

# Ty Carter

## Painting from a photo reference

1. Photograph something that is interesting to you.
2. Compose the image to provide an anchor of inspiration.
3. Design a new image.
4. Push temperatures and color relationships past boundaries in the original photo.

### Suggestions while Painting:

- Start as thumbnail, work quickly
- Look for happy accidents
- Don't under any circumstances color drop
- Keep it pure. Start with local color
- Experiment
- Don't jump around. Paint so there is always a color touching another color.
