Model Name

Annoying Gift Box Mini

Model Description:

The Annoying Gift Box Mini. As with the other Annoying Boxes, there's nothing tricky about this gift box, its just simply...annoying. I created this design after getting requests to make a smaller, stocking stuffer sized annoying box. The other big difference is the much longer bolts! There are also 5 different bolt variations you can choose from!

Total print time on my Bambu X1C was 3.5 hrs, and total internal size of the box is 66 mm x 66 mm x 57 mm.

It is scaled just about gift-card-size, so you can scale up as you want to fit bigger items.

Printing Info:

**These are just the settings I used to test the model, feel free to use whatever settings work best for you.

FDM or Resin:	FDM
Scaling:	Can be scaled up, bolts likely won't work well if scaled down.
Supports:	None
Infill/Perimeters:	15% infill + 2 perimeters, 3 perimeters for bolts.
Nozzle Size:	0.4
Layer Height:	0.2

Printing & Assembly

No supports are needed for this model, just print the pieces in the orientation that they import and assemble after printing. The ribbon just screws into place, and the bolts obviously also screw into place to hold the lid on. You will need:
- 1 box
- 1 lid

- 1 ribbon
- 4 bolts

File List (13):
- mini_box (STL)
- mini_lid (STL)
- mini_ribbon (STL)
- bolt (flat head) (STL)
- bolt (phillips) (STL)
- bolt (5.5 mm hex) (STL)
- bolt (6 mm hex) (STL)
- bolt (security) (STL)
- screwdriver (flathead) (STL)
- screwdriver (phillips) (STL)
- screwdriver (5.5 hex) (STL)
- screwdriver (6 hex) (STL)
- screwdriver (security) (STL)
