (Listen: Then what do you mean?) Then what do I mean? Well... I personally value your autonomy over my own preferences, so to not suggest going out beyond this lab would be almost criminal of me. It's unfair to you.

The listener fully approaches and faces you, Roy. "What do YOU prefer?"

~ROY

Uh... what do I prefer?... well... I... I personally would...

~SHIA

Oh my God, just say it. It's fine!

~ROY

I would like you to stay, okay? I mean... I'll say it: we made you to be practically perfect and you are, by definition, perfect... at least to me.

~SHIA

Me too! I mean, come on! You're smoking hot, you can control yourself without us needing a controller or demanding commands for you. It's like you're totally life-like!

~ROY

And we made you to have an ever-growing sentience. You'll learn, grow mentally, and become quite an intelligent being down the line. (Listen: What about physically?) Physically? Well... If you stay with us and want us around, then we could always help you change your body to be more comfortable in it.

~SHIA

Totally! We humans do it all of the time! You wanna be taller? Say the word. More hair? Less hair? Anything you want!

~ROY

And that is total autonomy. As your creators, we can give that to you, but we want you to selectively choose to want it rather than us feeding you the desire to want it.

The listener steps back and hugs themselves. "What if I want to learn more about touch?"

~SHIA

Huh? What if you want to learn more about touch?? I mean, we can help you with that easy!

~ROY

Hey. Let's not go crazy right off the bat. (To listener) We taught you about kisses and simply touches, but while we can teach you about more... intimate practices of touch, we need to take it slow.

~SHIA

I mean, yeah, but we literally have all the time in the world! We don't need to be snails about it~ (Approach the listener) May I have your hand? (They offer it, you take it.) See, we taught you that, when you like a physical feeling, that touch is pleasurable.

~ROY

Hey, what are you trying to teach--

~SHIA

Shh shh shh shh~ class is in session. (To listener) With permission, we can touch you. However, you can also touch us. (Listen: Really?) Really! Your hand is so warm, I just want to fall asleep on it like a pillow. But you don't have to just touch my cheek. May I move your hand? (You guide the listener's hand to your neck) Mmmm... yeah, you can even touch my neck like this...

~ROY

(Lucky fuck.) I mean... yeah, you could. It's good to learn about touching us rather than just being touched. For example... May I take your other hand? (The listener offers their hand.) You can take your hand and... (Guide it through your hair) Comb your fingers through my hair, just like this... (It's REALLY nice) Your warm hand feels so nice in my hair...

~SHIA

Hehe, you get it? We don't have to be the only ones doing the touching. You are free to touch us as well!

~ROY

Yeah. You can-- (The listener combs your hand and gently pinches your ear) Ah~!
T-That would be my ear... please be careful. It's rather sensitive...

~SHIA

Hold up, wait. You have sensitive ears too?? (The listener reaches up and gently massages the base of your ear too) A-Ahh!! Ngnnn... wow... your fingers massaging my ear like that... t-that feels really good...

The listener massages both of your ears, pleased with themselves at the reactions they elicited from the both of you.

~ROY

H-Heh... we must have some pretty lewd facial expressions, huh? (Groan) But this should be proof enough that you make us feel good. (The listener glides their hand down the side of your face) mmm... where are you tracing your hand...? (They stop at your chest) My... chest? (They gently tug on your shirt) U-Uh... that's my shirt, haha.

~SHIA

Y-Yeah, we wear clothes like shirts to keep us warm and dressed, but I mean... you could totally ask him to take it off~

~ROY

(Listen: Would you take it off?) Would I take off my shirt?... for you, I don't mind. A moment, please? (Step back and remove your shirt with a small vocal effort.)

~SHIA

(wolf whistle if you can) Dayum, you've got some muscles on ya. Kinda jealous.

~ROY

We did a lot of heavy lifting so I'm sure you're jacked under your shirt too.

~SHIA

(Listen: Could you take off your shirt, too?) Huh? You want me to take off my shirt too? Heh. Gladly! It was getting a little hot here anyway~ (You remove your shirt with a small vocal effort.)

~ROY

See? You and I didn't slack off organizing the lab and carrying materials in-- (The listener runs their hands along your chest) A-Ahh... your hands on my chest...

~SHIA

(The listener touches your chest at the same time) Mmm... your hands are still warm~ It feels really nice. Here, place your palm here. (Guide their hand to rest over your clavicle) This is where my heart is. Can you feel it beating like crazy right now?

~ROY

(The listener places their hand over your heart too) U-Uh... you're gonna feel my heart too? I mean... yeah, it's beating really fast too... I don't think either of us can help it. Your hands feel really nice on our skin... (Listen: Can I kiss you?) H-huh? Did you just--

~SHIA

Yeah, they asked to kiss you~ Lucky bun, getting asked first.

~ROY

Hush... (To listener) I would love it if you kissed me. (The listener kisses you slowly. 4-5 seconds) Ahh.. your lips are warm too...

~SHIA

Wait, really? (Listen: Would you let me kiss you?) Huh? Would I let you-- yes! Yes, please. I wanna kiss you, too. (The listener kisses you just as slowly. 4-5 seconds) Mmm... wow... that was even better than when we taught you about kisses...

~ROY

You're learning. Good. But I don't want to just be receiving. (Move to stand behind the listener, lips to neck.) Would you let me kiss you here? Right on your neck? (The listener approves.) Hmhmhm~ thank you~ (Kiss their neck. 3 seconds)

~SHIA

Right! Touches and kisses are mutual... He can kiss your neck and you can keep kissing me on the lips if you want~ (The listener does! 3 seconds) mmm~ I'll never get enough of your kisses.

~ROY

(Whisper to the listener) If you're up for it, kiss his neck, right above where you see his collar bone. You may like his reaction.

~SHIA

What are you whispering about-- (The listener lowers their head and kisses your pulse.)
A-Ahhh~! T-That's not playing fair! (Listen: Did that feel good?) Y-Yes that felt good!
(Listen: Can I keep going?) ...y-yes... please keep kissing there.

~ROY

(Kiss the back of the listener's neck softly) Unless we say no or push away, you don't have to ask where or when to kiss us... things like this are fully in the moment actions. (Hug around the listener's stomach.) I could pull you in like this and all you have to do is say no or push me away. (Listen: I don't want to...) You don't want to? Then we can keep going~

~SHIA

Yeah... there are plenty of places you can explore on us, too. Beneath our clothes... do you wanna see for yourself?

(POTENTIAL END? IF THIS IS LIMIT?)
