

OPENING

One day, 9 Mira Shards are sent out to random locations around the world by, Mr.Roto, a tournament organizer. Each gem, when picked up, plays a video message from him requesting the person listening to head towards the Moon Islands, where a tournament is being held. All you have to do in order to win is beat each of the other 8 fighters at least once by running into one another on the isle.

STAGE 1

The first fight is against Tupen, a fighter who uses spray paint as a way to disorient his opponents, then uses his pointed nose to attack. After losing to Roaan, Tupen asks to tag along, curious as to how far he'll get in the tournament.

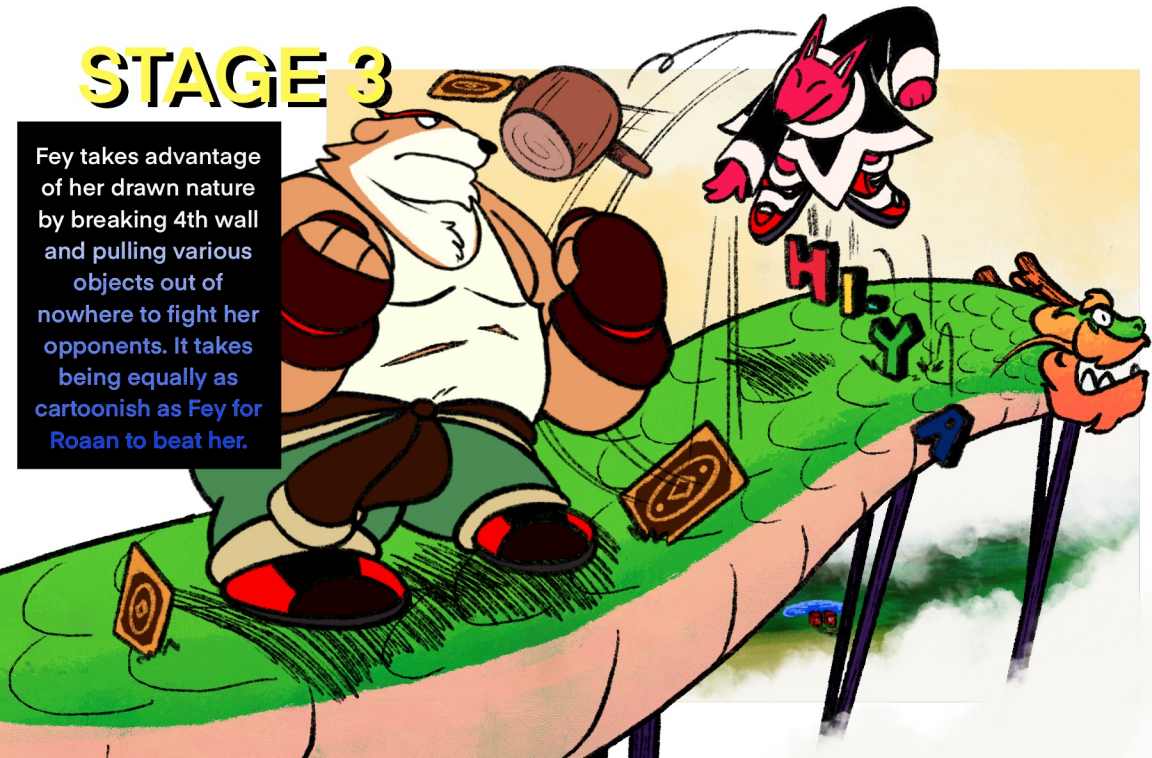

STAGE 2

Garren is a straightforward brawler, not using any special items. His stature makes him harder to deal with, but Roaan does eventually beat him, resulting in a one-sided rivalry.

STAGE 3

Fey takes advantage of her drawn nature by breaking 4th wall and pulling various objects out of nowhere to fight her opponents. It takes being equally as cartoonish as Fey for Roan to beat her.

