

Plasma gun
Step-by-step

Paints required:

Plasma gun

- Corvus black
- Incubi darkness
- Dawnstone
- Abaddon black
- Black green (Vallejo mc)
- Moot green (Vallejo mc)
- Green yellow (Vallejo mc)
- Ice yellow (Vallejo mc)
- Ulthian grey

Basecoat the gun with corvus black.

We now layer the coil with black green. We furthermore glaze around the coil, with black green again – add 2-3 parts of water.

We now layer the lower area of the coil with moot green. We furthermore glaze a bit outside the coil with moot green again – add 2-3 parts of water.

We now make a 1:1 mix of moot green & yellow green & glaze the lower area of the coil once again – add 2-3 parts of water.

We now make a 1:1 mix of green yellow & ice yellow, and glaze the very lower area of the coil. Try to glaze in between the lower area of the coil grills too.

We now start workin on the metal on the gun. We make a 2:1 mix of incubi darkness & dawnstone & glaze the raised areas on the metal parts.

We now edge highlight the gun with dawnstone.

We now highlight all the sharpest edges on the gun with a 2:1 mix of ulthian grey & dawnstone. We furthermore edge highlight around the edges of the coil with a 1:1 mix of moot green & green yellow. Finally we edge highlight the edges of the grills on the coil with a 1:1 mix of black green & abaddon black. Done!