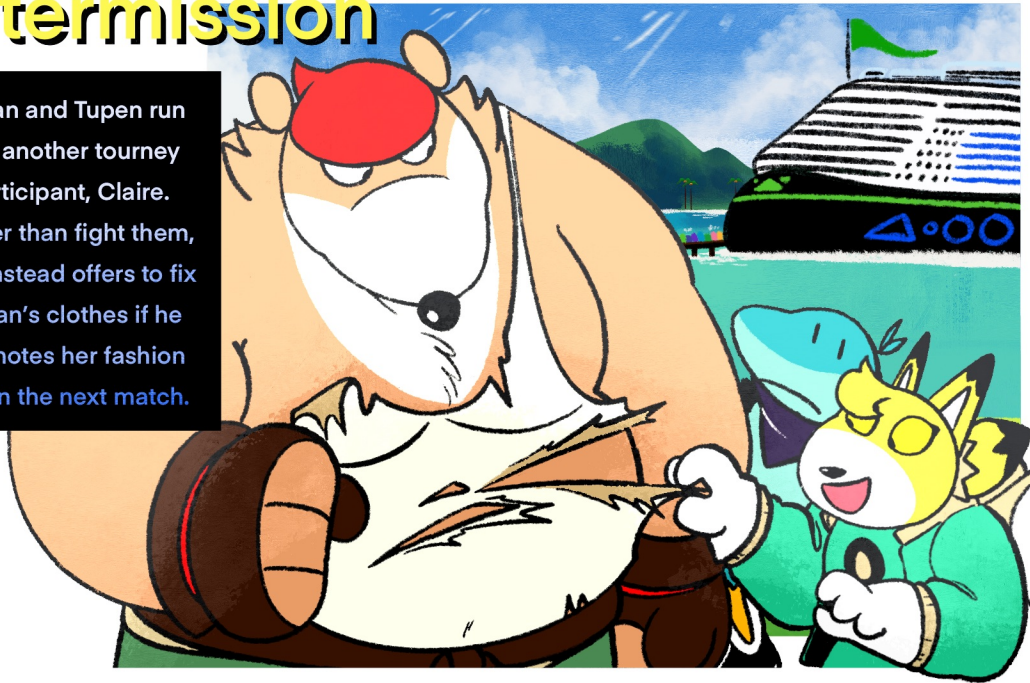

STAGE 4

Toni uses various ninja tools and techniques to catch opponents off guard. Only by reading her movements carefully can she be bested.

Intermission

Roan and Tupen run into another tourney participant, Claire. Rather than fight them, she instead offers to fix Roan's clothes if he promotes her fashion line in the next match.

STAGE 5

Penka relies on their speed and wings to fight, making it difficult for opponents to get a hit on them. They're not as tough as the other fighters however, so only a few well timed hits are need to get the job done.

STAGE ???

While exploring the cruise ship after the last match, the group comes across an unfinished robot. No idea what it could be for however.

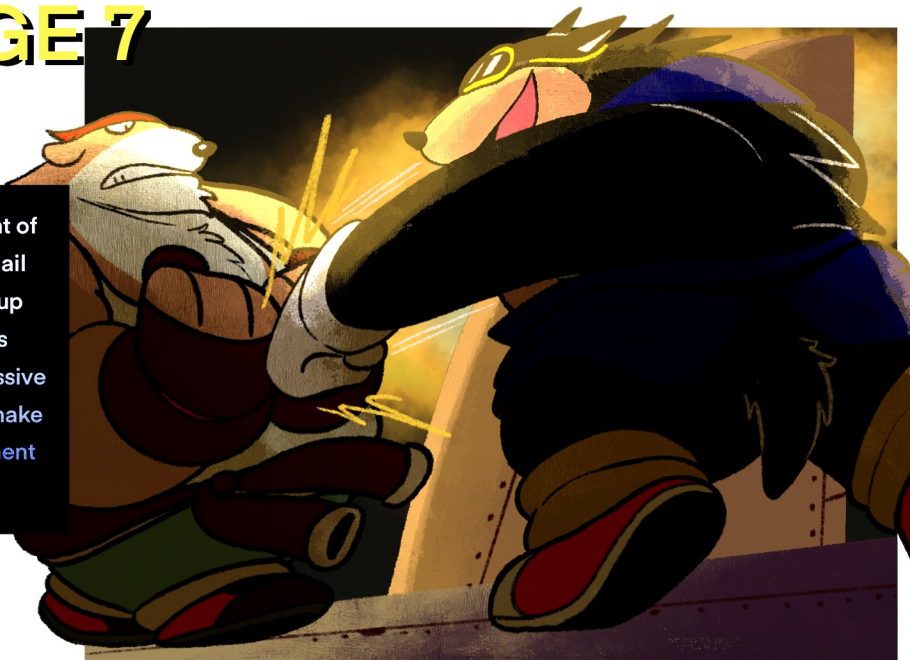

STAGE 6

Jack prefers to keep his distance with his paddle gun, not being good at physical combat. Forcing him to remain up close is the best way to deal with him.

STAGE 7

The final combatant of the tournament, Nail isn't afraid to get up close or keep his distance. His impressive speed and power make him a tough opponent to fight against.

STAGE 8

Right before the award ceremony for the tournament is about to take place, it's revealed that Mr.Roto had been making clones of all the fighters to serve as his lackeys via the shards they had been carrying around. This round is an even match up.

FINAL STAGE

After the false fighters have been defeated, Mr. Roto calls out the R1-NO as a last ditch effort to collect the fighters' data. Roaan steps up to fight the powerful robot in a final battle.

EPILOGUE

After a fierce battle with the R1-NO and stopping Roto's plans, Roaan is named the victor of the tournament. Despite the commotion of the last few matches, everyone agrees that the tourney was enjoyable to go through. As a result, the fighters agree to hold tournaments of their own every so often throughout the year for fun.
